2. **This Data has been reviewed to assess and improve the effectiveness of the Department’s sexual abuse prevention, detection, and response policies, practices, and training.**
 - A. **Identification of problem areas:** Both of the PREA reports in 2019/2020 involved the same alleged perpetrator; one alleged victim was a female and one alleged victim was a male. There were no problem areas as facility cameras and staff documentation provided evidence to assist investigators.
 - B. **Any corrective action taken for each facility and the Department as a whole:** No corrective action was taken in response to the reported incidents; however, additional cameras were added as a result of facility walk-through.
 - C. **Comparison of current data to data collected in previous years:** Reported incidents stayed the same (2) from Reporting Year (RY) 2018-2019 to RY 2019-2020.
 - D. **An assessment of the Department’s progress in addressing sexual abuse:** In RY 2019-2020, staff and residents reported what they believed to be PREA related incidents; however, they did not meet the definition of PREA and were addressed with facility violations. This shows evidence of a strong reporting culture in the Third Judicial District. All residential staff continue to show and display an increased awareness and reporting of sexual related incidents.
