ANNUAL REVISION OF STATE PLAN

A. DESIGNATION OF STATE AGENCY

1. Give the name of the State Agency which is responsible for administering the State Plan.

IOWA STATE DEPARTMENT OF HEALTH

2. Has the organization of the State Agency been changed since the existing State plan was approved?

Yes  No

(If "yes", attach a chart (identify as Exhibit A) which shows the organization of the State Agency and the relationship of the unit which is immediately responsible for administering the state plan to the other units of the state agency).

B. AUTHORITY OF THE STATE AGENCY

Has any change been made in the authority of the State Agency to carry out the provisions of the State Plan?

Yes  No

(If "yes", attach a copy (identify as Exhibit B) of the legislation or Governor's order which accomplished the change.)

C. DESIGNATION OF STATE ADVISORY COUNCIL

Has any change been made in the membership of the State Advisory Council?  
(See Exhibit C)

Yes  No

(If "Yes" attach a statement (identify as Exhibit C) showing the names, present positions, and interests or professions represented by each new member and the names of the members replaced.)

D. DEVELOPMENT OF HOSPITAL CONSTRUCTION PROGRAM

Attach new forms PHS-5 (HF); PHS-7(HF); PHS-10(HF); PHS-11(HF); and PHS-12(HF), (iden. as Exh. D) to replace the existing forms included in the State Plan. If separate facilities are planned for separate population groups in the State, Form PHS-8(HF) shall be resubmitted, if any changes have occurred which require supplementation or revision. Maps submitted with the current approved plan shall be revised and resubmitted if changes have occurred. As a minimum, consider the factors described in the instructions on the reverse side.

E. RELATIVE NEED DETERMINATIONS

Submit a new Form PHS-13(HF) to replace the form approved in the existing State Plan. (Identify as Exhibit E). As a minimum, take into consideration the factors described in the instructions on the reverse side.

F. METHODS OF ADMINISTRATION

Do the methods of administration included in the approved State Plan reflect accurately the current or projected method of administering the State Plan?

Yes  No

(If "No", attach revised or additional pages (identify as Exhibit F) to be included in the State Plan.)

I hereby certify that the above statements and attached statements, charts, maps, and tables are true and correct to the best of my knowledge and belief, and are an accurate presentation of the revised State Plan adopted by the State Agency.

SIGNATURE	TYPE NAME AND TITLE	EFFECTIVE DATE OF REVISION
	Edmund G. Zimmerer, M.D. Commissioner	July 1, 1956

CP-3915

1. Fire Safety Resolution, adopted May 23, 1949

"Resolved that we recommend to the State Department of Health that no hospital, construction of which is now proposed or which may be proposed in the future, be approved for licensure unless fireproof in construction, and further, that in case of fireproof additions to existing non-fireproof hospital buildings, the Department require the elimination of fire hazards in the existing building to the fullest reasonable extent."

2. Bed Need Resolution, adopted July, 10, 1952

"Resolved that the total bed need for each of the hospital categories and the total beds programmed by this Plan for each of the hospital areas or individual hospitals constitute the maximum number of beds which may be built with Federal Grants-in-Aid and do not necessarily represent the accurate and exact hospital bed need for the respective hospital or area."

SUMMARY OF PROGRAM TO DATE

REMARKS	CATEGORIES OF HOSPITALS			
	General	T.B.	Mental	Chronic
Construction of Hospital Beds with assistance in				
1948 - - -	- 253		26	
1949	444			
1950	794			
1951 - - -	- 204	- - -	- 138	
1952	201		33	74

Reclassification of University of Iowa Hospital in terms of usage - -	- (-681)	- - -	- - -	- (+681)
1954	141			58
1955	267		25	177
Total beds built with aid - - -	- 2,462	- 0 -	- 222 -	- 309
Acceptable beds available in 1947	6,689	672	3,113	0
(Adjustment in Tabulation) - - -	- (-681)	(-76)		
Beds built without aid	1,889	--	38	--
Total beds available 1 July 1956 - -	- 10,359 -	- 596 -	- 3,373 -	- 990
Beds proposed to meet Iowa's present needs	2,473		10,077	3,410
Proposed beds set forth in current Iowa Plan	12,832	596	13,450	4,400
Per cent of <u>Unmet Need</u>	19.27	0.00	74.93	77.50

Note: The above data applies also to tabulation of page 119.

## TEACHING FACILITIES

In several categories of specialized hospitals, the need is so great as to make it improbable to expect fulfillment within the next few years. One deterrent in the thinking of communities is that it would be difficult to staff a specialized unit if it did become available in the near future. To compensate for this factor, emphasis is placed on teaching facilities.

