SCHOOL TRANSPORTATION DESCRIPTION

Chapter 285, Iowa Code requires every public school district to provide transportation services to entitled students attending public schools and approved nonpublic schools. An elementary level student is entitled if the student lives more than two miles from school. A high school level student is entitled if the student lives more than three miles from school. A district may transport students not entitled and may charge a fee for that service.

Approximately one-half of the enrolled public and nonpublic school students are provided to and from school transportation. However, all school children are provided the service through to and from school transportation, educational trips, activity trips or any combination thereof.

TRANSPORTATION AT A GLANCE:

STUDENTS TRANSPORTED	229,100
ROUTE MILES	49,507,576
EDUCATIONAL AND ACTIVITY TRIP MILES	12,207,216
ROUTE MILES PER DAYS	275,050
TOTAL SCHOOL BUSES	6,800
TOTAL ROUTES	7,000
TOTAL DRIVERS	10,050
TOTAL COST	\$ 56,828,830

NONPUBLIC SCHOOL STUDENT TRANSPORTATION
REIMBURSEMENT PROGRAM

Public school districts are required to provide transportation for resident students attending approved nonpublic schools on the same basis as provided for resident public school students. The public school district may meet this requirement by any of the following:

- transportation in public school operated buses,
- contracting with private parties, other public school districts, or the nonpublic school, or
- utilizing the parent reimbursement provision described in Section 285.1(3), The Code.

The public school district in which the nonpublic student(s) reside is responsible for the transportation and, thus, is responsible for filing the claim for reimbursement. These claims cannot exceed the per pupil cost of the resident public school district when the nonpublic school children are transported in school operated buses or when contracting with another party. The parent reimbursement amount is determined as provided in Section 285.1(3), The Code. The claims are made on forms provided by the Department of Education and certified to the Department of Revenue.

Approximately 23,000 students were transported in 1974-75 with approximately 24,000 students being transported in 1987-88. Of the 24,000 transported in 1987-88, 14,670 students were transported in public school owned buses, 4,500 students were transported in school buses via a contract with a private contractor, nonpublic school, or other public school, and 4,830 were transported by their parents.

To meet the vehicle needs of this program, the Legislature appropriated \$2.2 million, \$1.45 million, and \$200 thousand in 1974-75, 1975-76, and 1976-77 respectively to the School Budget Review Committee for allocation to school districts making application. On July 1, 1977, \$156,166 was returned to the General Fund because all applications received had been honored. Thus, \$4,695,384 was expended by local school districts for the purchase of transportation equipment to be used in the new program.

The following represents the reimbursement amounts expended by school year since the inception of the 1974-75 school year:

1974-75	\$2,074,560
1975-76	2,669,999 (88.1891% prorate 2nd semester)
1976-77	3,331,090
1977-78	3,488,999 (90.2129% prorate 2nd semester)
1978-78	4,006,139
1979-80	4,457,700
1980-81	4,799,710 (95.4% prorate 1st semester)
1981-82	5,193,743
1982-83	5,284,517
1983-84	5,768,822 (97.2% prorate 1st semester)
1984-85	5,959,738
1985-86	6,006,270 (96.15% prorate 1st semester)
1986-87	6,023,680
1987-88	5,879,863

For those students transported in school owned school buses, the district is reimbursed its cost per pupil transported for each eligible student being transported. If the public school district contracts with a private party, a nonpublic school, or another public school, the public school is reimbursed its cost or the contractor's cost, whichever is less. If the district provides the service through the parent reimbursement provision, the school claims, receives the payment, and then reimburses the parents as per Section 285.1(3), The Code. Parent reimbursement began in 1974-75 at \$40 per eligible student per year. The parents received reimbursement for an unlimited number of elementary school children but were limited to receiving reimbursement for no more than two high school students. Parent reimbursement continued through the 1985-86 school year utilizing this eligible student program. However, the reimbursement amount was increased to \$80 per pupil in the 1975-76 school year, and then in the 1980-81 school year the reimbursement amount was derived through a formula that is currently in the law. The parent reimbursement amount for the 1987-88 school year was \$203 per eligible pupil.

