of

Expenditures made by Authority of Chapter FiftyNine of the Act of the Twenty-Third General
Assembly, Entitled, An Act making an Appropriation for the purpose of Improving the Grounds of the
New Capitol.

DES MOINES: G. H. RAGSDALE, STATE PRINTER. 1893.

### REPORT.

To the Executive Council:

Gentlemen.—I have the honor to submit herewith my final report of work done and money expended under the provisions of Chapter 59, Laws of the Twenty-third General Assembly, entitled "An Act making an appropriation for the purpose of improving the grounds of the new Capitol."

By the provisions of this act, one hundred thousand dollars was appropriated, to be expended under the control of the Executive Council. Section 4 is as follows:

The plans adopted by the Board of Capitol Commissioners for the improvement of the grounds, made by J. Weidenmann, shall be followed as the ground plans for improving the grounds, but the Executive Council may make such changes in the details as they may deem for the best interests of the State.

The Executive Council appointed as superintendent in charge of the work, Gen. Ed Wright, who entered upon the discharge of his duties May 1, 1890.

At this time the grounds were covered with the original forest growth, a few of the trees being of considerable size. On three sides of the Capitol square the process of grading the streets below the original surface of the ground, had produced clay banks from five to twenty feet high, facing the streets.

Bids were opened June 3, 1890, for the preliminary grading of the grounds, and a contract was awarded to M. H. King, of Des Moines, who was the lowest bidder. It was thought there would be about 70,000 cubic yards of clay and other material to remove from the grounds. Mr. King agreed to do this at the rate of twenty-two cents per cubic yard.

August 25, 1890, proposals for furnishing about 12,000 cubic feet of cut granite work, for enclosure walls and steps were received and opened. The contract was awarded to George Green & Co. for granite quarried near South Thomaston, Maine.

James B. Locke, of Des Moines, was contracted with to haul and set in place this stone work, and also to put in place the necessary foundations for the same. About one-fourth of the granite was to be delivered and set in place during the fall of 1890, but owing to the failure of Green & Co. to supply stone, none could be set.

December 1, 1890, General Wright resigned his position as superintendent, and recommended that E. W. Crellin, who up to this time had been employed as engineer and draughtsman, be employed in his place. This was done, and E. W. Crellin assumed the duties of superintendent and engineer.

I wish here to express my obligations to Gen. Wright, and my appreciation of the comprehensive and systematic manner in which all the records of the office had been kept.

Mr. King completed the grading of the grounds in September, 1890, and was paid in full.

Up to January 1, 1891, there had been received from Green & Co. ten car loads of granite. The foundations had been put in place for the north steps and for the enclosure wall from the north side of the east entrance to the northwest corner of the grounds. The total expenditures during the year 1890 amounted to \$17,615.59.

During the year 1891 a system of agricultural drainage was laid at an expense for drain tile of \$75.29, and for labor, \$325.60. The grading for the west approach having exposed the twenty-six inch capitol sewer, it became necessary to lower about one hundred and twenty feet of the same. New twenty-four inch sewer pipe was used for this work. Portland cement area ways were built around each of the sixty-two cellar windows.

In accordance with a resolution passed by the Executive Council May 18, 1891, work was commenced on the Portland cement walks by day labor, the necessary cement and other material being purchased by contract. It was the intention to complete all cement work before the winter of 1891–1892, but the failure of George Green & Co. to furnish the granite steps for the west approach so delayed the cement work that it could not be completed before freezing weather. November 27, 1891, there had been completed 55,350 square feet of walk having an average thickness of  $4\frac{1}{2}$  inches at a cost for labor and material as follows:

| 659 days, @ \$1.75\$ | 1,153,25   |
|----------------------|------------|
| 14 days, @ 2.50      | 35.00      |
| 34 days, @ 3.00      | 102.00     |
| 89 days, @ 3.25      | 289.25     |
| 9 days, @ 3.50       | 31.50      |
| 64 days, @ 4.00      |            |
|                      |            |
| Coarse sand.         | 445.00     |
| Screened gravel      | 281.00     |
| Cement               | 4,207.00   |
| Lumber and tools     | 140.00     |
| Total                | \$6,940 00 |

This gives the cost per square foot, 12.53 cents, being 1.37 cents less than the lowest bid submitted May 18, 1891. While the specifications for bidders had only required a thickness of four (4) inches for the pavement, it was deemed advisable on account of the large size of the blocks laid, to increase the thickness to  $4\frac{1}{2}$  inches as above noted, at an additional expense of about eight per cent.

Contracts were awarded to the Hallowell Granite Co., to George H. Mitchell, and to the Des Moines Marble and Mantel Co. for furnishing the cut granite work for the drinking fountain pier, the large fountain, the semicircular seats, the large center pier and for the circular flower beds. These three contracts aggregated \$13,802.

Contract was awarded A. J. Johnson and P. J. Cavanaugh for laying blue grass sod on the grounds. About three-fourths of the work was completed during 1891.

Water pipes were laid, and hydrants located at such points as to make convenient the use of water on every part of the grounds. Gas pipes were laid and twenty-two gas lamps placed on the grounds.

An examination of the report made January 22, 1886, by a committee of the Capitol Commissioners, shows that in their estimate, amounting to \$130,786.11 of the cost of improving the capitol grounds in accordance with the plans of J. Weidenmann, no allowance was made for statuary. As the work progressed, however, it appeared that several thousand dollars of the appropriation would be available for that purpose, and bids were accordingly received for the pioneer group and the two tablets, in statuary bronze. The contract for the pioneer group was awarded to Karl Gerhardt of Hartford, Connecticut, for the sum of \$4,500.00, delivered at Des Moines. Alex. Doyle of New York, N. Y., was commissioned to prepare the coat of arms tablet and the drinking fountain tablet, the former to cost \$650.00 and the latter \$550.00, both delivered at Des Moines.

