INTRODUCTION	1
PART I. TOTAL NUMBER OF HIGH SCHOOL DISTRICTS REPORTING VARIOUS SPECIAL PRACTICES (1963-1964 School Year) . .	2-4
PART II. NAMES OF HIGH SCHOOL DISTRICTS REPORTING VARIOUS SPECIAL PRACTICES (1963-1964 School Year)	5-65
PART III. EDUCATIONAL EXPERIMENTS REPORTED BY IOWA PUBLIC SCHOOLS (1963-1964 School Year)	66-87

Introduction

Research and experimentation in education is extremely important. Changes in classroom instruction will be few, spasmodic, and not necessarily an improvement when left to the "trial and error" method. Outmoded principles should constantly be superseded by more effective and broader concepts. Improvement of instruction involves a search for new knowledge or a reorganization of existing knowledge into new patterns. Our cultural strength, a generation hence, will depend on the kind of education we develop now.

Educational research must serve the same function for education that research and development serve in science, medicine, industry and the military. To accomplish this there must be a great increase in the amount of research and experimentation in education; it must draw upon all fields of specialization; it must tackle the simple as well as the most perplexing and significant problems; and it must relate itself closely enough to practice so that its results will make a difference. Research projects should be designed to collect accurate and useable data and to provide a method of evaluation.

To increase the efficiency of the educational systems in Iowa, 16 area education districts have been formed. This provides the framework within which local school districts, county school systems, institutions of higher education, and the Department of Public Instruction can co-operatively identify problems relating to improvement of instruction, constructively pool their thinking and facilitate a means of unified action toward the solution of problems in education.

Educators are becoming more aware of the need for improvement in educational programs and administrative procedures in our schools. Both lay and school people are asking many questions regarding the effects of new innovations in teaching methods, curriculum materials, and teaching devices. This survey was made to ascertain what special practices are in operation and what educational experimentation is being done in Iowa high school districts. The information was obtained from local school districts through the county superintendents' offices. The report is composed of three parts: Part I is a summary showing the total number of high school districts reporting various special practices; Part II lists the names of the high school districts reporting these practices; and Part III sets forth educational innovations and experiments which were reported.

An attempt has been made to make this survey as complete as possible, but there may still be worthwhile experiments that were not reported.

This survey is an example of how information reported to the State Department of Public Instruction by Iowa schools may be summarized and tabulated and returned to each school for local use. It is hoped the information will be helpful in keeping you better informed about new educational practices in education in Iowa public schools.

PART I

TOTAL NUMBER OF HIGH SCHOOL DISTRICTS REPORTING VARIOUS SPECIAL PRACTICES
(1963-1964 School Year)

ADULT EDUCATION

206 Continuing program
13 Leading to high school diploma

AUTOMATIC DATA PROCESSING
USED IN FOLLOWING AREAS
(One or more checked,
as applicable):

24 Finance
6 Attendance
13 Grade reporting
2 Census
13 Class scheduling

18 Equipment owned
3 Equipment rented
14 Service Center used

CURRICULUM

Curriculum Designed Specifically for
Gifted:

22 Elementary
33 Junior high
44 Senior high

128 Curriculum Development Under a
Planned Program

Exploratory Program in Junior High
School:

319 Industrial arts
320 Homemaking
145 Typing
180 Art
129 Science
27 Vocational Agriculture
78 Other

Non-Reimbursed Special Classes or
Provisions for the Following Areas:

11 Visual handicap
16 Hearing handicap
9 Orthopedic handicap
16 Educable mentally retarded
14 Trainable mentally retarded

EXPERIMENTAL STUDIES--MATHEMATICS

63 School Math Study Group (SMSG)
18 University of Illinois Committee on
Math (UISCM)
29 Ball State Teachers College Materials
9 University of Maryland Materials
10 Greater Cleveland Materials
27 Other

EXPERIMENTAL STUDIES--SCIENCE

16 Chemical Bond Approach
8 Chemical Education Materials Study Group
45 Biological Sciences Curriculum Study
(BSCS)
0 Geology Study Group Materials
39 Physical Science Study Committee (PSSC)
4 Other

139 FOREIGN LANGUAGE(S) TAUGHT IN
ELEMENTARY GRADES

Grade level: (K)-2; (1)-4; (2)-5; (3)-6
(4)-19; (5)-37; (6)-80; (7)-71; (8)-71

INTERNAL ORGANIZATION

Accelerated Programs:

32 By grade level
99 By subject matter area
36 Advanced placement (taking college
level courses while in high school)

83 Block of time (junior high teachers
have pupils two or more consecutive
periods per day)

173 Closed Noon Hour

Cooperative Instruction Between School
Districts:

