FOREWORD

The data in the report is the result of a cooperative effort between the Iowa Association of School Boards (IASB) and the Area Education Agencies Educational Services Divisions (AEA). Data collected from the IASB Administrative Salary Survey has been merged with data collected from the Annual Statistical Report (ASR) Questionnaire to Iowa School Districts. Overlapping items were purged from the ASR questionnaire (these were primarily salary questions). This resulted in a shorter questionnaire and a reduction in the number of times a superintendent is asked to answer the same items on different questionnaires. We would, of course, welcome any suggestions you might have to help us further improve this survey.

PLEASE NOTE:

Zero entries in this report should be interpreted with care. Items on the data gathering questionnaires for which there were no responses were given zero values. Also items for which there were invalid or unrealistic responses were given zero values. And, of course, items for which the response was in fact zero also appear as zero.

School districts which returned the IASB survey but did not return the AEA survey are shown to have zero enrollment in their K-6 grades. In these cases total resident enrollment is shown as 7-12 enrollment. This was done to facilitate proper ranking of all reporting school districts. Nonreporting districts, as listed on page 0011, are those that did not return either the IASB survey or the Annual Statistical Report survey.
