Acknowledgments

There were many individuals and organizations involved in this collaborative effort to collect youth development data from Iowa's 6th, 8th, and 11th grade students. Thank you to all who contributed to the collection and analyses of the 2018 Iowa Youth Survey data.

We wish to directly thank all the district superintendents, principals, teachers, counselors, facilitators, parents, and students for their incredible effort. Conducting the Iowa Youth Survey is a learning experience, and the knowledge gained provides the opportunity to be even more successful in subsequent years. Your comments and suggestions continue to be essential.

Overview

From October 1, 2018 through November 9, 2018, the Iowa Department of Public Health (IDPH) collaborated with schools in Iowa to conduct the 2018 Iowa Youth Survey (IYS). The 2018 IYS is the seventeenth in a series of surveys that have been completed every two or three years since 1975. The survey is conducted with students in grades 6, 8, and 11 attending Iowa public and private schools. The IYS includes questions about students' behaviors, attitudes, and beliefs, as well as their perceptions of peer, family, school, neighborhood, and community environments. The 2018 IYS questionnaire can be found here.

Objectives

The 2018 Iowa Youth Survey (IYS) Area Education Agency (AEA) reports are designed to help local and state-level planners, community agencies, and school personnel identify youth development needs, implement relevant, targeted interventions, and assess outcomes. IYS data can assist in providing a better understanding of students in Iowa and their needs. It can also help to assess the strengths and challenges of schools, families, and communities from the young person's perspective. In addition, IYS data may be used to obtain funding for a wide variety of programs and services. The Iowa Youth Survey has proven to be a valuable resource in youth needs assessment, program development, implementation, and outcome evaluation.

Iowa Youth Survey reports can also help Iowa's counties assess their relative strengths and weaknesses as well as collaborate with community providers to develop programs to meet students' needs. In addition to the Judicial District reports, population-specific IYS reports are publicly available. For more information, please check the IYS website: www.iowayouthsurvey.iowa.gov for the availability of State, County, Iowa Area Education Agency (AEA), and Iowa Department of Public Health Substance Abuse Prevention Service Area reports. The total percentages provided in these additional reports, as well as the breakdowns by grade level and gender, can be compared with the respective State of Iowa report percentages to view similarities and differences by region or population.

Judicial District Reports

The Judicial District reports may be subject to sampling error. The more school districts and non-public schools within the Judicial District that participated in the IYS, the more likely the reported percentages are accurate estimates of the attitudes and behaviors of students that are in the judicial district area. The absence of a majority of students from any school district or non-public within this judicial district has the potential to produce significant bias, as we do not know if the youth who did not take the survey would have provided similar responses as the youth who did participate. All of these considerations, along with unique judicial district characteristics, should be taken into consideration when comparing to state results.

2018 Iowa Youth Survey

Profile of Participation

The 2018 Iowa Youth Survey was conducted via the internet and completed by students online through an electronic survey tool (SurveyMonkey) administered by the Iowa Department of Public Health.

A total of 70,451 validated records were received from students across the state. Validated records were received from 69,091 students attending public school districts, and 1,360 students attending non-public schools. Records were identified from 225 of Iowa's 330 public school districts (68.2%), and from 13 of the 170 non-public schools (7.6%) for students enrolled in grades 6, 8, or 11. These records may represent additional districts (e.g., when districts whole grade share, when multiple districts reported the same district number, when districts shared

their unique SurveyMonkey URLs, etc.). The 70,451 validated records received from students completing the IYS represented all 99 counties in Iowa. All Iowa counties were represented by a minimum of 1 IYS record. Of the 70,451 validated records, 9285 records were from students residing in a county in this judicial district. Data in this report assume each record represents one student. In general, the higher the percentage of students completing the IYS in a judicial district, the more likely the data are representative of students in grades 6, 8, and 11 residing in that judicial district. A list of public school districts and non-public schools that students residing in this judicial district identified attending is provided in Appendix B on page 178.

Survey Content

The 2018 Iowa Youth Survey contains 212 questions and is divided into seven sections (A-G).

