CORNPATH:

A Data Retrieval System for Corn Diseases

An easy-to-use computerized database on 150 corn diseases
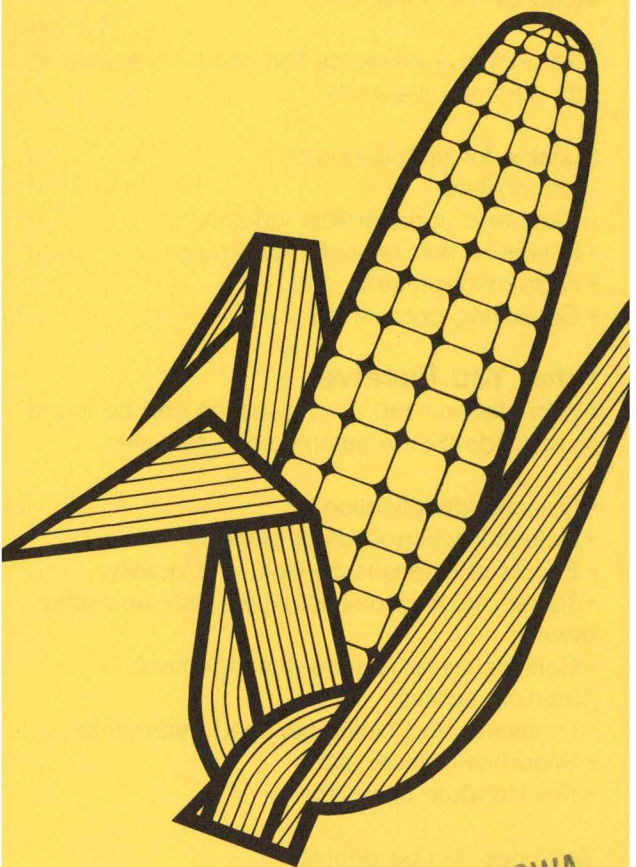

## CORNPATH

A Data Retrieval System for Corn Diseases

Who Can Use This Database?
Concise factual statements are easily understood by the generalist.

The extensive reference lists lead the specialist into pertinent literature.

Suitable for professionals in:
- Universities,
- Seed and agrichemical industries,
- Extension and regulatory agencies,
- Farm management, and
- Consulting companies.

What You Receive
Information on 150 corn diseases can be found in seconds. Some sample searches are:

- Disease identification;
- Detailed descriptions of pathogens;
- Effects of diseases on yield and quality;
- Transmission of diseases by seeds and other means;
- Controls by resistance, management, or chemical sprays;
- Fungicide and biological seed treatments;
- Seed health tests; and
- Key literature citations.

Searches can be printed.

Equipment You Need
- IBM PC compatible computer
- MS DOS 2.1 or later
- Hard disk drive with 1.5 meg. of free space
- 640 K memory
- WORDCRUNCHER JR.™—Included in the package; enables accurate, detailed, and rapid searches in written text.

CORNPATH is a computerized format of the book *Maize Diseases: A Reference Source for Seed Technologists* by Denis McGee and published by APS Press, 3340 Pilot Knob Road, St. Paul, Minnesota 55121 (800-328-7560 or 612-454-7250). Computer implementation developed at Iowa State University by Denis C. McGee, professor of plant pathology, and S. Elwynn Taylor, professor of agronomy.

The WORDCRUNCHER JR.™ software, included in the package, may be used for updates of CORNPATH, as well as new databases on diseases or other agricultural topics and other software sold by Electronic Text Corporation, 5600 North University Avenue, Provo, Utah 84604 (801-226-0616).

Order Form
