## PREFACE

The State Department of Public Instruction has been designated by the Governor of the State of Iowa as the State Approving Agency for training of eligible people under Chapter 36, Title 38, United States Code, in the fields of Institutional Training, Apprenticeship Training and other On-The-Job Training.

Public Law 89-358, effective July 1, 1966, provided for certain educational institutional benefits while Public Law 90-77, effective October 1, 1967, provided a special Veterans Farm Program and also Apprenticeship Training and other On-The-Job Training programs. Subsequent Public Laws have provided for other changes; the most recent being Public Law 92-540 which liberalized benefits.

Only specific courses or training programs are approved for the training of eligible people under Chapter 36, Title 38, U. S. Code. Only the courses that are indicated are approved courses. There may be other courses at the institution that are not approved for various reasons. Every approved course or training program must be an adequate course leading to a definite educational, professional, or vocational objective. An institution's approval indicates that the institution has met the minimum requirements of Chapter 36, Title 38, U. S. Code. New schools, new training establishments, and new courses are continually being added to this directory, as well as modifications and deletions.

Those institutions listed as accredited indicates that their courses were approved under Section 1775 of the Law, and met one of the following provisions: (1) the course has been accredited and approved by nationally recognized accrediting agencies or associations; (2) credit for the course is approved by the State Department of Public Instruction for credit toward a High School Diploma; (3) the course is conducted under Sections 11-28 of Title 20, U. S. Code (Vocational Education); and (4) the course is accepted by the State Department of Public Instruction for credit for a teacher's certificate. Schools which are accredited and have one or more accredited courses are shown with an asterisk (\*).

Other courses may be approved under Section 1776 of the law. Approval under this Section indicates that the institution and the course meet the minimum requirements of Chapter 36, Title 38, U. S. Code, and the standards of this approval agency, but do not meet the accrediting requirements above. Apprenticeship Training programs meet the Standards of Apprenticeship, published by the Secretary of Labor, pursuant to Title 29, Section 50 (a) of the U. S. Code. Other On-The-Job Training programs are of shorter duration and include programs that are not established as apprenticeship programs.

Eligible people under Chapter 34 and 35, Title 38, U. S. Code, interested in attending one of these institutions or training establishments are advised to correspond directly with the institution or company of their choice, regarding specific courses or training programs, prerequisites for enrollments, registration dates, and other pertinent requirements of the institution. Determinations of eligibility from a military standpoint and certificates of eligibility and other matters of payments, etc., are matters to be taken up with the Veterans Administration Regional Office in Des Moines, Iowa.

## AREA PUBLIC COMMUNITY COLLEGES & VOCATIONAL SCHOOLS

Iowa has been divided into fifteen multi-county merged areas and each merged area is served by a public area school organized either as an area community college or an area vocational school. These merged areas have been designated by numbers and also a distinctive name has been adopted by the area administrative unit. The public junior colleges previously operated by the local school districts have been absorbed by the merged areas. In some instances there are more than one attendance center or campus within a merged area. Academic programs only are approved on some campuses, while on others just vocational programs are approved. In many cases, both academic and vocational programs are approved within the same school. Those offering accredited programs in the academic field and/or the vocational field, are shown by means of an asterisk. Many of these schools offer supplementary and adult education programs that are not approved for veterans benefits. All academic programs and most vocational programs are approved. The academic programs and the vocational programs are shown under different headings. College transfer programs and vocational programs leading to immediate employment are intermingled in these schools, but are individually approved for veterans benefits.

## HIGH SCHOOL COMPLETION PROGRAMS

Most of the high schools in the State could be approved on an accredited or non-accredited basis for the offering of the regular high school completion program or course. Those presently approved include only those which have made application for approval and this request usually was the result of the enrollment of a veteran in the regular high school completion program.

Some local school districts have offered adult evening high school completion programs. Some of these have been approved for the offering of the regular program with the regular diploma. A number of schools have dropped these programs in favor of a similar program offered by the merged area school.

Some merged area schools are offering a complete high school completion program and some of these are approved. In addition, some merged area schools are offering various adult courses of a high school level, leading to an adult high school diploma or the equivalent.

## VETERANS FARM PROGRAM

Public Law 90-77 amended the existing Federal Laws to provide additional educational benefits to eligible veterans who are engaged in agricultural employment. This law became effective October 1, 1967 and was amended under Public Law 92-540, effective October 26, 1972.

This program carries the name "Farm Cooperative Course" in the Veterans Administration Regulations. It, however, is an institutional program which meets a minimum of 440 hours per year prescheduled into 44 weeks. Veterans in this program must attend a minimum of 80 clock hours each three month period to be considered in full-time attendance. The program is pursued by the veteran concurrently with his agricultural employment.

Currently there are 83 centers offering this course for veteran farmers. Veteran farm programs are sponsored by the fifteen merged area schools in the State of Iowa.

Approximately 2400 veterans are enrolled in these programs.
