Introduction

The 2022-2025 Iowa Statewide Transportation Improvement Program (STIP) has been developed in conformance with the guidelines prescribed by Title 23 and Title 49, United States Code. The STIP is generated to provide the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) a listing of all projects that are candidates for federal aid from the FHWA and FTA for the four federal fiscal years (FFY) 2022-2025. The STIP was approved by FHWA and FTA on Sept. 21, 2021.

The STIP has been produced based on the current federal transportation bill, passed on December 4, 2015, the Fixing America’s Surface Transportation Act (FAST-Act). Under the FAST-Act FHWA federal funding programs include the National Highway Performance Program (NHPP), National Highway Freight Program (NHFP), Surface Transportation Block Grant Program (STBG), Transportation Alternatives Set-Aside (TAP), Congestion Mitigation and Air Quality Improvement Program (CMAQ), Highway Safety Improvement Program (HSIP), Railway-Highway Crossings, State Planning and Research, and Metropolitan Planning.

Documents evidencing the Iowa Department of Transportation’s authority to act concerning matters related to transportation, federal aid expenditures, and approvals of metropolitan planning organizations’ (MPOs) transportation improvements programs (TIPs) have been provided in past STIPs and can be provided again upon request.

The projects identified in the STIP are the result of statewide and regional efforts conducted by the Iowa DOT and each of Iowa’s Regional Planning Affiliations (RPAs) and MPOs. Projects are arranged according to whether the proposed funding is FHWA or FTA based. Projects are further sorted according to the MPO or RPA in which they reside and the individual program by which they are funded. Each entry shows the expected total

project cost, federal aid participation, and an item number to facilitate FHWA and FTA reporting.

In addition to projects with a unique location and sorted according to the process noted above some proposed obligations are identified under a broader category of statewide improvements. These entries are subject to alternate project selection processes and are separated and listed first. Examples of statewide programming entries include the DOT's Railroad Highway program, the Highway Safety Improvement Program Secondary, Emergency Relief projects, and State Planning and Research funding, among others.

Some projects are identified that have no federal aid proposed. These projects have stood the test of Iowa's statewide and local public participation processes and are candidates for federal aid if additional funds become available or if project schedules require deferral of candidates presently identified for federal participation. However, all projects included in the STIP, regardless of funding source, are expected to be accomplished in the federal fiscal year (FFY) indicated in the STIP.

Inclusion of a project in the STIP does not guarantee federal aid eligibility for the project. Eligibility for federal aid will be determined on a case-by-case basis when project authorization is requested from the FHWA or FTA.

Iowa DOT Programming Process

The Iowa DOT's programming process is transparent, aligns available tools and plans, and incorporates appropriate and extensive stakeholder input. The major procedural steps include problem statement development, scoping, project advancement, project prioritization, program synthesis, and final programming. It is important to note that this process is also governed by Iowa's long range transportation planning documents. As such, projects programmed in the Iowa Transportation Improvement Program (Five-Year Program) and STIP are consistent with Iowa's long range State Transportation Plan – Iowa in Motion 2045, and several other planning documents, as discussed below. A copy of the State Transportation Plan can be found at:

<https://iowadot.gov/iowainmotion/iowa-in-motion-home>

The FAST Act continued the provisions for performance-based planning and programming (PBPP) that were established in the prior federal

reauthorization act, Moving Ahead for Progress in the 21st Century (MAP-21). The phase-in of federal PBPP requirements has been ongoing over the past several years. Iowa in Motion 2045 was adopted prior to initial state performance targets being developed; these targets will be included in the next update of the plan. Currently, statewide targets have been set for federally-required measures in the areas of safety (all roads), pavement condition (Interstate and non-Interstate National Highway System (NHS)), bridge condition (NHS), system reliability (Interstate and non-Interstate NHS), freight movement (Interstate), and transit asset management (small urban and rural transit systems).

Additional background on performance measures and targets, links to Iowa DOT performance-based plans, and current Iowa DOT performance targets are available at https://iowadot.gov/systems_planning/planning/federal-performance-management-and-asset-management. Discussion below provides an overview of the various performance-based plans and target-setting processes, and their connection to the investments included in the STIP.

Iowa in Motion 2045 established the following vision for Iowa DOT: “A safe and efficient multimodal transportation system that enables the social and economic well-being of all Iowans, provides enhanced access and mobility for people and freight, and accommodates the unique needs of urban and rural areas in an environmentally conscious manner.” The plan focuses on four investment areas, with a heavy emphasis on stewardship:

- Stewardship through maintaining a state of good repair
- Modification through rightsizing the system
- Optimization through improving operational efficiency and resiliency
- Transformation through increasing mobility and travel choices

Iowa in Motion 2045 includes analysis and strategies for the various modes of transportation in the state. For highways, this includes considerations related to capacity, mobility and safety, freight, condition, operations, and bridges. Pavement and bridge needs are anticipated to be addressed primarily through asset management as described in the Transportation Asset Management Plan (TAMP), which is highlighted below. The STIP helps to address the following identified needs by including investments that implement applicable strategies.

