Introduction

The 2023-2026 Iowa Statewide Transportation Improvement Program (STIP) has been developed in conformance with the guidelines prescribed by Title 23 and Title 49, United States Code. The STIP is generated to provide the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) a listing of all projects that are candidates for federal aid from the FHWA and FTA for the four federal fiscal years (FFY) 2023-2026. The STIP was approved by FHWA and FTA on September 23, 2022.

The STIP has been produced based on the current federal transportation bill, the Infrastructure Investment and Jobs Act (IIJA), which was signed into law on November 15, 2022. Under the IIJA, FHWA federal funding programs include the National Highway Performance Program (NHPP), National Highway Freight Program (NHFP), Surface Transportation Block Grant Program (STBG), Transportation Alternatives Set-Aside (TAP), Congestion Mitigation and Air Quality Improvement Program (CMAQ), Highway Safety Improvement Program (HSIP), Railway-Highway Crossings, Metropolitan Planning, Bridge Formula Program, Carbon Reduction, and Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT).

Documents evidencing the Iowa Department of Transportation’s authority to act concerning matters related to transportation, federal aid expenditures, and approvals of metropolitan planning organizations’ (MPOs) transportation improvements programs (TIPs) have been provided in past STIPs and can be provided again upon request.

The projects identified in the STIP are the result of statewide and regional efforts conducted by the Iowa DOT and each of Iowa's Regional Planning Affiliations (RPAs) and MPOs. Projects are arranged according to whether the proposed funding is FHWA or FTA based. Projects are further sorted according to the MPO or RPA in which they reside and the individual program by which they are funded. Each entry shows the expected total project cost, federal aid participation, and an item number to facilitate FHWA and FTA reporting.

In addition to projects with a unique location and sorted according to the process noted above, some proposed obligations are identified under a broader category of statewide improvements. These entries are subject to alternate project selection processes and are separated and listed first. Examples of statewide programming entries include the DOT's Railroad Highway program, the Highway Safety Improvement Program Secondary, Emergency Relief projects, and State Planning and Research funding, among others.

Some projects are identified that have no federal aid proposed. These projects have stood the test of Iowa's statewide and local public participation processes and are candidates for federal aid if additional funds become available or if project schedules require deferral of candidates presently identified for federal participation. However, all projects included in the STIP, regardless of funding source, are expected to be accomplished in the federal fiscal year (FFY) indicated in the STIP.

Inclusion of a project in the STIP does not guarantee funding eligibility for the project. Eligibility for federal aid and swap will be determined on a case-by-case basis when project authorization is requested from the FHWA or FTA or during project development and letting.

Iowa DOT Programming Process

The Iowa DOT's programming process is transparent, aligns available tools and plans, and incorporates appropriate and extensive stakeholder input. The major procedural steps include problem statement development, scoping, project advancement, project prioritization, program synthesis, and final programming. It is

important to note that this process is also governed by Iowa's long range transportation planning documents. As such, projects programmed in the Five-Year Program are consistent with Iowa's long-range State Transportation Plan – Iowa in Motion 2050, and several other planning documents, as discussed below. A copy of the State Transportation Plan can be found at:

<https://iowadot.gov/iowainmotion/iowa-in-motion-home>

The IJJA continued the provisions for performance-based planning and programming (PBPP) that were established in the 2012 federal reauthorization act, Moving Ahead for Progress in the 21st Century (MAP-21). The phase-in of federal PBPP requirements is largely complete. Iowa in Motion 2050 includes the most recently established statewide targets, which have been set for federally-required measures in the areas of safety (all roads), pavement condition (Interstate and non-Interstate National Highway System (NHS)), bridge condition (NHS), system reliability (Interstate and non-Interstate NHS), freight movement (Interstate), and transit asset management (group targets for small urban and rural transit systems). The FHWA measures are also known as PM1 (safety), PM2 (pavement condition and bridge condition), and PM3 (system reliability and freight movement).

Additional background on performance measures and targets, links to Iowa DOT performance-based plans, and current Iowa DOT performance targets are available at https://iowadot.gov/systems_planning/planning/federal-performance-management-and-asset-management. Discussion below provides an overview of the various performance-based plans and target-setting processes, and their connection to the investments included in the STIP.

Iowa in Motion 2050 (also known as the statewide long-range transportation plan, or SLRTP) established the following vision for Iowa DOT: "A safe and efficient multimodal transportation system that enables the social and economic well-being of all Iowans, provides enhanced access and mobility for people and freight, and accommodates the unique needs of urban and rural areas in a sustainable manner." The plan has a strong emphasis on stewardship and rightsizing, and identifies four system objectives as key

components for the department to consider in decision-making frameworks:

- **Safety:** The transportation system is safe to use and minimizes incidents, crashes, injuries, and fatalities.
- **Sustainability:** The transportation system is available and in good condition, meeting the needs of today and preparing for the future.
- **Accessibility:** Users can readily access the transportation system and services without unnecessary barriers.
- **Flow:** The transportation system reliably and efficiently moves people and goods while minimizing user delays and costs.

The system objectives have clear ties to the PBPP framework, as progress towards the targets set for FHWA and FTA measures correlates to progress towards achieving the system objectives.

In the overall planning and programming process, the SLRTP, along with the Transportation Asset Management Plan (TAMP), Iowa's Interstate Investment Plan (I3P), and other system and modal plans, plays a role in helping to focus attention and priorities based on system needs, risks, and strategies. These broader planning efforts help guide the planning and project development process that ultimately leads to the specific investments identified in the Five-Year Program for Iowa DOT projects and the four-year STIP that includes all projects that are candidates for federal aid from the FHWA and FTA.

