CENSUS OF PUBLIC WATER SUPPLIES

INTRODUCTION

This census lists the public water supplies in Iowa, their ownership, the source of water and any treatment provided.

Ownership is listed either M for public (municipal, benefited water districts serving incorporated areas, local government authority, etc.) or P for private (private corporations or companies).

A Code for describing treatment provided will be found on the following page. Principal treatment features, identified by capitalized letters, are further described by lower case letters following them. In general, the symbols are arranged in the order in which treatment occurs. Combination units, performing more than one function in a single structure, are denoted by enclosing the appropriate symbols in parentheses.

The census concludes with a list of known Benefited Water Districts serving unincorporated areas of the state.