- Capacity needs were identified for three interurban interstate corridors and for several Interstate, NHS, and other State routes in urban areas. Strategies to address these needs include targeting investment toward areas anticipated to become congested by 2045, and considering targeting anticipatory investments at locations with potential congestion issues beyond 2045. Strategies include added capacity and/or operational improvements.
- Mobility and safety, or “Super-2” needs, were identified for five U.S. routes across Iowa, all of which are part of the NHS. Strategies to address these needs include targeting investment toward improvements such as wider paved shoulders, turn lanes, passing lanes, limited access, and geometric improvements. These improvements are largely anticipated to be opportunistic, and are likely to occur at spot locations when other pavement, bridge, or safety issues are being addressed.
- The operations analysis focused on prioritizing interstate corridors from an operations perspective, and implementing appropriate transportation system management and operations (TSMO) strategies on those corridors.

The 2019 Strategic Highway Safety Plan (SHSP) includes engineering strategies to help address issues with lane departure crashes and to improve intersections. These improvements are being implemented as appropriate throughout the State’s highway system. Strategies to help prevent lane departures include the installation of countermeasures such as centerline rumble strips, shoulder/edgeline rumble strips, curve delineation, shoulder treatments, and median cable barriers. Strategies to help improve intersections include implementing innovative improvements such as roundabouts, reduced conflict intersections, diverging diamond interchanges, and offset turn lanes; traffic signal modifications; intersection lighting; and bicycle/pedestrian intersection improvements.

The HSIP program of projects included in the STIP has been produced based on the strategies contained in the SHSP and the Iowa DOT’s safety performance measure target setting process. Numerous stakeholder groups, including MPOs, participated in the target setting process. Working in partnership with local agencies, investments have been identified and programmed which will construct effective countermeasures to reduce traffic fatalities and serious injuries. Projects chosen for HSIP investment are based on crash history, roadway characteristics, and the existence of an infrastructure countermeasures that can address the types of crashes

present. The Iowa DOT continues to utilize a systemic safety improvement process rather than relying on “hot spot” safety improvements.

Pavement and bridge projects on the Interstate System and non-Interstate NHS are determined in alignment with the Transportation Asset Management Plan (TAMP) and the performance target setting process. The TAMP helps connect the vision of Iowa in Motion 2045 with the projects programmed in the Five-Year Program and STIP. The TAMP describes how the existing highway system is managed. Preserving and improving this system is critical for achieving the system vision. The TAMP also connects Iowa in Motion 2045 and system/modal plans to Iowa DOT’s Five-Year Program and the STIP. Iowa in Motion 2045 defines a vision for the transportation system over the next 20 years, while the Five-Year Program and STIP identify specific investments over the next four to five years. The TAMP has a 10-year planning horizon and helps ensure that investments in the Five-Year Program and STIP are consistent with Iowa DOT’s longer-term vision.

Pavement and bridge projects are identified and programmed in the STIP in a manner that is consistent with the strategies identified in the TAMP and the target-setting process. Pavement and bridge target setting involved an internal DOT working group and coordination with MPOs and local owners of NHS assets. The methodology used to set targets used current and historical condition and funding data to forecast future conditions. Asset management focuses on performing the right treatment at the right time to optimize investments and outcomes. The TAMP discusses the major investment categories that the Commission allocates funding through. Once the Commission approves the funding for these categories, Iowa DOT recommends the allocation of the funds to specific projects using the processes described in the TAMP. The TAMP includes a 10-year forecast of funding for pavement and bridge stewardship projects, and funding amounts in the STIP generally align with this forecast.

The Iowa DOT strives to maintain the bridge inventory in a condition that provides safe and efficient movement of people and freight. Bridges are managed by using a bridge management process with forecasting capabilities to better identify future needs across the entire inventory. The ability to predict bridge needs beyond a short-term time horizon improves the ability to make better decisions today and predict what funding needs are necessary for a stable bridge inventory. Bridge projects are programmed to help meet the desired program outcomes documented in the TAMP.

The Iowa DOT works to provide a safe, serviceable, and sustainable roadway system through the use of its pavement management system. The pavement management system will assist program administrators in the selection of economical options for pavement decisions for the construction, reconstruction, rehabilitation, preservation, and maintenance of pavements. The pavement management system will be used to model and predict future pavements conditions based on various funding levels. This analysis will determine the level of funding to maintain the pavement system in a state of good repair. Pavement projects are programmed to help meet the desired program outcomes documented in the TAMP.