The SLRTP includes analysis of needs/risks and strategies for the various modes of transportation in the state. For highways, this includes ten different analysis layers. This statewide, corridor level analysis is linked to improved performance outcomes, including for the required federal measures, as these analyses help inform the prioritization, programming, and development of projects. The following discussion focuses on the SLRTP analysis layers and other statewide plans that help inform strategies and projects that lead to investments that help make progress in the various performance areas. While the analysis layers and plans are discussed here in relation to the performance area they relate most directly to, strategies and projects often have benefits across multiple performance areas and system objectives.

PM1 – Safety

Three SLRTP analysis layers and associated strategies relate most directly to safety.

- The safety analysis identified locations with the greatest potential for crash reduction (PCR) through a statewide analysis that calculated the PCR by examining the predicted numbers of crashes based on the roadway and traffic environment.
- The bicyclist analysis identified locations considered to be higher risk for bicyclists based on a statewide analysis that developed composite scores for locations by considering several roadway factors related to the likelihood for risks to bicyclists.
- The pedestrian analysis identified locations considered to be higher risk for pedestrians based on a statewide analysis that developed composite scores for locations by considering several roadway factors related to the likelihood for risks to pedestrians.

Safety is explicitly addressed through the Strategic Highway Safety Plan (SHSP), which identifies the types of strategies to implement to help address safety emphasis areas. The 2019 SHSP includes engineering strategies to help address issues with lane departure crashes and to improve intersections. These improvements are being implemented as appropriate throughout the State's highway system. Strategies to help prevent lane departures include the installation of countermeasures such as centerline rumble strips, shoulder/edge line rumble strips, curve delineation, shoulder treatments, and median cable barriers. Strategies to help improve intersections include implementing innovative improvements such as roundabouts, reduced conflict intersections, diverging diamond interchanges, and offset turn lanes; traffic signal modifications; intersection lighting; and bicycle/pedestrian intersection improvements.

Working in partnership with local agencies, investments have been identified and programmed which will construct effective countermeasures to reduce traffic fatalities and serious injuries. Projects chosen for HSIP investment are based on crash history, roadway characteristics, and the existence of an infrastructure countermeasures that can address the types of crashes present. The Iowa DOT continues to utilize a systemic safety improvement

process rather than relying on “hot spot” safety improvements. The HSIP program of projects included in the STIP has been produced based on the strategies contained in the SHSP and the Iowa DOT’s safety performance measure target setting process. The target setting process involved Iowa DOT, the Iowa Department of Public Safety, and MPOs. Safety projects are programmed to help meet the desired program outcomes documented in the SHSP, and to make progress towards PM1 targets.

PM2 – Pavement and bridge condition

Two SLRTP analysis layers and associated strategies relate most directly to pavement and bridge condition.

- The pavement condition analysis identified candidate condition improvement locations by using the Infrastructure Condition Evaluation (ICE) tool, which provides a composite rating based on the most recent infrastructure condition and performance data.
- The bridge condition analysis identified candidate condition improvement locations by using the bridge condition index (BCI), which is calculated based on structural adequacy and safety; serviceability and functional obsolescence; essentiality for public use; and special vulnerabilities.

Iowa DOT’s TAMP describes the way pavements and bridges are managed, including discussion of the life cycle planning processes that are undertaken for pavements and bridges, identification of current and projected performance gaps, prioritization of risks to managing the system and identification of mitigation strategies, and discussion of investment strategies used to determine specific projects. While the TAMP does not identify projects or dictate investment decisions, it helps ensure that the investments in the Five-Year Program and STIP are consistent with Iowa DOT’s longer-term vision by connecting system- and network-level planning to specific project programming. The I3P also helps guide projects on the Interstate system, by identifying investments to maintain the system’s high level of service in terms of safety and overall pavement and bridge condition while addressing identified capacity issues.

Pavement and bridge projects are identified and programmed in the STIP in a manner that is consistent with the strategies identified in

the TAMP and the target-setting process. Pavement and bridge target setting involved internal DOT working group and coordination with MPOs. The target-setting methodology used current and historical condition and funding data to forecast future conditions. Asset management focuses on performing the right treatment at the right time to optimize investments and outcomes. The TAMP discusses the major investment categories that the Commission allocates funding through. Once the Commission approves the funding for these categories, Iowa DOT recommends the allocation of the funds to specific projects using the processes described in the TAMP. The TAMP includes a 10-year forecast of funding for pavement and bridge stewardship projects, and funding amounts in the STIP generally align with this forecast.

The Iowa DOT strives to maintain the bridge inventory in a condition that provides safe and efficient movement of people and freight. Bridges are managed by using a bridge management process with forecasting capabilities to better identify future needs across the entire inventory. The ability to predict bridge needs beyond a short-term time horizon improves the ability to make better decisions today and predict what funding needs are necessary for a stable bridge inventory. Bridge projects are programmed to help meet the desired program outcomes documented in the TAMP, which include making progress towards PM2 targets and maintaining a minimum condition level for the NHS.

The Iowa DOT works to provide a safe, serviceable, and sustainable roadway system through the use of its pavement management system. The pavement management system assists program administrators in the selection of economical options for pavement decisions for the construction, reconstruction, rehabilitation, preservation, and maintenance of pavements. The pavement management system is used to model and predict future pavement conditions based on various funding levels. This analysis helps determine the level of funding necessary to maintain the pavement system in a state of good repair. Pavement projects are programmed to help meet the desired program outcomes documented in the TAMP, which include making progress towards PM2 targets and maintaining a minimum condition level for the Interstate system.

PM3 – System reliability and freight movement

Five SLRTP analysis layers and associated strategies relate most directly to system reliability and freight movement.