Section A. Demographic Characteristics (7 questions)
Section B. Things About Me (66 questions)
Section C. My Beliefs and Attitudes (18 questions)
Section D. Peer Questions (12 questions)
Section E. School Questions (62 questions)
Section F. Family Questions (21 questions)
Section G. Community Questions (26 questions)

The appropriateness of any comparison between the 2018 IYS to surveys from previous years must be considered question by question. In some cases, the question numbers have changed from year to year. The question wording, response options, and time frames may also have changed. Trend analyses should be considered exploratory at best. If comparisons are made, the results may *appear* to be significantly different, for better or worse, from the reports generated by previous surveys. However, this appearance may be due to differences in question and response wording and the representativeness of the sample rather than actual changes in Iowa's youth.

Data

Data Cleaning

A total of 74,830 IYS records were received. During the data cleaning process, 4,379 records were removed, leaving a total of 70,451 validated Iowa Youth Survey records. Unique survey links were assigned to each individual school district and private school. Data cleaning included cross referencing information within survey records by identifying links used by school districts and comparing with the school district and building code entered by the students. Internet protocol (IP) addresses were collected automatically with each record and were used to identify errant records. Date and time checks were also used. Census information obtained from school districts and private schools following survey administration was reviewed to identify and assist with solving issues with survey data. School districts and private schools were consulted for assistance in identifying valid records. Analyses were performed to identify records with no responses recorded in Sections B through G (i.e., the non-demographic content of the survey). Since it was possible for a student to simply refuse to answer any question by leaving it blank, not all of the records with missing responses were removed. Records were removed for reasons including technical issues encountered by schools during IYS administration and students starting the survey over, students retaking the survey after failing to finish on their first attempt, students not in grades 6, 8, or 11 taking the survey, invalid records from teachers, parents, or others reviewing the survey using a link intended only for students, and schools re-administering the survey to groups of students who were provided incorrect values for county and district and building codes.

Seven questions in the 2018 IYS are identified as skip questions (B15, B16, B27, B39, B50, B60, and B65). If a student answers "never" or "no" to a skip question, subsequent questions

related to the skip question are passed over and the survey advances to the next applicable question. Responses for the skipped questions are set to "no" or a negative response during the data cleaning process. In the process of data cleaning, some records may have included a "no" or "never" response to a skip question, however had affirmative responses to the following related skipped questions. These situations may have occurred if a respondent first answered "yes" to a skip question, began answering the following questions, and then went back to change their response to the skip question to "no." In the process of data cleaning, if the "no" response to the skip question and the follow-up questions that were answered were all "no" or in the negative, the responses stand and the rest of the skipped questions were set to reflect negative or "no" responses. If the skip question is answered with a "no" and at least one follow-up question was answered with a "yes" or in the affirmative, the skip question response was converted to "yes" and all other follow-up questions were left as is (blanks were left as missing).

Confidentiality

Since Judicial District reports present data from fewer students than the State of Iowa report, several steps were taken to protect confidentiality. While there is no way for an individual student to be connected with his or her particular responses, there are circumstances in which all or nearly all students may be connected to a particular behavior or attitude. This may increase the likelihood of someone making inferences about individual students from the data. For example, if all 11th graders in a judicial district reported that they used alcohol, essentially every 11th grade student can be identified as using alcohol. Therefore, certain questions and accompanying responses, such as past thirty day use of alcohol, were identified as sensitive. For this subset of questions, any time 10% or fewer of the students do not respond in the *least* sensitive manner, the response data for that question will not be reported. Instead, an asterisk (*) will appear in place of the percent. For example, if 90% or more of the students responded that they used alcohol in the past 30 days, data in the column will be replaced with the asterisk symbol to aid in protecting confidentiality. Additionally, when the total number of students responding to a question is small, it may be easier to make an assumption about how a particular student or group of students might have responded. Therefore, any time 10 or fewer students responded to a particular question, the asterisk symbol will appear in all response cells in that column.