Projects focused on improving pavement and bridge condition also often help improve system reliability and freight movement. Additional projects focused specifically on improving these areas of system performance are developed in alignment with the target-setting process for related performance measures, and the freight improvement strategies and freight investment plan included in the State Freight Plan. This plan includes a detailed analysis and prioritization of freight bottlenecks, which are locations that should be considered for further study and possibly for future improvements. A detailed analysis was performed to prioritize the bottlenecks based on their value to the overall system, traffic and infrastructure condition, and travel time performance. The process also involved extensive input from State, MPO, RPA, and industry representatives. State projects identified in the freight investment plan and programmed in the STIP were highly-ranked freight bottlenecks. System reliability and freight target setting involved an internal DOT working group and coordination with MPOs. The methodology used to set targets used current and historical data on condition and funding to forecast future condition.

The State Freight Plan identifies several strategies that help direct investments made in the STIP. These include:

- Target investment to address mobility issues that impact freight movements.
- Emphasize the Iowa Multimodal Freight Network and utilize designs that are compatible with significant freight movements.
- Right-size the highway system and apply cost-effective solutions to locations with existing and anticipated issues.

Related to asset management and system resilience, 23 CFR Part 667 requires a periodic evaluation of public roads that have been impacted two

or more times since 1997 by a natural or man-made disaster resulting in an emergency or disaster declared by the Governor or the President and had permanent repairs completed using Federal funds. Any such locations that are targeted for projects to be completed with Federal funds would need to consider reasonable alternatives that could:

- 1) Reduce the need for Federal funds to be expended on emergency repair and reconstruction activities;
- 2) Better protect public safety and health and the human and natural environment; and
- 3) Meet transportation needs as described in the relevant and applicable Federal, State, local, and tribal plans and programs.

Iowa DOT completed this evaluation in November 2020 and identified six state-owned locations and two locally-owned locations that appear to meet the review requirements. With the identification of these eight locations, Iowa DOT will continue to utilize its Project Scoping and Prioritization tool to review these locations in the event a project is being developed within one of the eight identified areas. Iowa DOT will also work with the local asset owners to further review these locations and ensure compliance with the regulations in the event of a project in an identified area. Iowa DOT will continue to monitor all identified damage locations for future ER events and communicate within the department and with other system owners whenever new locations are found to meet the requirements set forth in regulation.

The culmination of the DOT efforts outlined above is the approval of the DOT Five-Year Program. This document, approved by the Iowa Transportation Commission, incorporates a five-year plan for transportation investments on the highway system and includes various other modal programs. The current Iowa DOT Five-Year Program can be found at:

https://iowadot.gov/program_management/Five-Year-Program

Local Sponsor Programming Processes

Projects included in the STIP, but not located on the primary system, are identified and programmed through Iowa's regional transportation planning process. In February 2018 Iowa's Transportation Commission approved a Federal Aid Swap policy that allows certain locally sponsored projects to swap targeted federal aid dollars for state Primary Road Fund (PRF) dollars. Specifically, the Federal Aid Swap policy applies to STBG,

CMAQ, and HSIP funding targeted to locally sponsored projects. Swap funded projects have been included in the STIP document to provide a comprehensive listing of transportation improvements funded through the state of Iowa's federal aid apportionments and PRF dollars.

Iowa's 18 RPAs and 9 MPOs annually receive targets of federal STBG funding for which they are responsible for programming. These organizations provide input to the STIP by conducting regional transportation planning efforts including project selection for targeted STBG/Swap funding. Projects identified by each agency are local priorities and are consistent with each agency's long-range transportation plan.

In addition to the STBG/Swap funded projects noted above, the STIP also includes county and city bridge projects funded with federal aid and Swap funding. Swap funds are targeted directly to Iowa's 99 counties for investment in secondary road bridge infrastructure. The Iowa DOT also administers a city bridge program which makes Swap funding available for investment in municipal bridge projects. City and county bridge projects funded with FHWA or Swap funding are included in MPO and RPA TIPs and carried forward to the STIP.

A number of additional grant programs are administered by the Iowa DOT which target FHWA and Swap funding to locally sponsored projects. Funding available to local sponsors includes STBG for TAP type projects, CMAQ, NHFP, HSIP, Recreational Trails, and Swap. The projects selected for funding as part of these grant programs are programmed in MPO and RPA TIPs and included in the STIP.

Federal Transit Administration Programming Process

In addition to the FHWA program of projects outlined above, the draft STIP includes all projects for which Federal Transit Administration (FTA) funding may be utilized. The transit portion of the STIP was developed by Iowa's MPOs and RPAs in cooperation with the state's large urban, small urban, and regional transit systems.

