IOWA DEPARTMENT OF TRANSPORTATION

EXPOSURE LIST

BY COMPANY AND FRA NUMBER

2004

NOTICE TO ALL: In spite of our efforts, this data base contains errors, users must verify to insure accuracy.

EXPOSURE (EXP)

Revised 5-26-93

AADT x number trains x angle factor x train speed factor x number of rail line factor

AADT – average annual daily traffic on highway

Number trains – number of through train movements plus one-half of switching movements (if value of number of trains equals 0, then 0.5 is assigned the number of trains.)

Protection indicator – indicator for type of protection presently installed (not currently used in the formula)

gates	0.1
flashing lights	0.6
wigwags	0.8
crossbucks	1.0
seperation	0.00001

Angle factor – a factor to allow additional credit for crossing angle

00-29	= 2.0
30-59	= 1.2
60-90	= 1.0

Train speed factor – factor to consider the typical maximum speed over crossing

60+ mph	= 1.0
40-59 mph	= 0.9
25-39 mph	= 0.8
less 25 mph	= 0.7

Number of rail line factor – consideration is given to number of tracks present at the crossing

2 or more mainlines	= 1.00
1 mainline + 1 other	= 0.85
1 mainline	= 0.80
other track	= 0.75

NOTE: If exposure appears at 999999.99, then one of the factors is not shown.
