

Peach

Peaches are about the size of a baseball. Their skin color is yellow or cream, sometimes blushed with red depending on the variety. The skin is slightly fuzzy. The flesh inside is usually yellow, but depending on the variety may also be white. An oval pit in the center needs to be removed before eating.

Peaches are fruit which grow on trees.

Peaches originally came from China and have been grown for thousands of years.

In the early 1600's, Spanish explorers brought the peach to the new world.

In the United States, most peaches are grown in California and the southern states. Georgia is known as the "Peach State." Peaches are available almost all year.

VARIETIES

There are two main types of varieties:

- Freestone the flesh does not stick to the pit, so it is easy to remove the pit by hand. These varieties are usually sold fresh.
- Clingstone the flesh "clings" or sticks to the pit. These varieties are usually used for canning.

Nectarines are a type of peach which have smooth skin without fuzz.

- Fat free
- Cholesterol free
- Sodium free
- Good source of vitamin A
- Good source of vitamin C

you can buy peaches fresh, canned or frozen. Peaches are usually enjoyed raw. Fresh peaches are a great snack. Add peaches to cereal, smoothies and fruit salads. Peaches can also be baked or grilled.

Some peaches are grown in Iowa.

Funded in part by USDA's Supplemental Nutrition Assistance Program in cooperation with the lowa departments of Public Health and Human Services, equal opportunity providers and employers. The lowa Food Assistance Program can help you buy nutritious food for a healthy diet. To find out more, visit www.yesfood.iowa.gov.
