INTRODUCTION

The information shown in this abstract was collected in the "Skills of the Workforce Study." The study was conducted in Black Hawk County, Iowa during the summer of 1958. The data contained here are the basic material from which all subsequent reports will be constructed.

In Table I, **Firms and Workforce Classified by Industrial Groups**, the number of firms interviewed during the survey is shown. The firms have been combined into industrial groups according to the firms' major industrial activity. The industrial groups used in this report are based on the new Standard Industrial Classification codes, introduced in 1957 by the Bureau of the Budget.

The workforce figures shown in this table include both full and part-time employees. In all subsequent tables in this abstract, only full time employees will be shown.

Persons interested in the number of workers by broad occupational groups in the several industrial categories in the Waterloo area will find such data presented in Table II, **Occupational Groups by Industrial Classification**. This table lists the employed workforce of Black Hawk County by the industrial activity in which the workforce is employed. The age break-outs used in this tabulation are in accordance with those used by the Bureau of the Census. Only that part of the workforce which is employed on a full-time basis is included in this tabulation.

All the occupations in Black Hawk County, the total number of people employed, and the number of female employees in each of the occupations will be found in Table III, **Workforce Classified by Occupation and Occupational Groups**. The occupational titles listed in this tabulation are based on Dictionary of Occupational Titles, Second Edition, published in 1949. The job titles in this tabulation are listed in groups according to code numbers assigned each title in the Dictionary of Occupational Titles. The occupations are arranged into major groups, divisions, and subdivisions, each set apart by an appropriate heading and code range to indicate the scope of the group or division. Only that part of the workforce which is employed on a full-time basis is included in this tabulation.

MAJOR OCCUPATIONAL GROUPS AND DIVISIONS

Definitions and Code Groups

Professional Occupations (0-00.00 through 0-39.99)

This group includes occupations that predominantly require a high degree of mental activity by the worker and are concerned with theoretical or practical aspects of complex fields of human endeavor. Such occupations require for the proper performance of the work either extensive and comprehensive academic study, or experience of such scope and character as to provide an equivalent background, or a combination of such education and experience.

Typical professional occupations are those of doctor, lawyer, architect, mechanical engineer, chemist, physicist, editor, actor, and musician.

Semi-Professional Occupations (0-40.00 through 0-69.99)

Occupations concerned with the theoretical or practical aspects of fields of endeavor that require rather extensive education or practical experience, or a combination of such education and experience for the proper performance of the work; such fields of endeavor, however, are less demanding with respect to background or the need for initiative or judgment in dealing with complicated work situations than those fields which are considered as "professional". These occupations are typically confined to relatively restricted fields of activity, many of them being concerned with the technical or mechanical details of the broader and possibly more theoretical fields of endeavor.

Chiropodists, production planners, draftsmen, aviators, laboratory technicians, and commercial artists are typical semi-professional occupations.

Managerial and Official Occupations (0-70.00 through 0-99.99)

Occupations that are involved primarily with responsible policy-making, planning, supervising, coordinating, or guiding the work-activity of others, usually through intermediate supervisors. Typical of these occupations are managers or presidents of business enterprises, superintendents of construction projects, and purchasing and advertising agents. Executive secretaries and treasurers, although not usually involved in extensive administrative or managerial duties, are nevertheless included because of their official capacities.

Clerical and Kindred Occupations (1-00.00 through 1-49.99)

Occupations concerned with the preparation, transcribing, transferring, systemizing, or preserving of written communications and records in offices, shops, and other places of work where such functions are performed; other occupations, such as collectors, telegraph messengers, and mail carriers, although not strictly of this character are included because of their close relationship to these activities.

Sales and Kindred Occupations (1-50.00 through 1-99.99)

Included in this group are occupations concerned with the sale of commodities, investments, real estate, and services, and occupations that are very closely identified with sales transactions even though they do not involve actual participation in such transactions.

Typical sales occupations included are salesmen and hucksters. Occupations that are closely identified with sales transactions are demonstrators and shoppers.

Personal Service Occupations (2-00.00 through 2-59.99)

Occupations concerned with performing services for persons that require predominantly either direct contact or close association with the individual. Typical examples are barbers, waiters, and practical nurses.

Protective and Building Service Workers (2-60.00 through 2-69.99)

Occupations in this group are those specifically concerned with the protection or guarding of the country or its political units, of buildings and other property, and of individuals.

Agricultural and Kindred (3-00.00 through 3-49.99)

Occupations included in this group are only those located in the City of Waterloo. No attempt was made to list any farmers or farm hands in this survey. Florists, landscape gardeners, agricultural aids and tree trimmers are typical agricultural occupations.

Skilled Occupations (4-00.000 through 5.99.999)

This group includes craft and manual occupations that require predominantly a thorough and comprehensive knowledge of processes involved in the work, the exercise of considerable independent judgment, usually a high degree of manual dexterity, and, in some instances, extensive responsibility for valuable products or equipment. Workers in these occupations usually become qualified by serving an apprenticeship or completing extensive training periods.

Skilled Occupations in Manufacturing and Related—(4-01.000 through 5-18.999)

Skilled Occupations in Non-manufacturing—(5-20.000 through 5-61.999)

Miscellaneous (skilled) Occupations—(5-63.000 through 5-89.999)

Foremen—(5.91.000 through 5-99.999)

TABLE I
FIRMS AND WORKFORCE CLASSIFIED BY INDUSTRIAL GROUPS ¹

| Industrial Groups | No. of Firms Interviewed | Total No. of Employees | Total No. of Female Emp. |