- The bottleneck analysis identified candidate bottleneck improvement locations through a system screening that used traffic speed data to identify segments categorized as bottlenecks due to recurring traffic slow-downs.
- The Super-2 analysis identified candidate statewide corridors where Super-2 improvements would enhance operations and complement the state’s multilane highway network.
- The capacity analysis identified candidate capacity improvement locations through analysis of volume-to-capacity (V/C) conditions based on the statewide travel demand model, MPO travel demand models, and traffic forecasts completed for studies and projects.
- The operations analysis identified corridors considered to be higher risk from an operations perspective by using the Infrastructure Condition Evaluation for Operations (ICE-OPS) tool, which is a system screening tool that quantifies the relative risk to the safe and reliable operation of the system.
- The flood resiliency analysis identified corridors vulnerable to a 100-year flood event by using a resiliency metric that includes robustness, redundancy, and criticality components.

For the Interstate system specifically, the I3P identifies what portions of that system may require capacity improvements and helps guide the management of that system. There are two other statewide planning efforts that relate specifically to system reliability and freight movement and help identify strategies and projects to improve these items. These include the Transportation Systems Management and Operations (TSMO) planning framework and the State Freight Plan (SFP).

System reliability can be enhanced through TSMO planning efforts, which have increased significantly over the past decade. The aim of TSMO is to proactively manage the performance of the state’s transportation system, particularly by managing or mitigating congestion and incidents. Iowa DOT’s TSMO Plan, individual Service Layer Plans, and regional studies for Integrated Corridor Management have included projects and activities that will continue

to advance the use of TSMO strategies in the state and improve operations of the highway system.

Freight movements for all modes are addressed in the SFP, which includes a detailed analysis and prioritization of freight bottlenecks, a freight improvement plan, and a freight investment plan. Bottlenecks are locations that should be considered for further study and possibly for future improvements. A detailed analysis was performed to prioritize the bottlenecks based on their value to the overall system, traffic and infrastructure condition, and travel time performance. State projects identified in the freight investment plan and programmed in the STIP are highly-ranked freight bottlenecks.

The SFP also identifies several strategies that help direct investments made in the STIP. These include:

- Target investment to address mobility issues that impact freight movements.
- Target investment in the Iowa Multimodal Freight Network (IMFN) at a level that reflects the importance of this system for moving freight.
- Right-size the highway system and apply cost-effective solutions to locations with existing and anticipated issues.
- Enhance planning and asset management practices for the IMFN by utilizing designs and treatments that are compatible with significant freight movements.

System reliability and freight target-setting involved an internal DOT working group and coordination with MPOs. The target-setting methodology used current and historical data on condition and funding to forecast future condition. Operations-related improvements are programmed to help meet the desired outcomes documented in the SLRTP, I3P, SFP, and TSMO-related plans, and to continue making progress towards PM3 targets.

Related to asset management and system resilience, 23 CFR Part 667 requires a periodic evaluation of public roads that have been impacted two or more times since 1997 by a natural or man-made disaster resulting in an emergency or disaster declared by the Governor or the President and had permanent repairs completed using Federal funds. Any such locations that are targeted for

projects to be completed with Federal funds would need to consider reasonable alternatives that could:

- 1) Reduce the need for Federal funds to be expended on emergency repair and reconstruction activities;
- 2) Better protect public safety and health and the human and natural environment; and
- 3) Meet transportation needs as described in the relevant and applicable Federal, State, local, and tribal plans and programs.

Iowa DOT completed this evaluation in November 2020 and identified six state-owned locations and two locally-owned locations that appear to meet the review requirements. With the identification of these eight locations, Iowa DOT will continue to utilize its Project Prioritization and Scoping tool to review these locations in the event a project is being developed within one of the eight identified areas. Iowa DOT will also work with the local asset owners to further review these locations and ensure compliance with the regulations in the event of a project in an identified area. Iowa DOT will continue to monitor all identified damage locations for future ER events and communicate within the department and with other system owners whenever new locations are found to meet the requirements set forth in regulation.

The culmination of the DOT efforts outlined above is the approval of the DOT Five-Year Program. This document, approved by the Iowa Transportation Commission, incorporates a five-year plan for transportation investments on the highway system and includes various other modal programs. The current Iowa DOT Five-Year Program can be found at:

https://iowadot.gov/program_management/Five-Year-Program

Local Sponsor Programming Processes

Projects included in the STIP, but not located on the primary system, are identified and programmed through Iowa's regional transportation planning process. In February 2018, Iowa's Transportation Commission approved a Federal Aid Swap policy that allows certain locally sponsored projects to swap targeted federal aid dollars for state Primary Road Fund (PRF) dollars. That

policy was revised by the Commission in July 2022 to reflect changes made in the new IIJA transportation bill. Specifically, the Federal Aid Swap policy now applies to STBG and HSIP funding targeted to locally sponsored projects under certain guidelines. Swap funded projects have been included in the STIP document to provide a comprehensive listing of transportation improvements funded through the state of Iowa's federal aid apportionments and PRF dollars.

Iowa's 18 RPAs and 9 MPOs annually receive targets of federal STBG funding for which they are responsible for programming. These organizations provide input to the STIP by conducting regional transportation planning efforts including project selection for targeted STBG/Swap funding. Projects identified by each agency are local priorities and are consistent with each agency's long-range transportation plan.

In addition to the STBG/Swap funded projects noted above, the STIP also includes county and city bridge projects funded with federal aid and Swap funding. Swap funds are targeted directly to Iowa's 99 counties for investment in secondary road bridge infrastructure. The Iowa DOT also administers a city bridge program which makes Swap funding available for investment in municipal bridge projects although changes are being implemented in January/February 2023 to limit the amount of Swap funding that will be available for these projects. City and county bridge projects funded with FHWA or Swap funding are included in MPO and RPA TIPs and carried forward to the STIP.

A number of additional grant programs are administered by the Iowa DOT which target FHWA and Swap funding to locally sponsored projects. Funding available to local sponsors includes STBG for TAP type projects, CMAQ, NHFP, HSIP, Recreational Trails, and Swap. The projects selected for funding as part of these grant programs are programmed in MPO and RPA TIPs and included in the STIP.