Public transit capital projects included in the STIP align with the transit asset management (TAM) planning and target setting processes undertaken by the Iowa DOT, transit agencies, and MPOs. The Iowa DOT establishes a group TAM plan and group targets for all small urban and rural providers while large urban providers establish their own TAM plans and targets. Investments are made in alignment with TAM plans with the intent of

keeping the state's public transit vehicles and facilities in a state of good repair and meeting transit asset management targets. The Iowa DOT allocates funding for transit rollingstock in accordance with the Public Transit Management System process. In addition, the Iowa DOT awards public transit infrastructure grants in accordance with the project priorities established in Iowa Code chapter 924. Additional state and federal funding sources that can be used by transit agencies for vehicle and facility improvements are outlined in the funding chapter of the Transit Manager's Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

Public transit projects included in the STIP align with the transit safety planning and target setting processes undertaken by the transit agencies and MPOs. While the Iowa DOT provided assistance with the development of initial Public Transportation Agency Safety Plans (PTASPs), each large urban transit provider is responsible for implementing its PTASP, which includes transit safety targets. Investments are made in alignment with PTASPs with the intent of keeping the state's public transit operations, vehicles, and facilities safe and meeting transit safety targets. State and federal funding sources that can be used by transit agencies for operations, vehicles, and facility improvements are outlined in the funding chapter of the Transit Manager's Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

Financial Analysis

The STIP identifies federal aid candidates for roadway, transit, and alternative investments for four federal fiscal years. The amount of FHWA funding considered available for the various apportionment (formula) categories are based on projected apportionments for the upcoming four-year period. For the purpose of fiscally constraining the STIP, FFY 2022-2025 federal aid apportionments have been based on FHWA notification N4510.854 – Fiscal Year 2021 Supplementary Tables. Some projects identified for funding from demonstration or other allocation (nonformula) programs are also included in the STIP. These other categories of funds have been programmed within amounts expected to be available from nonformula sources in the year programmed.

The table on page 8 shows proposed FHWA funding by appropriation code and year. Although the programmed amounts may exceed annual apportionments funds carried over from earlier years cover any annual

deficits. The table also details estimated advance construction (AC) candidate projects and AC conversions. Additional information regarding the Iowa DOT's use of the AC provision is provided later in the Financial Analysis section of the STIP. The programmed amounts shown in the fiscal constraint table express project costs in year of expenditure (YOE) dollars. The costs were adjusted to account for inflation by individual project sponsors.

The AC provision is an important aspect of Iowa DOT's cash flow management process that cannot be used effectively without the ability to authorize federal aid candidates and costs that exceed the baseline annual federal aid apportionments. The Iowa DOT maintains a "backlog" of AC projects to optimize federal aid as it relates to DOT funding strategies and revenue streams. This is done so the department can accomplish full recovery of obligation authority at an accelerated rate by converting AC projects against new apportionments for work substantially completed, and accomplishing new projects under the AC umbrella. Furthermore, the use of the AC provision offers the department additional security in ensure all federal aid obligation limitation will be obligated in the FFY it becomes available.

The State of Iowa plans to continue this strategy by requesting authorization of many of the federal aid projects identified in the STIP as AC candidates and converting previous AC candidates for reimbursement on completed contracts. A listing of authorized AC candidates is maintained by the FHWA and the Iowa DOT and is included in the appendix.

Although federal funds do provide a portion of the funding available for the highway construction program they are not the largest funding component for the Iowa DOT. Federal aid funds are an even smaller portion of local governments' transportation budgets in Iowa. The table on page 9 demonstrates total nonfederal aid revenues estimated to be available for transportation investments within the four-year STIP period. In addition, the STIP includes information illustrating estimated operations and maintenance costs associated with management of the federal aid system. These amounts are shown on page 10. A comparison of the two tables demonstrates that state and local governments have sufficient nonfederal aid revenues available to cover the estimated cost of maintaining and operating the federal aid system. Furthermore, the state and local transportation revenues documented on page 8 demonstrate that the Iowa

DOT and local project sponsors of federal aid projects have sufficient local funding to meet federal aid matching requirements.

The transit program identified in the STIP reflects the majority of transit activities in the state of Iowa. The amount available for FTA programs is based on expected allocations that will not be determined until after FFY 2022 has begun. Projected revenues used for programming (shown in the following table) are based on recent experience. Unlike FHWA programs, whereby the Iowa DOT is sponsor for a significant portion of the proposed expenditures, sponsors for transit activities are local governments and/or the service providers. Although some state funds are distributed to support transit activities, administration of the various programs occurs at the local level. Because costs related to transit capital and operating costs are relatively stable, it is unlikely reduced funding levels can be offset by any potential reductions in project costs. If available funds are less than projected, projects will be deferred or additional nonfederal shares will become the responsibility of the local sponsors. If funding is available beyond levels identified, additional expenditures may be rescheduled from the 2020 proposals. As during previous programming periods, a revised program will be submitted to the FTA if actual allocations differ significantly from current estimates.