Data Presentation

Section I: Data Tables

Data provided in the data tables include the responses to questions that appear in the 2018 Iowa Youth Survey. The judicial district data are presented in the first portion of the table for each question, followed by state results for the same question. Two hundred nine of the 212 IYS questions are presented on pages 7 through 140; the first three questions regarding county number, school district number, and building number are not included in this report. The questions and responses provided in this report are written verbatim as they appeared in the 2018 survey; however, punctuation was added to some questions in this report. Each table contains 25 columns. All percentages are rounded; "0%" appearing in any column represents anything less than 0.5% (including 0 or none). Due to rounding, percentages may not add up to exactly 100%.

The first row of the data tables describes the type of IYS report (i.e., judicial district results on the left and state results on the right). The second row provides the question followed by the 2018 IYS section and question number. Below the question number in the first column are rows containing all possible response options provided on the IYS for that particular question. All percentages in the response rows are based on the number of students who answered that question; missing responses are not included in the calculation.

The final row in the table provides the total percentage of all students in the column who responded to the particular question. A low percentage in the last row indicates some students did not answer the question. In general, the higher the percentage responding, the more likely the responses are representative of students in Iowa. Several data tables from pages 7 to 140 contain data that present the number of times, days or hours students reported participating in an activity. For these questions, an additional row shows the combined percentage of students who report one or more incidences of these activities. These percentages serve as an indicator that shows the total percent of students who have reported engaging in the activity at least one time, day, or hour. Students who did not report the activity or who reported the activity less than once in the time frame provided in the question are excluded from the percent calculation for this row. For example, question B1 asks students to report the average number of hours worked per week during the school year. Responses for this question range from 0 hours to 11 or more hours. Thus, the final row of the table for question B1 shows the *total* percent of students who reported working 1-2 hours, 3-5 hours, 6-8 hours, 9-10 hours and 11 or more hours. Students who reported 0 hours are not included in the calculation of this total.

The second through fourth columns below the IYS question, titled **"**6th Grade," are percentages based on all of the students in the judicial district who answered the question and reported that they were in grade 6. The "TOTAL" column combines all responses (including missing responses for gender), and is followed by data separated for male and female respondents.

Columns five through seven, titled "8th Grade," provide the data described as above for students reporting they were in grade 8. Columns eight through ten, titled "11th Grade," present the same data for students reporting they were in grade 11.

Columns eleven through thirteen, titled "All Grades," include the percentage of all students who reported each of the responses. The results in this column include all of the students in the previous nine columns.

Columns fourteen through twenty-five provide the same information as columns two through thirteen for all students in Iowa.

Section II: Alcohol, Tobacco, and Other Drug Use Tables

The prevalence of alcohol, tobacco, and other drug (ATOD) use is presented in three tables on pages 141 through 144. Data in the tables include students who indicated current use (use during the past 30 days) as well as students who indicated ever using. All results in the ATOD tables indicate the percentage of records (or students) indicating use; any indication of use for any of the questions associated with that particular substance were coded as use. In accordance with computations in previous IYS reports, if all other responses in the record indicated no use, responses containing missing data were also coded as no use. Also consistent with previous IYS reports, if all responses were missing, the record is considered to indicate no use. Therefore, students who left a question blank are included in the denominator used to calculate the percentage of students who reported use. Questions included in the "Drug Use: Current" and "Drug Use: Ever" categories in the ATOD tables vary each survey year, depending on what questions are included in the IYS. Caution is recommended when comparing these tables across survey years, with a careful review of component questions strongly encouraged. The questions associated with alcohol use, tobacco use, and drug use are presented in Table 1.

Section III: Individual Trends

Data provided in figures on pages 145 through 174 present selected responses to 25 questions in the 2012, 2014, 2016, and 2018 Iowa Youth Surveys.

Percentages for the selected responses to questions are provided for all students who reported they were in 6th, 8th, and 11th grades, as well as responses for all grades combined. “All Grades” combines all responses from grades 6, 8, and 11, and also includes records with missing responses for grade. Figures 4, 8, 10, 13, and 18 display percentages to selected questions for 11th grade students by gender.