Federal Transit Administration Programming Process

In addition to the FHWA program of projects outlined above, the draft STIP includes all projects for which Federal Transit Administration (FTA) funding may be utilized. The transit portion of the STIP was developed by Iowa's MPOs and RPAs in cooperation with the state's large urban, small urban, and regional transit systems.

Public transit capital projects included in the STIP align with the transit asset management (TAM) planning and target setting processes undertaken by the Iowa DOT, transit agencies, and MPOs. The Iowa DOT establishes a group TAM plan and group targets for all small urban and rural providers while large urban providers establish their own TAM plans and targets. Investments are made in alignment with TAM plans with the intent of keeping the state's public transit vehicles and facilities in a state of good repair and meeting transit asset management targets. The Iowa DOT allocates funding for transit rollingstock in accordance with the Public Transit Management System process. In addition, the Iowa DOT awards public transit infrastructure grants in accordance with the project priorities established in Iowa Code chapter 924. Additional state and federal funding sources that can be used by transit agencies for vehicle and facility improvements are outlined in the funding chapter of the Transit Manager's Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

Public transit projects included in the STIP align with the transit safety planning and target setting processes undertaken by the transit agencies and MPOs. While the Iowa DOT provided assistance with the development of initial Public Transportation Agency Safety Plans (PTASPs), each large urban transit provider is responsible for implementing its PTASP, which includes transit safety targets. Investments are made in alignment with PTASPs with the intent of keeping the state's public transit operations, vehicles, and facilities safe and meeting transit safety targets. State and federal funding sources that can be used by transit agencies for operations, vehicles, and facility improvements are outlined in the funding chapter of the Transit Manager's Handbook. Individual transit agencies determine

the use of these sources for capital and operating expenses based on their local needs.

Financial Analysis

The STIP identifies federal aid candidates for roadway, transit, and alternative investments for four federal fiscal years. The amount of FHWA funding considered available for the various apportionment (formula) categories are based on projected apportionments for the upcoming four-year period. For the purpose of fiscally constraining the STIP, FFY 2023-2026 federal aid apportionments have been based on FHWA notification of IJA apportionments to Iowa. Some projects identified for funding from demonstration or other allocation (nonformula) programs are also included in the STIP. These other categories of funds have been programmed within amounts expected to be available from nonformula sources in the year programmed.

The table on page 9 shows proposed FHWA funding by appropriation code and year. Although the programmed amounts may exceed annual apportionments funds carried over from earlier years cover any annual deficits. The table also details estimated advance construction (AC) candidate projects and AC conversions. Additional information regarding the Iowa DOT's use of the AC provision is provided later in the Financial Analysis section of the STIP. The programmed amounts shown in the fiscal constraint table express project costs in year of expenditure (YOE) dollars. The costs were adjusted to account for inflation by individual project sponsors.

The AC provision is an important aspect of Iowa DOT's cash flow management process that cannot be used effectively without the ability to authorize federal aid candidates and costs that exceed the baseline annual federal aid apportionments. The Iowa DOT maintains a "backlog" of AC projects to optimize federal aid as it relates to DOT funding strategies and revenue streams. This is done so the department can accomplish full recovery of obligation authority at an accelerated rate by converting AC projects against new apportionments for work substantially completed, and accomplishing new projects under the AC umbrella. Furthermore, the use of the AC provision offers the department additional security

in ensure all federal aid obligation limitation will be obligated in the FFY it becomes available.

The State of Iowa plans to continue this strategy by requesting authorization of many of the federal aid projects identified in the STIP as AC candidates and converting previous AC candidates for reimbursement on completed contracts. A listing of authorized AC candidates is maintained by the FHWA and the Iowa DOT and is included in the appendix.

Although federal funds do provide a portion of the funding available for the highway construction program they are not the largest funding component for the Iowa DOT. Federal aid funds are an even smaller portion of local governments’ transportation budgets in Iowa. The table on page 10 demonstrates total nonfederal aid revenues estimated to be available for transportation investments within the four-year STIP period. In addition, the STIP includes information illustrating estimated operations and maintenance costs associated with management of the federal aid system. These amounts are shown on page 11. A comparison of the two tables demonstrates that state and local governments have sufficient nonfederal aid revenues available to cover the estimated cost of maintaining and operating the federal aid system. Furthermore, the state and local transportation revenues documented on page 10 demonstrate that the Iowa DOT and local project sponsors of federal aid projects have sufficient local funding to meet federal aid matching requirements.

The transit program identified in the STIP reflects the majority of transit activities in the state of Iowa. The amount available for FTA programs is based on expected allocations that will not be determined until after FFY 2023 has begun. Projected revenues used for programming (shown in the following table) are based on recent experience. Unlike FHWA programs, whereby the Iowa DOT is sponsor for a significant portion of the proposed expenditures, sponsors for transit activities are local governments and/or the service providers. Although some state funds are distributed to support transit activities, administration of the various programs occurs at the local level. Because costs related to transit capital and operating costs are relatively stable, it is unlikely reduced funding levels can be offset by any potential reductions in project costs. If available funds are less than projected, projects will be deferred or

additional nonfederal shares will become the responsibility of the local sponsors. If funding is available beyond levels identified, additional expenditures may be rescheduled from the 2022 proposals. As during previous programming periods, a revised program will be submitted to the FTA if actual allocations differ significantly from current estimates.