2022-2025 Statewide Transportation Improvement Program					
Estimated FTA Program Summary (x \$1,000)					
Name	Funding Source	FY22	FY23	FY24	FY25
Metropolitan Planning Program	5303	\$157	\$157	\$157	\$157
Statewide Planning Program	5304	\$20	\$20	\$50	\$0
Urbanized Area Formula Assistance Program	5307	\$36,859	\$18,199	\$20,620	\$21,182
New Fixed Guideway Capital Program	5309	\$0	\$0	\$0	\$20,000
Seniors and Persons with Disabilities Program	5310	\$2,872	\$2,333	\$2,586	\$2,424
Nonurbanized Area Formula Assistance Program	5311	\$17,981	\$8,799	\$8,079	\$7,498
Bus and Bus Facilities Program	5339	\$110,455	\$16,887	\$13,716	\$10,124
Public Transit Infrastructure Grant Program (PTIG)	PTIG	\$3,869	\$700	\$0	\$80
State Transit Assistance (STA)	STA	\$15,116	\$10,942	\$10,596	\$10,224
Iowa's Clean Air Attainment Program	ICAAP	\$52	\$866	\$424	\$437
Surface Transportation Block Grant Program	STBG	\$3,040	\$3,197	\$2,645	\$1,400

The above information, when considered with the financial information contained on page 8, demonstrates that the 2022-2025 Iowa STIP is fiscally constrained given currently programmed federal aid amounts, estimated AC conversions, balances of contract authority, and estimated apportionments through FFY 2025.

Public Participation

Iowa's public involvement procedures for federal aid candidates and other investments encourage public participation in development of transportation policy and project selection. Development of the state's transportation policy is the responsibility of the Iowa Transportation Commission, a citizen board appointed by the governor. Development of the state's Five-Year Program is subject to the review and approval of the Iowa Transportation Commission. Public meetings provide opportunities for public input directly to the Iowa Transportation Commission on, at a minimum, a monthly basis. Iowa Transportation Commission meetings are periodically held in locations outside the Iowa DOT's central complex to solicit input concerning its programming decisions. The department also

maintains planning, field services coordination, and local systems staff at district offices to facilitate public involvement on a daily basis.

As noted earlier, the Iowa DOT develops projects based on an overall investment strategy consistent with the state's long-range plan. Some programs are intended to address specific aspects of the transportation systems, like highway safety or rail crossing signalization. Many projects and programs are developed to address transportation needs within an investment strategy that focuses portions of available funds toward economic development, maintenance and repairs, or system improvements. Many aspects of the programs, such as the railroad crossing improvements, clean air efforts, some bridge replacements, and highway safety have specific selection/ranking processes that have been adopted by the Iowa DOT to guide commitments of funds. Safety is always a foremost consideration.

The approximately 114,000 miles of public roads in Iowa are managed by various government agencies. The Iowa DOT holds jurisdiction over those portions of the system designated the Primary Road System (approximately 9,000 miles), which includes interstates. Other rural roadways are the responsibility of the county governments (approximately 90,000 miles). Cities and towns generally retain jurisdiction over roadways within their corporate limits (approximately 14,000 miles). Roadways on federal properties are under jurisdiction of the respective federal agencies, just as those at state-owned facilities are under the jurisdiction of the various state agencies. Similarly, transit programs are administered by governmental agencies, generally on a city or regional basis.

Selection of projects funded by the FHWA and FTA occur at several levels, all subject to public participation requirements. Local programs are coordinated by MPOs in cities with populations greater than 50,000, and by similar organizations representing the "rural" areas called RPAs. In most situations, projects are initiated by sponsors within the MPO/RPA that are directly responsible for revenues required to match federal aid, providing future maintenance and other support, and accomplishing activities that are not selected for federal aid participation. Maps showing locations of the MPOs and RPAs, transit systems, and Iowa DOT district planners are provided in the appendix.

Cities, counties, transit services, and interested individuals assist MPOs and RPAs in developing local improvement programs and transportation services. Each planning organization held public forums to consider FHWA and FTA investments within their areas for the years 2021 through 2024. Written comments and emails could also be submitted. Each group considered proposed expenditures and developed priorities for their area. All are also encouraged to review proposals for improvements on the state system and may propose modifications to programmed projects or identify candidates for future consideration. Subsequently, each MPO and RPA generated a draft TIP, held public meetings to record comments concerning the proposed program, and submitted the final TIP to the Iowa DOT for integration into a draft STIP.

The Iowa DOT has also implemented public involvement procedures specific to the STIP. After compiling information contained in the Five-Year Program and MPO/RPA TIPs, an electronic copy of the draft STIP was distributed for public review through placement on the Iowa DOT's website. Additionally, an Iowa DOT news release was distributed notifying media and the public of the STIP availability. Finally, a special meeting to solicit public input concerning the draft STIP from a statewide perspective was held virtually on Aug. 17, 2021.

All comments received by the Iowa DOT from STIP or other public participation activities that relate to state-level programming are provided to the Iowa Transportation Commission for consideration during development of the next Iowa TIP. A compilation of all public comments concerning the Iowa DOT's program will be available during review of the proposed TIP. Comments regarding projects generated at the local level will be used by the respective MPOs and RPAs during development of future TIPs.