Each figure provides the IYS section and question number since question numbers can change each year. Percentages in the figures are based on the number of students who answered that question; missing responses are not included in the calculation. All percentages are rounded; “0%” appearing in any column represents anything less than 0.5% (including 0 or none). Following each figure, the question is provided along with all response options for the question including responses represented by the percentages in the figure and the other possible responses associated with the question.

An asterisk (*) will be present in cells where 15 or fewer students answered a question, or if 10% or fewer students did not respond in the *least* sensitive manner for select questions.

Section III. Individual Question Trends

Figure 1. Major Classroom Disruptions and Behavior Problems in Past 30 Days

	2012 (B13)	2014 (B14)	2016 (B14)	2018 (B14)
6th Grade	65.0%	68.5%	70.0%	69.1%
8th Grade	70.9%	69.4%	68.4%	73.2%
11th Grade	50.0%	54.6%	54.2%	56.5%
All Grades	61.9%	64.2%	64.2%	66.5%

Note: Any difference of 1.6 percentage points or greater may be considered statistically significant.

IYS Question: About how often in the last 30 days have any of your classroom teachers had to stop teaching in order to deal with a major student disruption or behavior problem?

Responses Represented by Percentages: "1 time," "2 times," and "3 or more times."

Other Response to Question: "0 times."

When 10 students or fewer answered the question, or if 10% or fewer students did not respond in the *least* sensitive manner, data will not be present in figures for select questions.

Figure 2. Alcohol Use in Past 30 Days

	2012 (B18)	2014 (B16)	2016 (B16)	2018 (B16)

Appendix A. Additional Iowa Youth Survey Information

Survey Content

The general content of the questions included in the IYS is similar to previous surveys. Prior to IYS administration, a committee of youth development professionals selected by IDPH reviews and makes recommendations regarding the IYS survey questions. The selection of specific survey questions is, in part, based on experts' suggestions as well as analysis of question and response data collected in previous Iowa Youth Surveys.

Background

Prior to 1999, the IYS was given to a sample of students in 6th, 8th, 10th, and 12th grades from approximately one-third of Iowa's public school districts.

1999

- The 1999 IYS was different from previous years in both the procedures used to implement the survey and the students who were asked to participate. Beginning in 1999, IYS participation was sought from *all* students in grades 6, 8, and 11 attending public school districts, as well as from students aged 14 to 18 years in alternative programs. This change made it possible to provide youth development data for each participating school district and each county in which participating students reside. The change also made it more feasible to use IYS results to aid in assessing outcomes of community and school youth development programs. It is important to note the change in the grade levels made in 1999 restricts direct comparisons with survey data collected prior to 1999 to grades 6 and 8, and to the schools that participated in those surveys.
- IYS questionnaires were completed on paper by students.
- The 1999 IYS contained 181 questions and the validated record count was 85,426.

2002

- Beginning in 2002, IYS participation was sought to include all non-public schools. This change was made to more accurately reflect the attitudes and perceptions of all Iowa students in grades 6, 8, and 11, not just those attending public schools. Data collected from students attending non-public schools are included in the 2002 and later reports.
- Prior to the 2002 IYS, a committee of state-level planners participated in an interactive process to identify key youth development-related constructs which provide a summary of the data collected within nine framework domains. The data were combined for selected questions and presented in figures in the 2002 trend reports.
- The 2002 IYS contained 191 questions and the validated record count was 96,849.

2005

- A section containing 34 constructs, within nine framework domains, were included in 2005 IYS reports.
- The 2005 IYS contained 190 questions and the validated record count was 98,104.

2008

- In 2008, a change in the method used to conduct the survey took place. All 2008 Iowa Youth Surveys were conducted via the internet and completed by students online through an electronic survey tool (SurveyMonkey) administered by Iowa Department of Administrative Services in conjunction with Iowa Department of Public Health. To ensure a smooth transition for this new procedure, an online pilot test took place in 2007 involving nine school districts.
- The 2008 IYS contained 198 questions and the validated record count was 97,741.