2023-2026 Statewide Transportation Improvement Program
Estimated Program Summary (x \$1,000)

Name	Funding Source	FY23	FY24	FY25	FY26
Metropolitan Planning Program	5303	\$157	\$157	\$157	\$157
Statewide Planning Program	5304	\$55	\$57	\$57	\$89
Urbanized Area Formula Assistance Program	5307	\$34,179	\$24,017	\$23,503	\$22,117
New Fixed Guideway Capital Program	5309	\$0	\$0	\$0	\$20,000
Seniors and Persons with Disabilities Program	5310	\$3,980	\$3,065	\$3,143	\$2,053
Nonurbanized Area Formula Assistance Program	5311	\$19,782	\$9,486	\$9,577	\$8,876
Bus and Bus Facilities Program	5339	\$132,356	\$18,462	\$10,301	\$12,589
American Rescue Plan	ARPA	\$14	\$0	\$0	\$0
Coronavirus Aid, Relief, and Economic Security	CARES	\$250	\$0	\$0	\$0
Coronavirus Response and Relief Supplemental Appropriations	CRRSAA	\$13	\$0	\$0	\$0
Iowa’s Clean Air Attainment Program	ICAAP	\$626	\$504	\$877	\$0
Public Transit Infrastructure Grant Program (PTIG)	PTIG	\$6,750	\$3,360	\$80	\$0
State Transit Assistance (STA)	STA	\$16,329	\$10,751	\$10,736	\$9,793
Surface Transportation Block Grant Program	STBG	\$4,834	\$2,477	\$1,300	\$2,491

The above information, when considered with the financial information contained on page 9, demonstrates that the 2023-2026 Iowa STIP is fiscally constrained given currently programmed federal aid amounts, estimated AC conversions, balances of contract authority, and estimated apportionments through FFY 2026.

Public Participation

Iowa's public involvement procedures for federal aid candidates and other investments encourage public participation in development of transportation policy and project selection. Development of the state's transportation policy is the responsibility of the Iowa Transportation Commission, a citizen board appointed by the governor. Development of the state's Five-Year Program is subject to the review and approval of the Iowa Transportation Commission. Public meetings provide opportunities for public input directly to the Iowa Transportation Commission on, at a minimum, a monthly basis. Iowa Transportation Commission meetings are periodically held in locations outside the Iowa DOT's central complex to solicit input concerning its programming decisions. The department also maintains planning, field services coordination, and local systems staff at district offices to facilitate public involvement on a daily basis.

As noted earlier, the Iowa DOT develops projects based on an overall investment strategy consistent with the state's long-range plan. Some programs are intended to address specific aspects of the transportation systems, like highway safety or rail crossing signalization. Many projects and programs are developed to address transportation needs within an investment strategy that focuses portions of available funds toward economic development, maintenance and repairs, or system improvements. Many aspects of the programs, such as the railroad crossing improvements, clean air efforts, some bridge replacements, and highway safety have specific selection/ranking processes that have been adopted by the Iowa DOT to guide commitments of funds. Safety is always a foremost consideration.

The approximately 114,000 miles of public roads in Iowa are managed by various government agencies. The Iowa DOT holds jurisdiction over those portions of the system designated the Primary Road System (approximately 9,000 miles), which includes interstates. Other rural roadways are the responsibility of the county governments (approximately 90,000 miles). Cities and towns generally retain jurisdiction over roadways within their corporate limits (approximately 14,000 miles). Roadways on federal properties are under jurisdiction of the respective federal agencies, just as those

at state-owned facilities are under the jurisdiction of the various state agencies. Similarly, transit programs are administered by governmental agencies, generally on a city or regional basis.

Selection of projects funded by the FHWA and FTA occur at several levels, all subject to public participation requirements. Local programs are coordinated by MPOs in cities with populations greater than 50,000, and by similar organizations representing the "rural" areas called RPAs. In most situations, projects are initiated by sponsors within the MPO/RPA that are directly responsible for revenues required to match federal aid, providing future maintenance and other support, and accomplishing activities that are not selected for federal aid participation. Maps showing locations of the MPOs and RPAs, transit systems, and Iowa DOT district planners are provided in this document.

Cities, counties, transit services, and interested individuals assist MPOs and RPAs in developing local improvement programs and transportation services. Each planning organization held public forums to consider FHWA and FTA investments within their areas for the years 2023 through 2026. Written comments and emails could also be submitted. Each group considered proposed expenditures and developed priorities for their area. All are also encouraged to review proposals for improvements on the state system and may propose modifications to programmed projects or identify candidates for future consideration. Subsequently, each MPO and RPA generated a draft TIP, held public meetings to record comments concerning the proposed program, and submitted the final TIP to the Iowa DOT for integration into the draft STIP.

The Iowa DOT has also implemented public involvement procedures specific to the STIP. After compiling information contained in the Five-Year Program and MPO/RPA TIPs, an electronic copy of the draft STIP was distributed for public review through placement on the Iowa DOT's website. Additionally, an Iowa DOT news release was distributed notifying media and the public of the STIP availability. Finally, a special meeting to solicit public input concerning the draft STIP from a statewide perspective was held virtually on August 16, 2022.

All comments received by the Iowa DOT from STIP or other public participation activities that relate to state-level programming are provided to the Iowa Transportation Commission for consideration during development of the next Iowa TIP. A compilation of all public comments concerning the Iowa DOT's program will be available during review of the proposed TIP. Comments regarding projects generated at the local level will be used by the respective MPOs and RPAs during development of future TIPs.

Changing an Approved STIP

Revisions are defined as changes to a TIP/STIP that occur between scheduled annual updates. There are two types of changes that occur under the umbrella of revision. The first is a major revision or "amendment." The second is a minor revision or "administrative modification." The Iowa DOT requires that each MPO or RPA adopt these definitions and thresholds, at a minimum, when determining an amendment vs. an administrative modification.

Amendment

An amendment is a revision that involves a major change to a project included in the TIP/STIP. This includes an addition or deletion of a project, a major change in the amount of programmed federal aid, or a major change in design concept or scope such as a changing of project termini.