A survey was made of all authorized programs for resident and intern training in the doctor group. To emphasize preference in these areas, five pool beds were allotted for each year of postgraduate training authorized.

The results of this survey are summarized by regions as follows:

REGION		Postgraduate Year Authorized	Pool Beds Allocated
Symbol	Center		
C-1	Sioux City	10	50
C-5	Waterloo	6	30
C-7	Cedar Rapids	16	80
C-8	Iowa City	193	965
C-9	Davenport	15	75
C-12	Des Moines	98	490
C-13	Council Bluffs	4	20
State Total		342	1,710

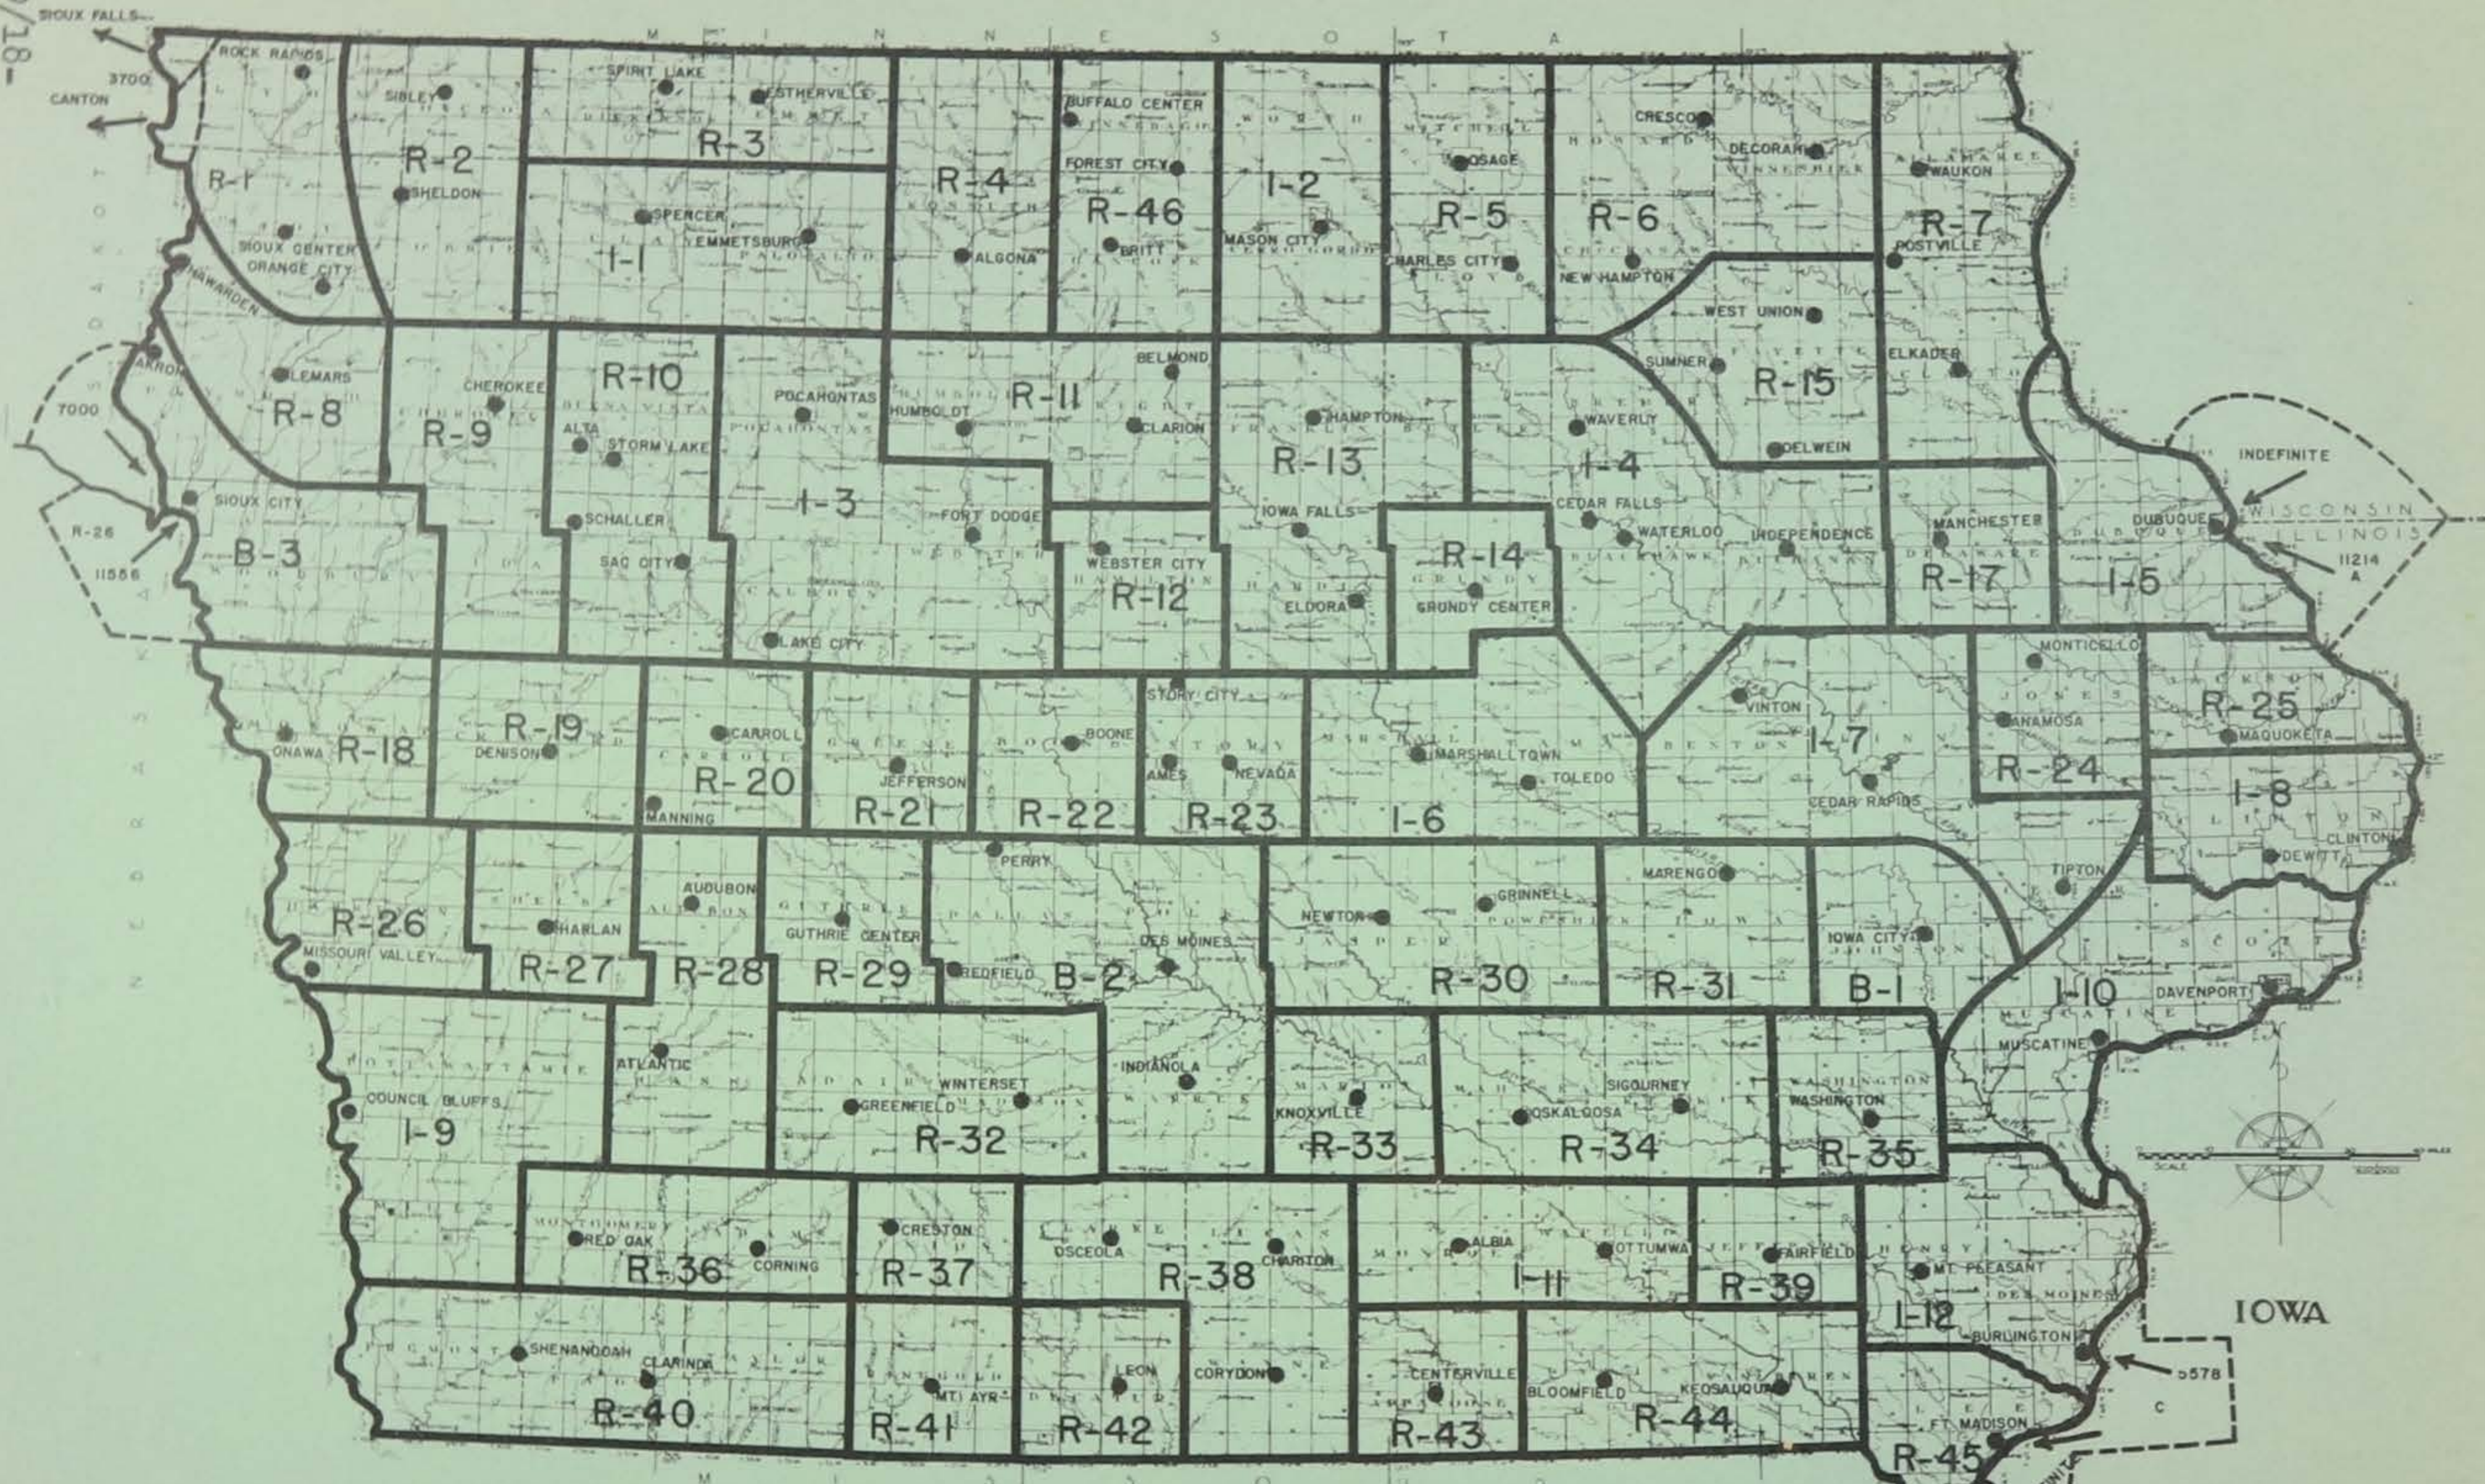

These findings were applied to psychiatric, as well as chronic illness units, and are identified as "teaching" beds hereafter.

## BED INCREASE DUE TO POPULATION INCREASE FACTOR

Previous revisions of the Iowa State Hospital Plan have utilized arbitrary means for reconciling the unique circumstances in our population, its trends, and the affect on hospital utilization patterns. The most notable irregularities are:

(a) The fact that most of the population centers are located on State borders because of the early influences of the Missouri and Mississippi Rivers. These areas continue to reflect hospital demand beyond expectations for their population because of the out of state demand.

(b) Rapid mechanization of the farming industry which, in turn, has reduced population density in most of the agricultural areas (however, it should be noted that the accident of these reduced population groups is accelerating greatly, and, therefore, must be a matter of concern).

(c) The transition in occupations resulting from an aggressive program to attract industries into Iowa. This is appreciably accelerating population increase in many of our population centers.