Legislation enacted during the 1986 and 1987 Legislative sessions changed the parent reimbursement program by limiting the eligible children for reimbursement purposes to three elementary students and one high school student per family. In addition, a supplemental payment program was instituted for those families living more than four (4) miles from the school of attendance. This change has not increased the appropriation inasmuch as the basis for the appropriations and reimbursement remain the same.

Definition of Terms

September '86 Enroll-	1986 certified enrollment Source: <i>1987-88 School Budget File</i>
Square Miles -	Total square miles in school district Source: <i>Secretary's Annual Report, 1987-88</i>
Pupils Per Sq. Mile -	1986 certified enrollment divided by square miles Source: <i>Secretary's Annual Report, 1987-88</i>
Cost Per Mile -	Total Net Operating Cost divided by total miles travelled Source: <i>Annual Transportation Report, 1987-88</i>
Cost Per Trans-Pup -	Total net operating cost divided by the total average number of pupils transported Source: <i>Annual Transportation Report, 1987-88</i>

Cost Per Trans-Pup	\$ 324	\$ 259	\$ 280	\$ 270	\$ 247	\$ 201	\$ 225	\$ 248
Trans Per Pupil	\$ 187	\$ 172	\$ 170	\$ 165	\$ 123	\$ 74	\$ 52	\$ 111
Net Cost Per Pupil	\$ 2986	\$ 2752	\$ 2672	\$ 2636	\$ 2632	\$ 2664	\$ 2693	\$ 2672

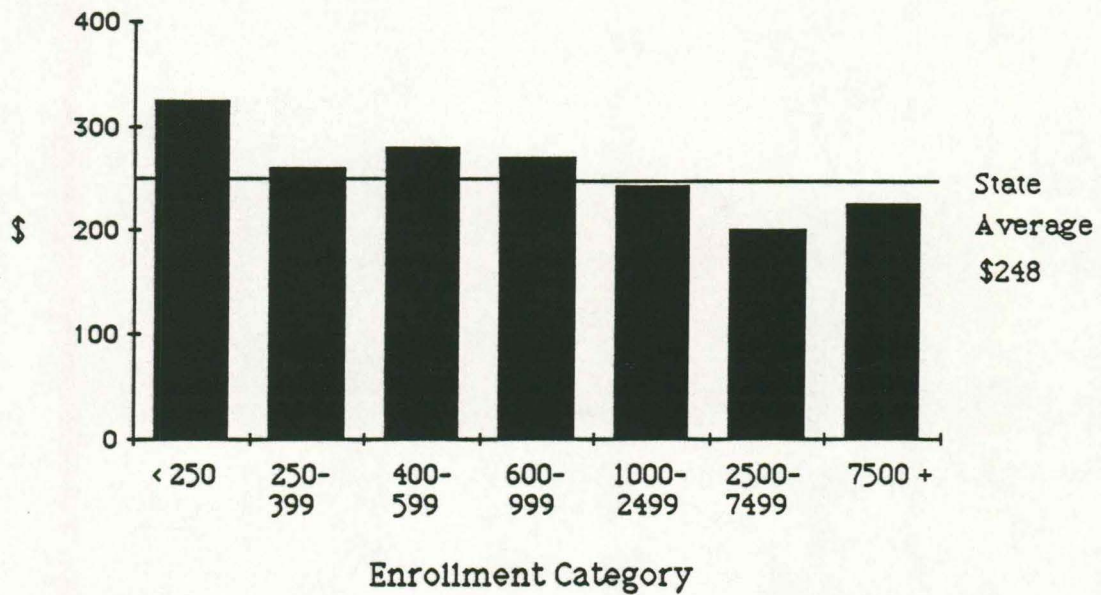

Average Cost Per Mile
By Enrollment Category

The graph above demonstrates that as enrollment increases, cost per mile increases. This suggests that smaller districts travel further thus decreasing cost per mile, while larger districts travel shorter distances giving them higher costs per mile.