Changing an Approved STIP

Revisions are defined as changes to a TIP/STIP that occur between scheduled annual updates. There are two types of changes that occur under the umbrella of revision. The first is a major revision or “amendment.” The second is a minor revision or “administrative modification.” The Iowa DOT requires that each MPO or RPA adopt these definitions and thresholds, at a minimum, when determining an amendment vs. an administrative modification.

Amendment

An amendment is a revision that involves a major change to a project included in the TIP/STIP. This includes an addition or deletion of a project, a major change in the amount of programmed federal aid, or a major change in design concept or scope such as a changing of project termini.

Administrative Modification

A minor revision to a TIP or STIP is an administrative modification. It includes minor changes or project phase costs, minor changes to funding sources of previously included projects, and minor changes to project or project phase initiation dates.

Amendment vs. Administrative Modification

There are four main components that can be used to determine whether a project change constitutes an amendment or an administrative modification. They include the following.

Project costs: Determination will be made based on the percentage change or dollar amount of change in federal aid. Projects in which the federal aid has been increased by more than 30 percent or total federal aid increases by \$2 million or more will require an amendment. Anything less can be processed as an administrative modification.

Schedule changes: Changes in schedules to projects that are included in the first four years of the TIP/STIP will be considered administrative modifications. Projects that are added or deleted from the TIP/STIP will be processed as amendments.

Funding sources: Additional federal funding sources to a project will require an amendment. Changes to funding from one source to another will require an administrative modification.

Scope changes: Changing project termini will be processed as an amendment. Other examples of changes that require amendment are changing the type of work from an overlay to reconstruction or changing the number of through lanes.

Procedural Requirements for Revisions

Amendments are considered major revisions and therefore have more procedural requirements. Requirements for approving an amendment to the STIP include an opportunity for public input, policy board approval of locally sponsored project amendments, and a redemonstration of fiscal constraint of the STIP. Public involvement for all locally sponsored project amendments will occur at the MPO and RPA level.

Statewide public review for Iowa DOT project amendments takes place prior to approval of the amendment in the STIP. Iowa DOT sponsored projects within an MPO must go through the MPO’s adopted amendment process, which includes public review and approval by the appropriate boards and committees. When possible, Iowa DOT amendments within an RPA also go through the RPA’s adopted amendment process. However, this is not required, and in some instances Iowa DOT amendments in RPAs are approved based solely on the statewide public review performed by the Iowa DOT.

Administrative modifications have simplified procedures that allow more flexibility in the processing of changes. Each RPA and MPO is allowed to approve administrative modifications by seeking board approval or the planning agency may make minor changes administratively if the process to do so has been documented and approved by the appropriate technical and policy boards. Redemonstration of STIP fiscal constraint may be necessary for certain administrative modifications.