The result of these several factors is that while hospital services have been increased to the permissible limits determined by prescribed formulae based on population and usage, many communities have never been able to reasonably meet demands for hospital services. For these reasons, an additional element, a population increase factor, has been induced into this planning of the number of allowable hospital beds for Iowa's areas.

Each county was examined individually. The 1950 population data is that of the federal census. the 1955 data is that county determination by the Division of Vital Statistics, this Department, based on birth, death, and migration data ascertained from official reports and experience. The total for the State was compensated directly against all counties to conform with that official estimate by the Bureau of Census which is prescribed by the Federal Agency. The rate of population increase by county was calculated during this five year period and all counties with a rate of increase exceeding the State's over-all increase were deemed qualified for additional consideration. Their population increase, projected on a straight line basis for 20 years, was converted to beds at the rate of 2.5, 4, and 4.5 beds per 1,000, depending on whether the area was an "R", "I", or "Base" area. This increment of beds was added to the current area ratio in arriving at the total of allowable beds.

Areas affected by this factor have been appropriately identified in our bed distribution report.

BASIC DATA							DISTRIBUTION PROGRAM					
AREA AND REGION	CIVILIAN POPULATION	BED ALLOWANCES BASED ON		EXISTING ACCEPTABLE BEDS	DETERMINATION OF POOL BEDS			EXCESS BEDS OVER STATE RATIO	BEDS ALLOCATED TO AREA FROM POOL	TOTAL BEDS ALLOWED UNDER P.L. 725	ADD'L. BEDS TO BE CONSTRUCTED IN AREA	PERCENT OF NEED MET
		STATE RATIO	AREA RATIO		TOTAL	IN AREA	CREDIT TO STATE POOL					
(a)	3,700 residents of region "A", Area R-1, (Rock Rapids Vicinity) conceded to out-of-state facilities, and the equivalent beds are utilized in region "I" (Burlington/Fort Madison)											
(b)	Indefineable elements have entered into the Plan pattern since the earliest presentations. VA installations have available influence; University Hospitals are being evaluated by current criteria; unique geographic circumstances continue. Therefore, in keeping with previous revisions, the alternate determinations are established for items 17, 18, and 19.											
(c)	Indicates areas with population increase rate higher than total State rate of increase and to which population increase factor applies.											
(d)	R-3, a resort area, and specifically Dickinson County, contends with an abnormal summer population (100 to 200% over normal) and an alarming accident rate.

Proposed Totals Recognize Existing patients. However, proposed facility (E) is for first Admissions to intensive treatment and not to absorb existing overload from other institutions.

## PART V HOSPITALS FOR CHRONICALLY ILL AND IMPAIRED

The term chronic illness has in the past been recognized by authorities in rather general terms. However, the transition in age group trends of our country is rapidly bringing a crucial problem into sharp focus. Because our more productive age groups, when expressed in terms of per cent of total population, are shrinking alarmingly, the National Congress and administration have placed great emphasis on stimulating corrective action. The Hill-Burton Program was amended in 1954 to provide additional incentive in this direction. Previous legislation and appropriations permitted grants-in-aid for long term care facilities, but the public was not receptive. There has been an inclination to associate such facilities with the existing quasi-social "commercial homes" and comparable care-and-keep establishments for indigents. The crux of the matter is that many persons with an appreciable life span remaining are indigent because their expended individual resources were not sufficient to complete a pattern of treatment which would have permitted sufficient curative results and return to partial productivity or total self-sufficiency.

Preliminary observations during the course of the program's operation made the possibilities in the field of chronic illness and impairment increasingly evident to both State and Federal Agencies. At this point, chronic illness hospitals are emphasized in both Public Law 725 and 482.

The impact of chronic illness has already been felt in our national economic pattern. The problem in Iowa is even more acute in that we have verged from a "young" state to the union's oldest, in terms of age groups. This aspect is even more serious when we review the trends in the State's economy. Physical impairment is increasing alarmingly, along with older age groups, as a result of increased development and the mechanical revolution of the past few years in agriculture. At this point, accident rates have caused qualified observers to consider farming more hazardous than industrial vocations.

In an effort to program realistically in terms of qualified professional personnel and available economic resources, a plan is set forth to provide specialized chronic illness units in population centers appropriately located geographically and in proportion with population of the regions being served. The pattern is correlated directly with the acute general hospital pattern already existing.

Relative priority for funds under both appropriations is based on degree of rurality and per capita resource, the most rural region with the lowest per capita income being given the greatest preference. Basis for each factor is defined in Exhibit E (Determination of Priority Factors).