Administrative Modification

A minor revision to a TIP or STIP is an administrative modification. It includes minor changes or project phase costs, minor changes to funding sources of previously included projects, and minor changes to project or project phase initiation dates.

Amendment vs. Administrative Modification

There are four main components that can be used to determine whether a project change constitutes an amendment or an administrative modification. They include the following.

Project costs: Determination will be made based on the percentage change or dollar amount of change in federal aid. Projects in which the federal aid has been increased by more than 30 percent or total federal aid increases by \$2 million or more will require an amendment. Anything less can be processed as an administrative modification.

Schedule changes: Changes in schedules to projects that are included in the first four years of the TIP/STIP will be considered administrative modifications. Projects that are added or deleted from the TIP/STIP will be processed as amendments.

Funding sources: Additional federal funding sources to a project will require an amendment. Changes to funding from one source to another will require an administrative modification.

Scope changes: Changing project termini will be processed as an amendment. Other examples of changes that require amendment are changing the type of work from an overlay to reconstruction or changing the number of through lanes.

Procedural Requirements for Revisions

Amendments are considered major revisions and therefore have more procedural requirements. Requirements for approving an amendment to the STIP include an opportunity for public input, policy board approval of locally sponsored project amendments, and a redemonstration of fiscal constraint of the STIP. Public involvement for all locally sponsored project amendments will occur at the MPO and RPA level.

Statewide public review for Iowa DOT project amendments takes place prior to approval of the amendment in the STIP. Iowa DOT sponsored projects within an MPO must go through the MPO's adopted amendment process, which includes public review and approval by the appropriate boards and committees. When possible, Iowa DOT amendments within an RPA also go through the RPA's adopted amendment process. However, this is not required, and in

some instances Iowa DOT amendments in RPAs are approved based solely on the statewide public review performed by the Iowa DOT.

Administrative modifications have simplified procedures that allow more flexibility in the processing of changes. Each RPA and MPO is allowed to approve administrative modifications by seeking board approval or the planning agency may make minor changes administratively if the process to do so has been documented and approved by the appropriate technical and policy boards. Redemonstration of STIP fiscal constraint may be necessary for certain administrative modifications.

Fiscal Constraint – Revisions

In order to maintain fiscal constraint of the STIP document most revisions to the STIP that add a new project or increases a project's federal aid amount will require that a corresponding change be made to another programming entry to ensure that the STIP remains fiscally constrained. This requirement pertains to both administrative modifications and amendments to the STIP and is the responsibility of local project sponsors and local planning agencies for locally administered federal aid projects.