Fiscal Constraint – Revisions

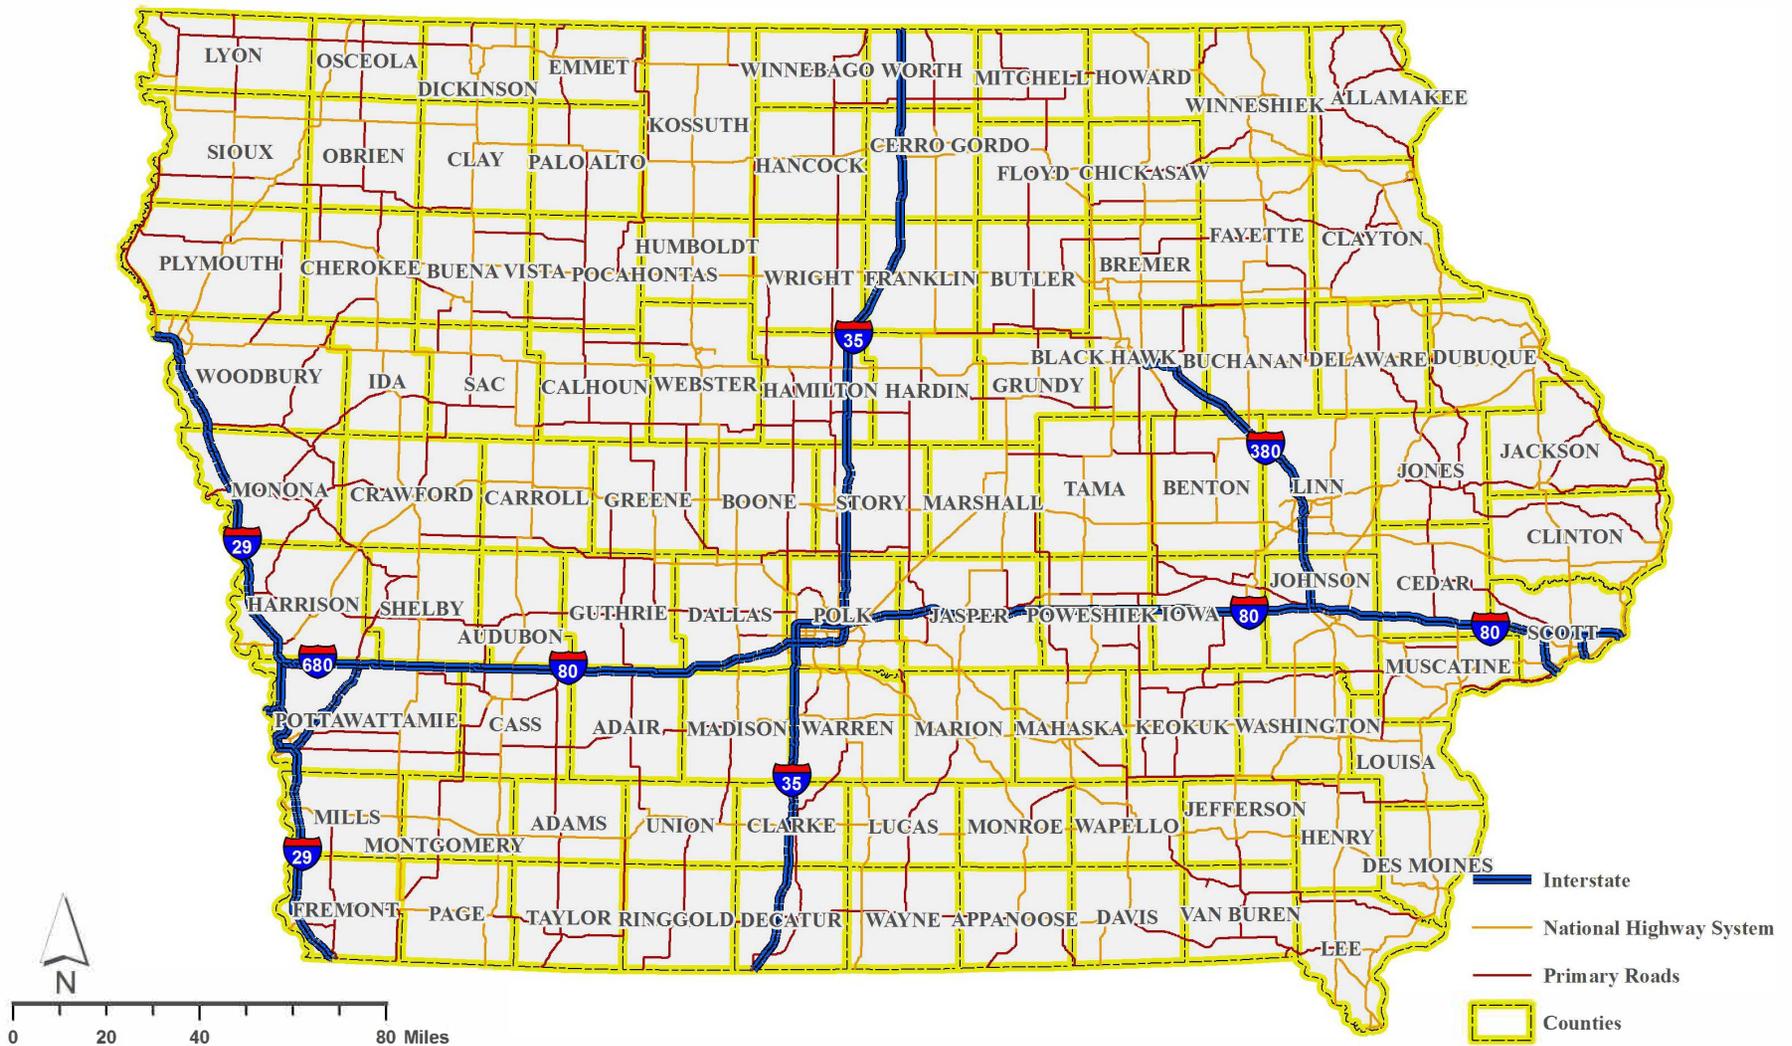

In order to maintain fiscal constraint of the STIP document most revisions to the STIP that add a new project or increases a project’s federal aid amount will require that a corresponding change be made to another

programming entry to ensure that the STIP remains fiscally constrained. This requirement pertains to both administrative modifications and amendments to the STIP and is the responsibility of local project sponsors and local planning agencies for locally administered federal aid projects.

