The information as contained in this publication is based upon 1965 personal income tax returns filed in 1966. The coding of school districts used was the coding available before the latest school district reorganization. Therefore, information for both high school and non - high school districts is given. It should also be noted that we have listed returns for which no school district was available and could not be determined from the return.

Section 422.21, Code 1966, states in part as follows:

“A space shall be provided by the tax commission, on the prescribed income tax form, wherein the taxpayer shall enter the name of the school district of his residence. Such place shall be indicated by prominent type. A nonresident taxpayer shall so indicate. If such information is not supplied on the tax return it shall not be deemed as an incompleted return.”