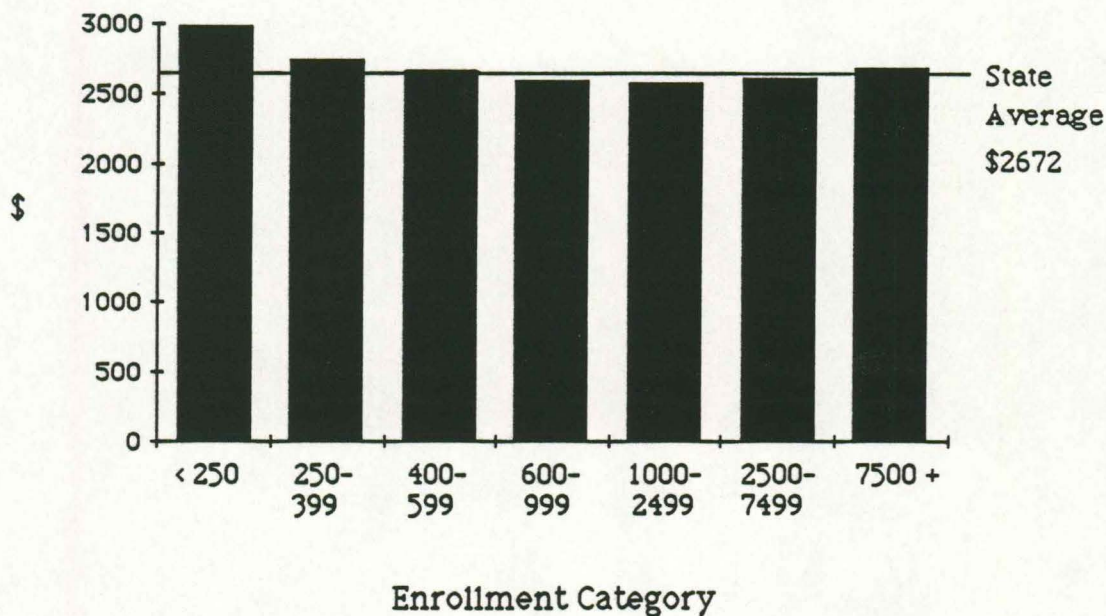

Average Cost Per Trans-Pupil

By Enrollment Category

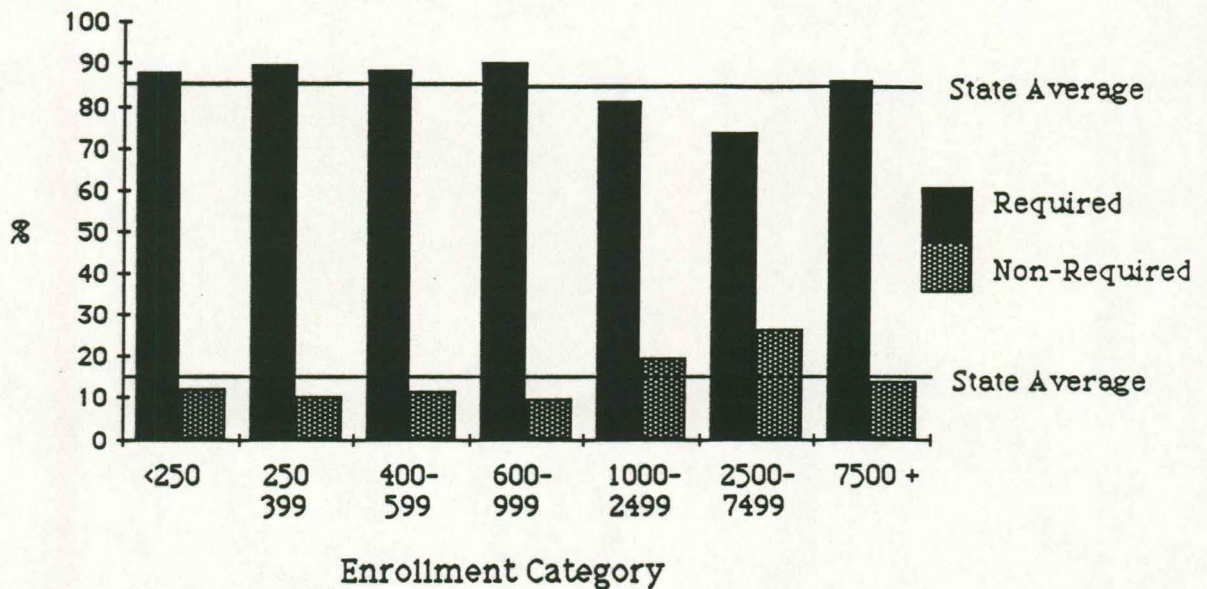

Average cost per pupil transported is highest in districts under 250 enrollment since they transport fewer pupils. Districts of 1000 enrollment and above all fall below the state average in average cost per pupil transported.

Net Cost Per Pupil
By Enrollment Category

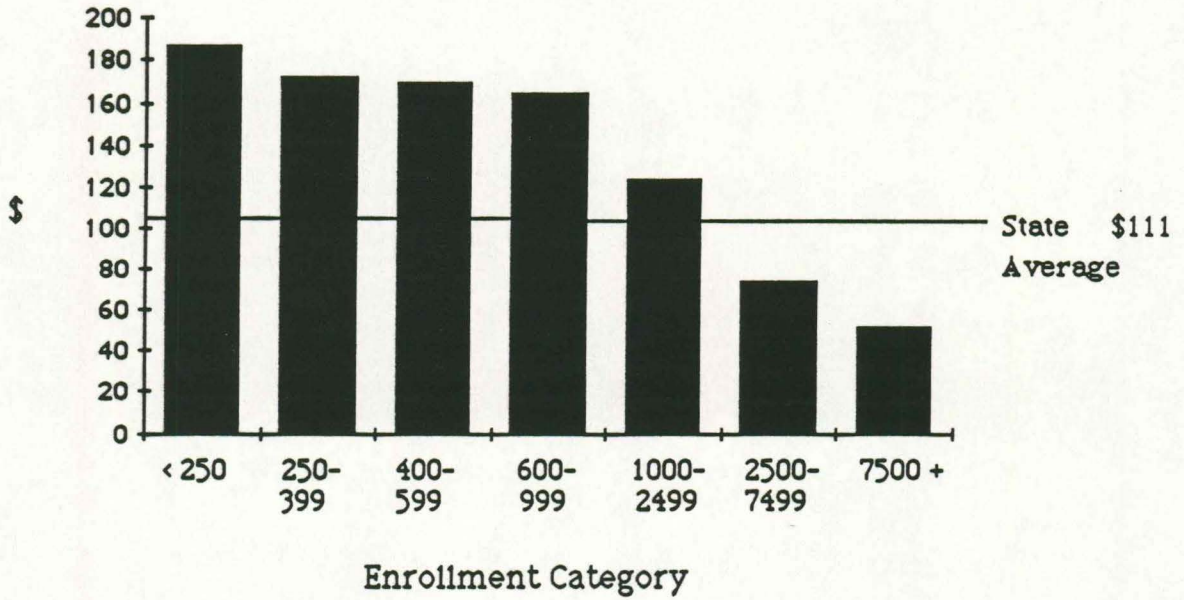

Results of removing the cost of public school transportation from regular program cost are reflected in the above graph on a per pupil (1986 certified enrollment) basis. Districts with enrollments between 600 and 7499 fall just below the state average while districts with enrollments between 250 and 599 are at the state average or slightly above. Districts with enrollments of 7500 or more fall just about at the state average and districts under 250 enrollment are more than \$300 per pupil above the state average with the exception of net cost per pupil in districts under 250 enrollment, districts in the remaining six enrollment categories have markedly similar net cost per pupil.