2022 Transportation Improvement Program

Map key:

- / - Road or Bridge work
 - / - Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-05 - MIDAS Council of Governments

2022 Transportation Improvement Program

Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

2022 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

2022 Transportation Improvement Program

Map key:
 ● / - Road or Bridge work
 ● / - Trail or Enhancement Work
 [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:
 1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
 2. Locate county in which project sits
 3. Find the TPMS number - e.g. "10238"

2022 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

2022 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

2022 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA 17 - Chariton Valley Planning and Development

308 North 12th Street, Centerville, IA 52544

Phone: 641-437-4359, Fax: 641-437-1161, www.charitonvalleyplanning.com

Executive Summary of Transit Report of Chariton Valley Planning and Development
Prepared by Chariton Valley Planning and Development, Inc. for the Chariton Valley Planning and Development Board

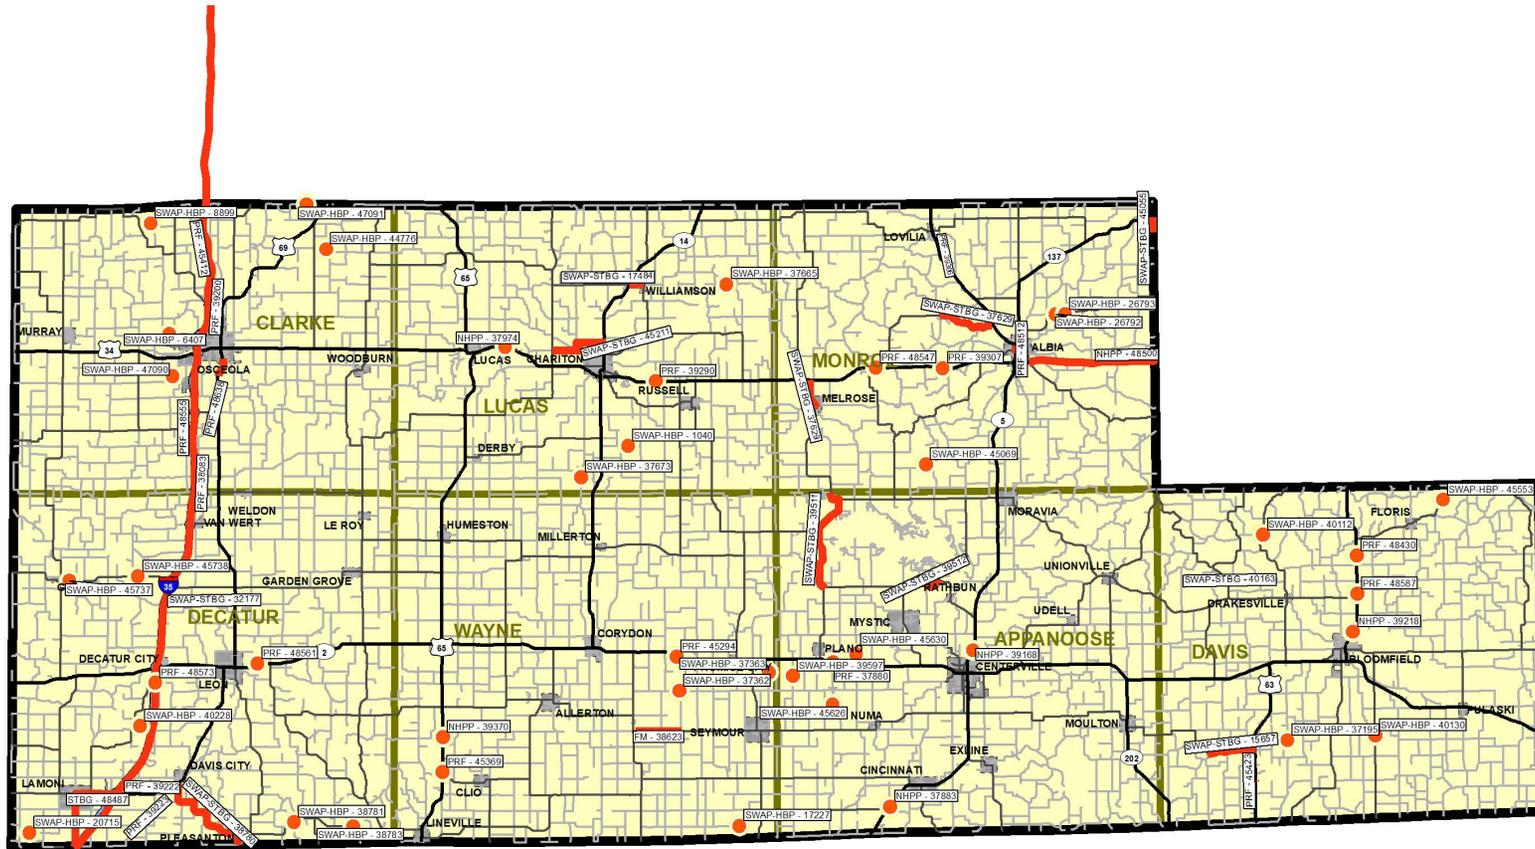

2022 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-17 - Chariton Valley Planning and Development

2022 Transportation Improvement Program

Map key:
 ● / — Road or Bridge work
 ● / — Trail or Enhancement Work
 [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:
 1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
 2. Locate county in which project sits
 3. Find the TPMS number - e.g. "10238"