2010

- Following the 2008 IYS, the decision was made to change the IYS completion schedule from every three years to every two years, this began in 2010. Also in 2010, changes in funding mechanisms reduced the incentive for school districts to participate in the IYS. Due to these changes, fewer school districts initially signed up to participate. To try to increase the number of participating districts, IDPH re-opened the IYS to accommodate additional districts, changing the close of the IYS data collection period from October to December. Approximately 7.5% of the total number of records were collected during the later time period. Analyses indicated data from the districts that completed the IYS in the second administration period tended to be significantly different than data collected during the traditional IYS collection period, although only by a few percentage points. This difference could be due to the different collection periods. Alternative reasons include, but are not limited to, differences in participants' age between the collection periods, differences in the districts that participated later, or geographic distribution across the state.
- In 2010, eight constructs were eliminated due to component questions either being eliminated or changed significantly, resulting in 26 construct figures in 2010 reports. This change also eliminated one framework domain.
- The 2010 IYS contained 220 questions and the validated record count was 78,382.

2012

- In 2012 in an effort to reduce the amount of time it took younger students to complete the IYS, modifications were made to the structure of the survey without changing the content. Skip questions were introduced for questions related to alcohol, tobacco, and marijuana use, as well as gambling and suicidal ideations.
- Prior to 2012, weights were generated based on enrollment data and were only applied to the columns totaling all grades. This process was discontinued in 2012 for a number of reasons including, but not limited to: 1) it shortened the amount of time necessary to generate reports; 2) weights were sometimes interpreted incorrectly by readers; and 3) weights normally had a minor impact on reported data and no effect on the percentages in individual grades.
- In 2012, eight constructs were eliminated due to component questions either being eliminated or changed significantly. This change also eliminated one framework domain.
- The 2012 IYS contained 211 questions and the validated record count was 70,770.

2014

- In 2014, three constructs were eliminated due to component questions either being eliminated or changed significantly. This change also eliminated one framework domain.
- The 2014 IYS contained 219 questions and the validated record count was 77,139.

2016

- The 2016 IYS contained 212 questions and the validated record count was 84,703.
- Youth-development constructs that provided summary measures based on responses to a combination of two or more questions were eliminated from reports in 2016. The constructs are statistically biased due to construct scoring methods: the strong correlation between the number of items used in constructs and the percentages of favorable and unfavorable responses is indicative of this bias. Furthermore, questions that compose the constructs have been altered over past IYS administrations resulting in an inability to report data for several constructs.
- Due to the elimination of IYS trend reports in 2016, data from 2010, 2012, 2014, and 2016 for 25 individual questions were added to 2016 regular IYS reports.

2018

- The 2018 IYS contained 212 questions and the validated record count was 70,451.
- Five trend figures were added to display gender differences in the 11th grade.

Data Interpretation

In general, the higher the percentage of students completing the IYS in an AEA, the more likely the data are representative of all students in grades 6, 8, and 11 residing in that AEA. Since every school district did not collect data from every student, e.g., home schooled students may not have been surveyed, and the number of school districts participating in the IYS varies each year, there is the possibility the students who complete the IYS are not representative of all students in Iowa.

Additionally, IYS data do not represent youth who may have dropped out of school. It is unknown what biases non-participating youth might introduce into the IYS report percentages. The 2018 Iowa Youth Survey, as in previous years, contains self-reported data and relies on each student's ability to read and honestly respond to each question. Since the 2018 IYS was conducted online, a student's ability to complete the survey is also dependent on possessing basic computer skills. Self-reported behaviors, attitudes, and beliefs are always subject to error (unintentional such as mistakenly selecting the wrong response or intentional such as denial or boasting), and it is not possible to identify records where this occurs. Additionally, some surveys contained missing data indicating not all students answered every question. There are many potential reasons for missing data and why a student may choose not to answer a particular question, including comprehension level (understanding survey language); confidentiality concerns; refusal to provide an answer resulting from lack of interest or motivation; beliefs and attitudes about the subject of the question; or inadvertently skipping a question. In general, the higher the proportion of students participating, the more likely the survey results are representative and without bias. When comparing data from population-specific IYS reports to the state report, the higher the percentage of students who answered the question, the more likely it is that the comparisons with the state report percentages are unbiased.