Nursing areas in acute general and chronic illness hospital units are very similar. However, a chronic priority cannot be used to build such nursing facilities with the ulterior purpose of ultimately using the finished facility for acute general purposes. The intent of the Congress was to specifically give priority preference to categories of greatest need and did create a means of recourse in the event a finished structure is utilized for purposes other than that implied or intended in the design and construction of the project.

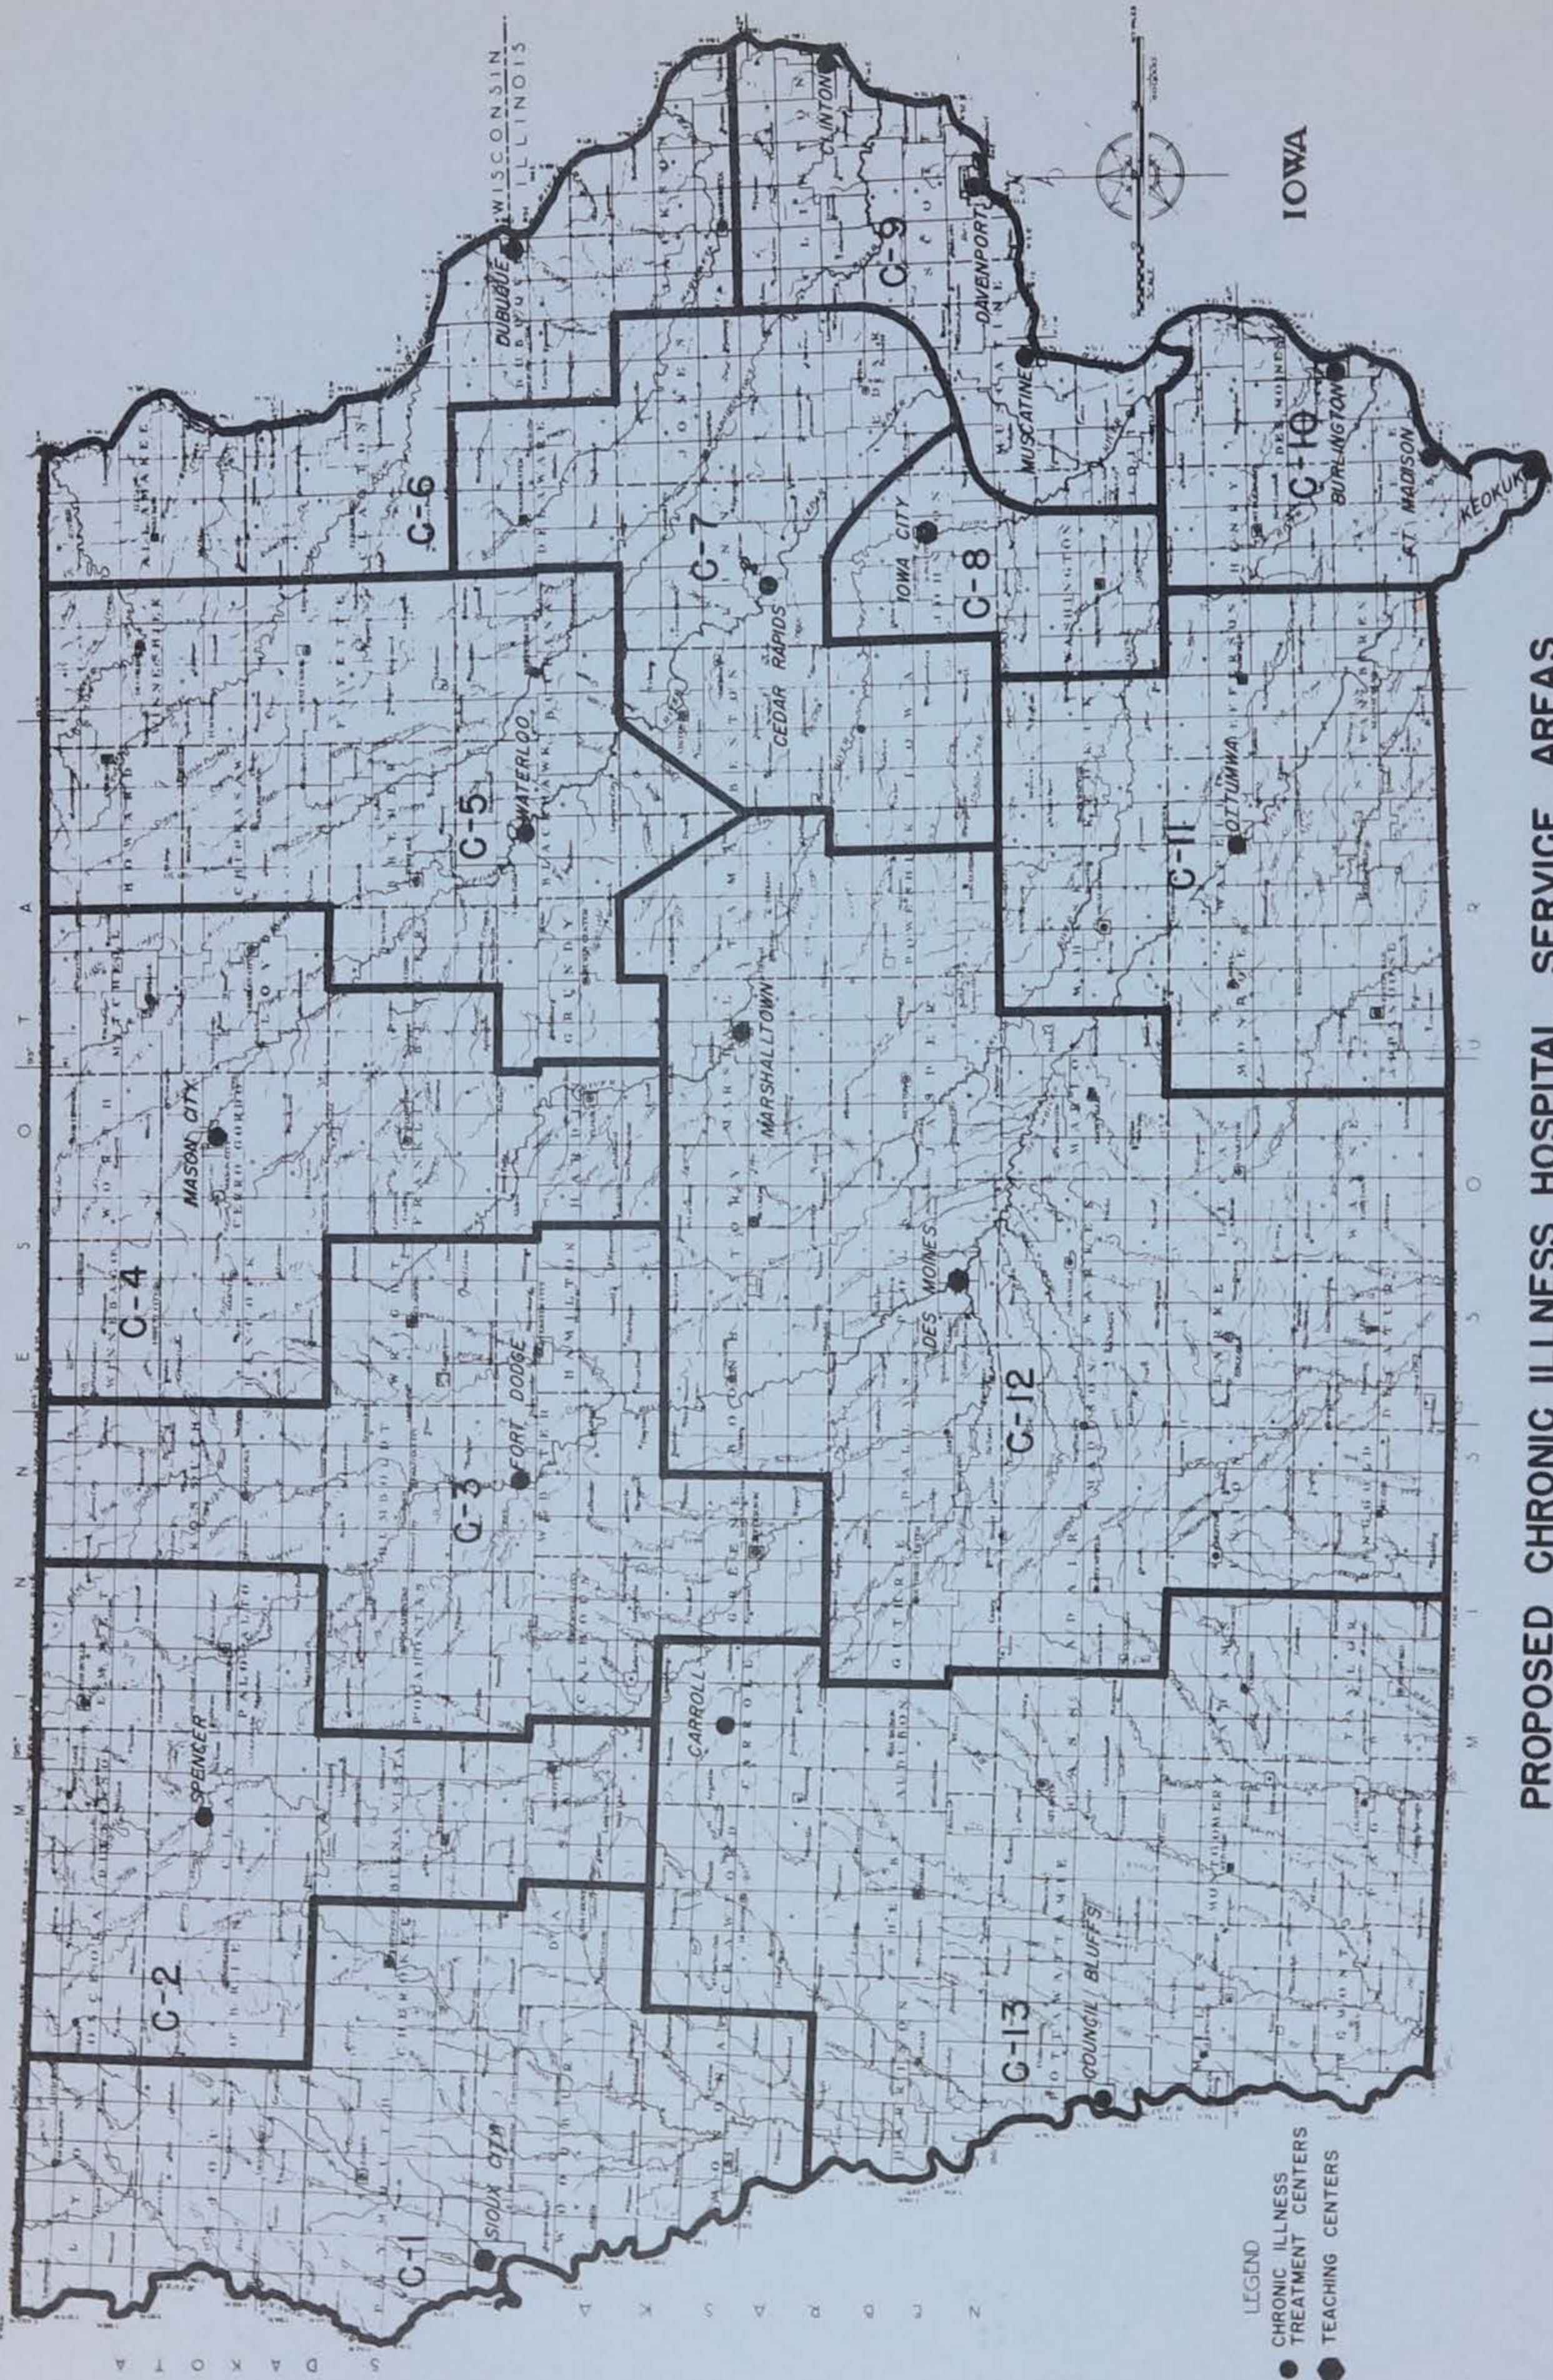

A sponsor's application for a chronic illness project shall be supported by a total narrative program, including description of appropriate nursing area, complete related services realistically contiguous to the activity, staff, and personnel appropriately qualified and available and prospectus of resources for construction and continued operation in the manner set forth as the proposed mission. The Iowa Advisory Council for Hospitals and Related Health Facilities will review and evaluate the application. In the event further questions exist, the sponsor will be invited to elaborate on their presentation, in writing and/or verbally, toward clarification and an ultimate determination.

**Iowa State Medical Library  
HISTORICAL BUILDING  
DES MOINES, IOWA**

We hope you obtain pleasure and profit from the use of the Iowa State Medical Library. You can increase its usefulness by returning your books promptly.

**Borrower.** Adults are entitled to draw books by filling out an application card.

**Number of Volumes.** Students may borrow 3 volumes at a time, which are not renewable.

**Time Kept.** The period of loan is two weeks; older books may be once renewed. New books and Journals are not renewable.

**Forfeiture of Privilege.** Loss of books or journals without paying for same, defacing or mutilating materials, three requests for postage without results, three requests for return of material without results, or necessity of asking Attorney General's aid to have material returned, bars from future loans.

**Transients** and those at hotels may borrow books by depositing the cost of the book, or \$5.00, which is returned when the book is returned.