The total expenditure during the year 1891, amounted to \$60,018.48.

Green & Co. completed their contract by the delivery of stone November 4, 1891, or five months and nineteen days after the time they had agreed to complete their contract. Some of the stone furnished by them arrived in such bad condition that it could not be accepted. At Mr. Green's request these stone were recut at a cost of \$199.00 and the amount charged to his account. The claim of the State for damages, due to the failure of Green & Co. to complete their contract by the specified time, was finally adjusted by Mr. Green's agreement to forfeit \$408.34 of the contract price. This was in addition to actual expense incurred by the State in making certain of the stone furnished by Mr. Green acceptable.

James Locke completed his contract for setting the stone in November, 1891, and was paid in full.

The Des Moines Marble & Mantel Co. delivered the large fountain rim complete, December 11, 1891, and received payment in full.

George Mitchell completed his contract for the semi-circular seats December 13, 1891, and received payment in full.

The Hallowell Granite Co. did not entirely complete their contract until April 14, 1892, or 138 days after the time limit as fixed in the contract had expired. For the delinquency they were fined \$250.

The contract for furnishing a bronze fountain railing was awarded to the American Brass & Metal Works of Detroit, Michigan. The large center piece for the fountain was furnished and set in place by the Scoville Plumbing Co. of Des Moines.

By direction of the Executive Council several changes were made in the details of the Weidenmann plans, the most important of which will receive notice here.

The heighth of the stone enclosure wall was reduced on the west and south sides from 4 feet to  $2\frac{1}{2}$  feet, and on the east side from 2 feet to  $1\frac{1}{2}$  feet. The "turf gutters" parallel with the enclosure wall, and the system of sewers and catch basins for disposing of surplus rain water on the lawns has been omitted. Catch basins have also been omitted from all walks, except the main approach from the west.

It was the original intention to attempt to secure a blue grass sod on the grounds by seeding, but it became evident during the spring of 1891, with its attendent rains, that it would be very expensive and troublesome to keep the steep slopes intact until the grass roots could secure a firm hold. It was found that single rains were sometimes sufficient to form gullies two to three feet deep. Bids were then received and a contract awarded for laying blue grass sod, the intention being to have the steep slopes adjacent to the streets sodded, while it was thought seeding might be successful on the level portions near the building. It was thought two and one-half acres might be seeded, leaving five acres to be sodded at an expense of about \$1,800.00. As the work progressed, however, it was deemed advisable to sod the entire surface. This has been done at an expense for sodding as per contract:

| 3,276.37 squares @ 80 cents                         | .\$2,621.10 |
|---|-------------|
| Extra grading                                       | 31.60       |
| Rolling, mowing and caring for lawn to July 1, 1892 |             |
| Total   | .\$2,916.36 |

Instead of the bronze fountain railing proposed by Architect Weidenmann, which the lowest bidder proposed to deliver for \$2,200, a simpler and more substantial design was selected, costing \$418.46. The Weidenmann design for fountain center piece was rejected, and a design from the manufactory of J. L. Mott was ordered at a cost of \$1,750 set in place complete.

The total expenditures up to and including July 11, 1892, amounted to \$94,242.05, as shown by vouchers on file in the office of the Auditor of State. The following contracts have not yet been completed: Karl Gerhardt, pioneer group in statue bronze, \$4,500.00; Alex. Doyle, coat of arms tablet, \$650.00; drinking fountain tablet, \$550.00. Balance which will remain after the above work has been accepted and paid for, \$57.95. In addition to this amount there remains a balance of \$114.59 due this fund from H. C. Davis, on a contract entered into by him for clay taken from the State Capitol grounds and delivered to said Davis. By direction of the Executive Council this account has been placed in the hands of Thomas A. Cheshire, of Des Moines, for collection.

All the plans furnished by Mr. Weidenmann, together with the surveys, estimates, working plans, and details prepared by myself have been carefully preserved and placed on file, where they can be conveniently referred to.

Appended to this report are the following statements:

- A. A classified statement of all expenditures.
- B. A list of all vouchers, showing in whose favor issued and for what purpose.
  - C. Statement showing all cash received and from what source.

It will be seen that this is nearly all from the sale of clay and rubbish from the grounds.

D. Statement of cash paid out, to whom and for what purpose. Receipts were taken in every case where cash was paid out, and are now on file.

In submitting this, my final report, I wish to express my sincere thanks to you individually, and as an official body, for the courtesy and consideration uniformly extended; and for the confidence reposed in me during the time it has been my privilege to be connected with this work.

Most respectfully submitted,

E. W. CRELLIN,
Superintendent.

July 13, 1892.

## EXHIBIT "A." CLASSIFIED STATEMENT OF EXPENDITURES.

| On what account.                      | Amount.       |
|---------------------------------------|---------------|
| Granite                               | .\$ 40,400.04 |

#### FINAL REPORT BY THE SECRETARY OF STATE.

DES MOINES, IOWA, November 13, 1893.

Mr. E. W. Crellin, superintendent and engineer for the improvement of the capitol grounds, severed his connection with the work July 13, 1892, and the care of the grounds was assumed by the Custodian of Public Buildings and Property.

In the fall of 1892, Mr. Alex Doyle furnished, in accordance with his contract, the bronze coat of arms, for terrace center pier, and buffalo head for drinking fountain, and in September, 1893, Mr. Karl Gerhardt delivered the pioneer group, all of which statuary has been put in place and paid for.

Following is a statement of the claims allowed by the Executive Council for the completion of the improvement:

| IN WHOSE FAVOR.          | ON WHAT ACCOUNT.  | AMOUNT   |
|--------------------------|---|--|