Percent of Pupils Transported that are Entitled and Non-Entitled
By Enrollment Category

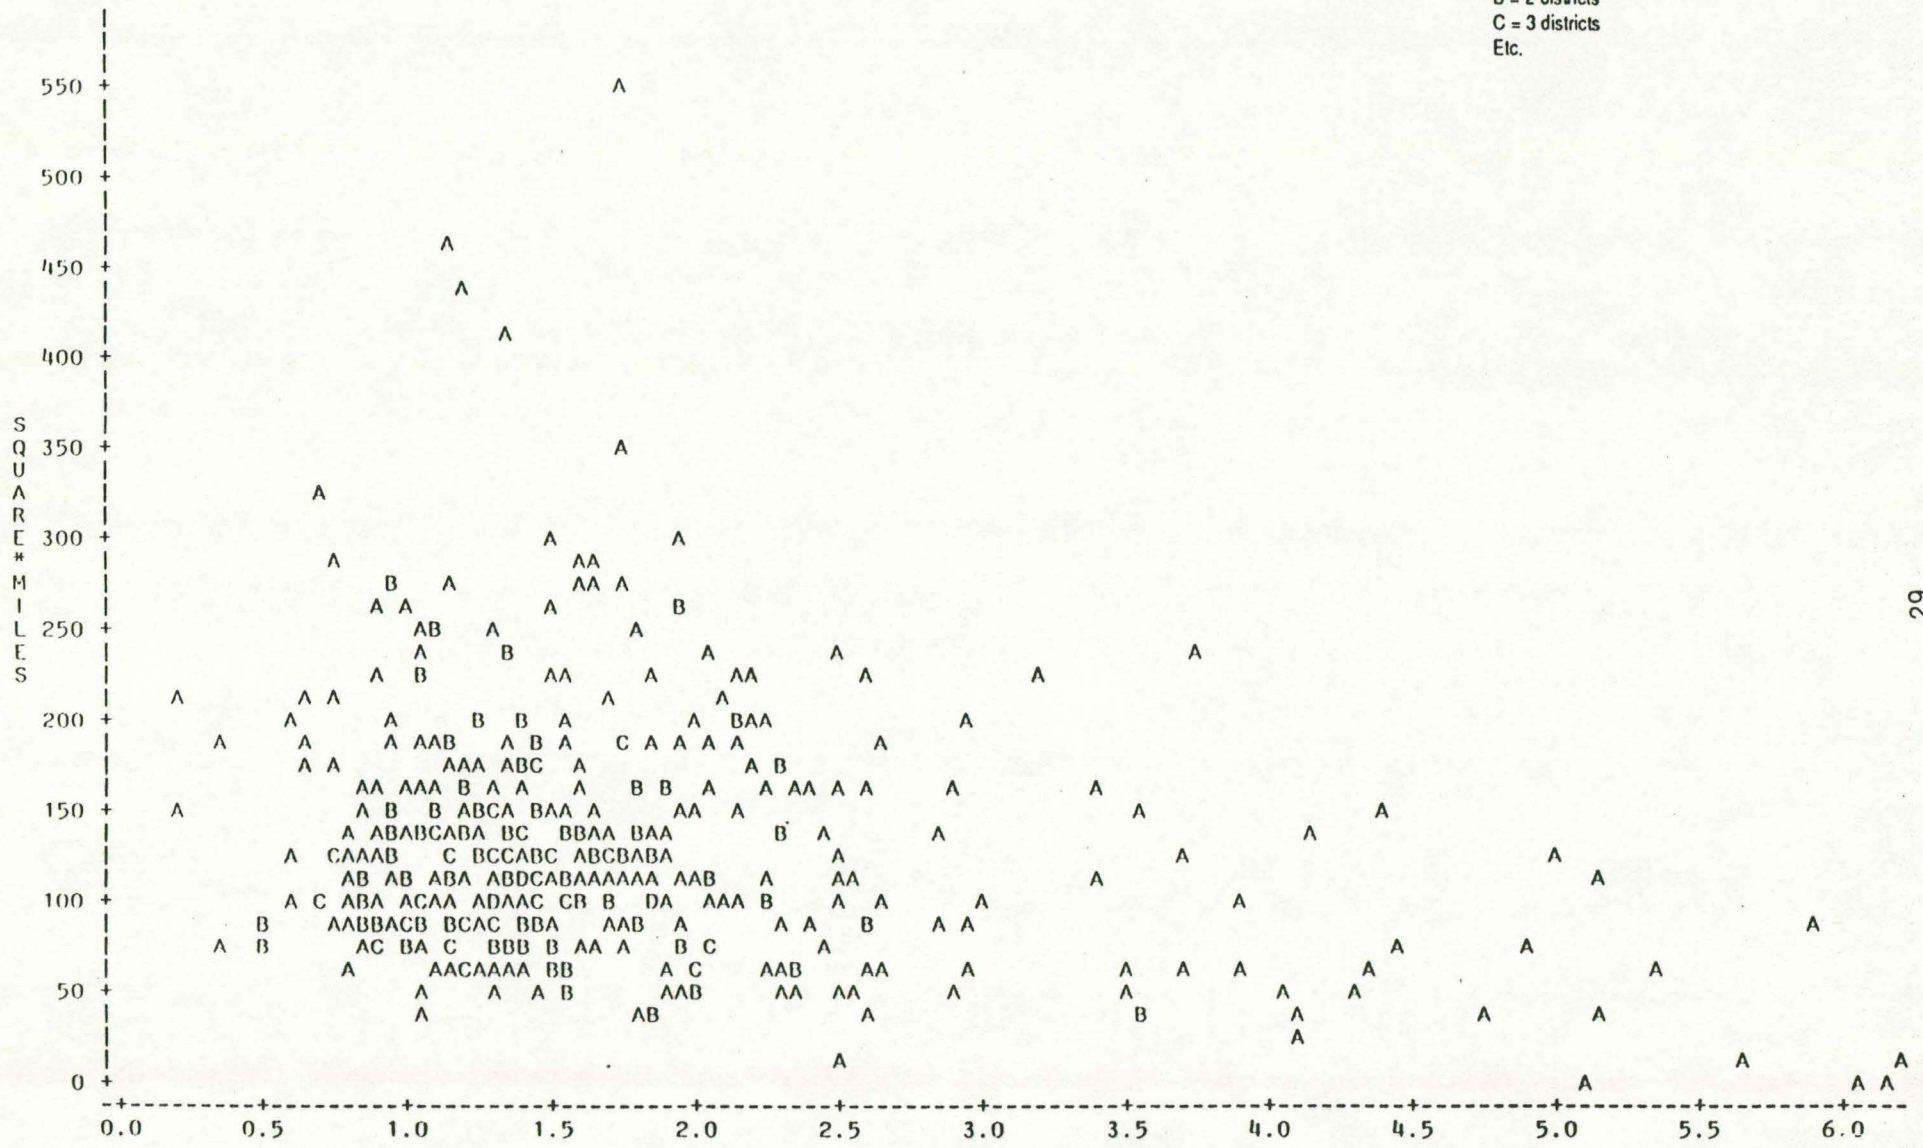

Districts between 1000 and 2499 enrollment and districts between 2500 and 7499 enrollment transport a higher percentage of non-entitled students than other districts. An average of 16 percent of all students transported are not entitled to transportation service. Of all students transported by districts with enrollments between 2500 and 7499, 26 percent of those transported are not entitled to transportation.

Average Transportation Cost Per Pupil
By Enrollment Category

The smallest enrollment categories reflect the highest average transportation cost per pupil while the largest enrollment categories reflect the lowest per pupil costs. Average transportation cost per pupil in school districts appears to be related to enrollment.