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

MPO 22 / AAMPO

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

MPO 23 / CMPO

2023 Transportation Improvement Program

Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

Dubuque Metro Area Transportation Study

7600 Commerce Park, Dubuque, IA 52002
www.eciatrans.org

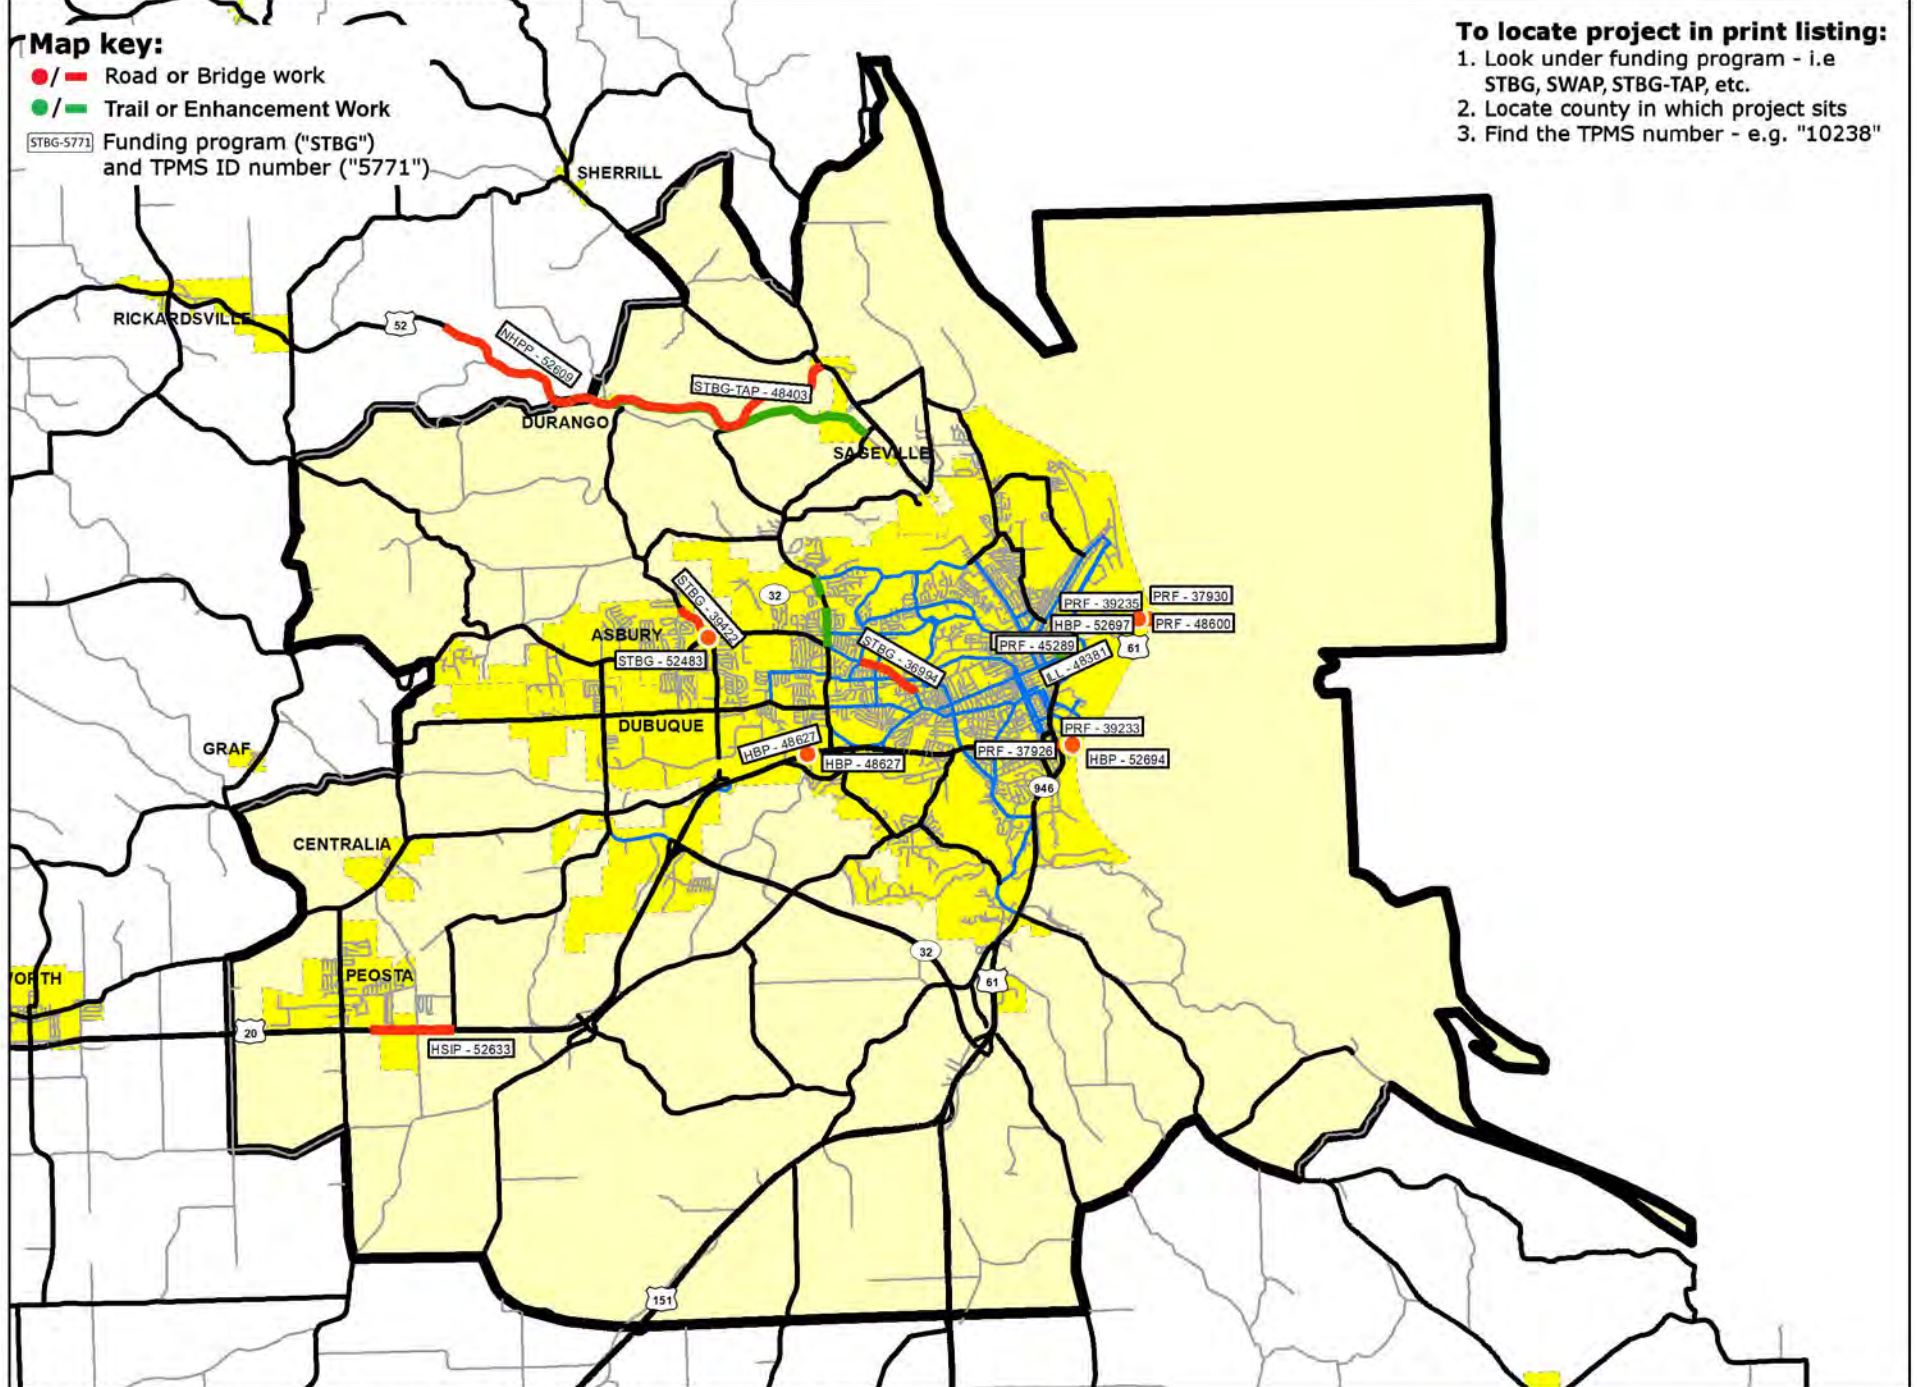

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

MPO 27 / DMATS

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA 2

www.simpco.org

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

www.region6resources.org

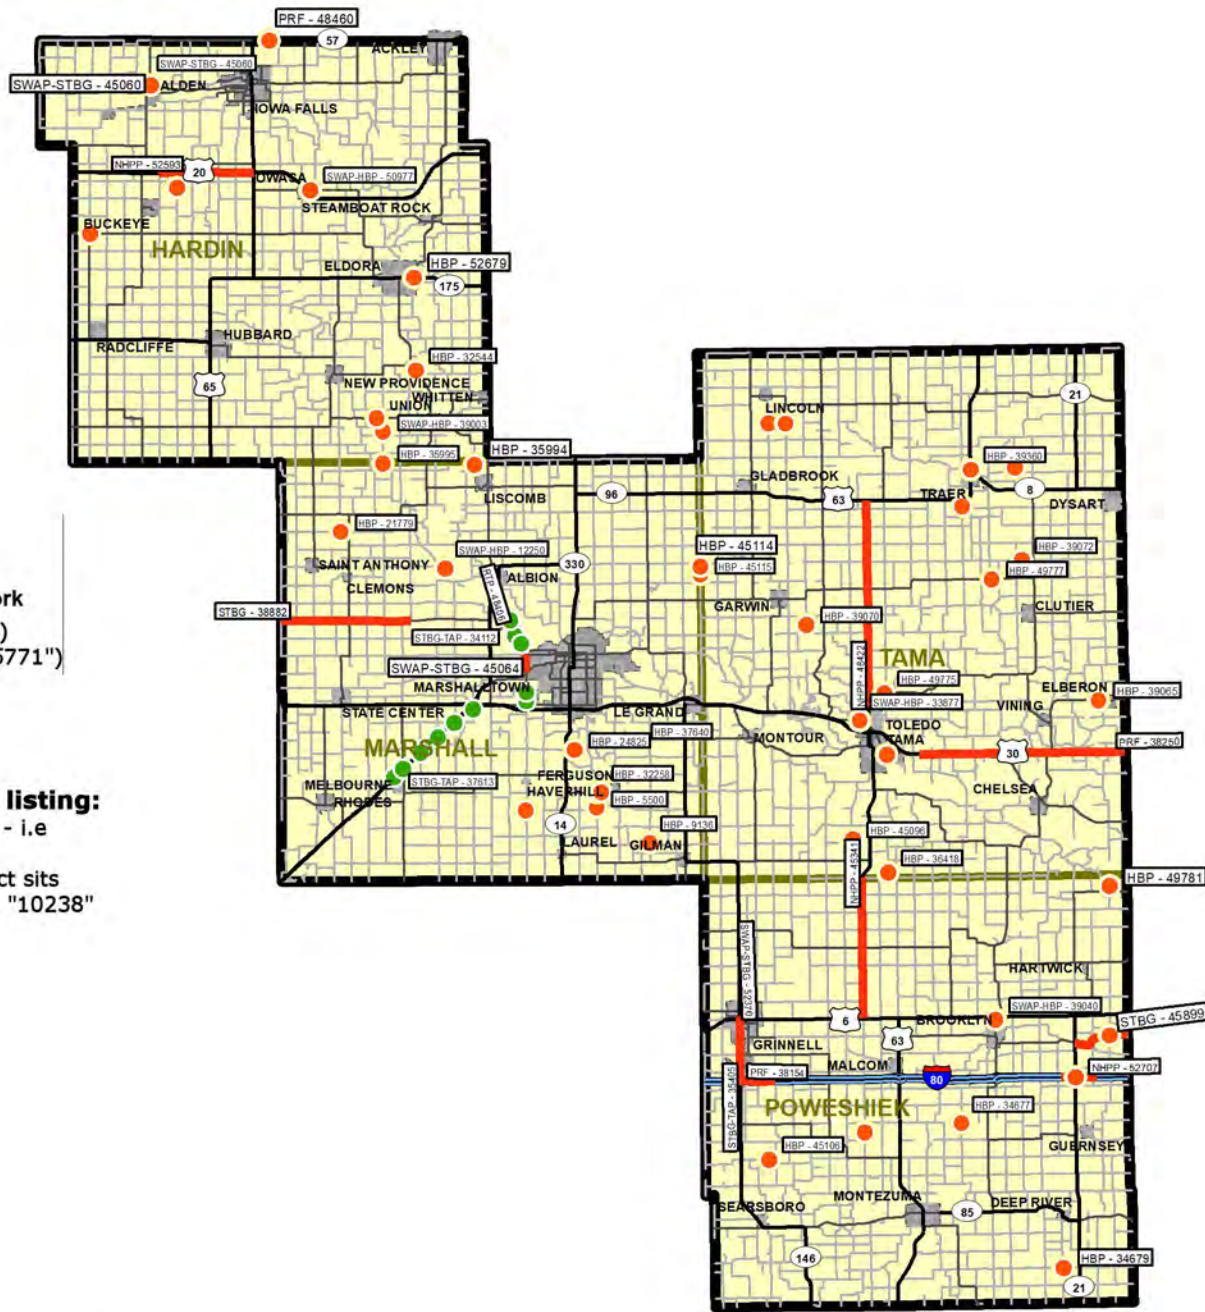

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA 8 - East Central Intergovernmental Association
7600 Commerce Park, Dubuque, IA 52002
www.eciatrans.org

Through the efforts of the East Central Intergovernmental Association, the Dubuque Metropolitan Area Transportation Study (DMATS) is being conducted to study the transportation needs of the Dubuque Metropolitan Area and to develop a transportation plan for the area.

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA 8

2023 Transportation Improvement Program

Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA 13

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA 17 - Chariton Valley Planning and Development
308 North 12th Street, Centerville, IA 52544
www.charitonvalleyplanning.com

2023 Transportation Improvement Program

Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA 17

www.mapacog.org

2023 Transportation Improvement Program

Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"