53 Where teachers travel
21 Where pupils travel

Cooperative Instruction Within School Districts:
173 Where teachers travel
51 Where pupils travel

Core Program:
21 Elementary
26 Junior high
7 Senior high

Departmentalization:
7 Primary
119 Intermediate
367 Junior high

Double Session School Day:
0 Elementary
0 Secondary
62 Pupil Activities All During Regular School Day

Team Teaching:
27 Elementary
19 Junior high
21 Senior high

Ungraded Program:
26 Primary
13 Intermediate
5 Junior high

KEY SORT CARDS
 USED IN FOLLOWING AREAS

6 Attendance
16 Grade reporting
69 Class scheduling
2 Other

67 LAY ADVISORY COMMITTEE
 TO THE SCHOOL BOARD

27 MICROFILMED RECORDS

PERSONNEL PRACTICES

In-Service Education for Teachers:
377 During the school year
105 Other than during school year
191 Release time

Persons employed as:
43 Teacher aides
103 Clerical aides

Person in Charge of Public Relations:
0 Full-time
2 Half-time
65 Less than half-time

Person in Charge of Pupil Activities:
8 Full-time
11 Half-time
107 Less than half-time

Person in Charge of Research:
0 Full-time
5 Half-time
43 Less than half-time

PUBLIC RELATIONS TECHNIQUES

9 Documentary film about the school
37 Radio program
3 Daily
18 Weekly
1 Monthly
15 Other
16 TV program
3 Daily
4 Weekly
1 Monthly
8 Other
222 Weekly or monthly school bulletin
245 Column in local paper
321 Annual report to local Board of Education. 24 used pictorial report.

REPORTS TO PARENTS--ELEMENTARY

411 Combined report cards and conferences
21 Report cards only
6 Conference only
25 No response

REPORTS TO PARENTS--SECONDARY

282 Combined report cards and conferences
161 Report cards only
3 Conference only
17 No response

RESEARCH

131 Comprehensive self-evaluation of school program
199 Dropout study
291 Graduate follow-up study
11 Other

TEACHING TECHNIQUES

TELEVISION USED AS:

- Language Laboratories:
2 Elementary
30 Junior high
107 Senior high
- 98 Controlled Reading Machines
 Grade level: (K)-4; (1)-12;
 (2)-14; (3)-28; (4)-38; (5)-37;
 (6)-42; (7)-48; (8)-53; (9)-45;
 (10)-33; (11)-29; (12)-27
- 36 Programmed Material with Teaching
 Machine
 Grade level: (1)-6; (2)-7;
 (3)-8; (4)-10; (5)-9; (6)-11;
 (7)-11; (8)-12; (9)-13; (10)-10;
 (11)-9; (12)-12
 Subject: Communication Skills-15;
 Foreign Language-1; Mathematics-12;
 Science-2; Social Studies-2
- 75 Programmed Material Without Teaching
 Machine
 Grade level: (K)-3; (1)-6;
 (2)-7; (3)-9; (4)-20; (5)-19;
 (6)-23; (7)-24; (8)-25; (9)-27;
 (10)-31; (11)-29; (12)-34
 Subject: Agriculture-1; Business
 Education-1; Communication Skills-36;
 Industrial Arts-1; Foreign Language-4;
 Mathematics-41; Music-1; Science-8;
 Social Studies-4

- 241 Supplementary instruction
87 Actual classroom instruction
1 Closed circuit

TEXTBOOKS
 (14 districts checked
 one or more, as applicable.)

- 379 Rented
6 Purchased by pupils
92 Furnished free by district

TRAVELING LIBRARIES

- 62 From building to building
66 From outside sources (such as science
 traveling libraries, etc.)
102 From city library
152 From county superintendent's office
4 From county library

95 OTHER PRACTICES REPORTED

221 REMEDIAL OR CORRECTIVE
 COURSES

- Grade level: (K)-8; (1)-82; (2)-118;
 (3)-160; (4)-171; (5)-171; (6)-162;
 (7)-107; (8)-103; (9)-54; (10)-34;
 (11)-27; (12)-26
 Subject: Agriculture-1; Art-1;
 Business Education-1; Distributive
 Education-1; Safety Education-1;
 Communication Skills-195; Health-2;
 Homemaking-2; Industrial Arts-2;
 Foreign Language-2; Mathematics-39;
 Music-1; Science-6; Social Studies-5

PART III

EDUCATIONAL EXPERIMENTS REPORTED BY IOWA PUBLIC SCHOOLS (1963-1964 School Year)

ABILITY GROUPING

Ability Grouping--Elementary Grades

English Valleys Community School District, North English, Iowa

A continuing program involving 600 pupils of all ability levels, in grades 1-8. The purpose is to reduce the ability range of pupils in classrooms, give the slower pupils more time to grasp fundamentals, and develop an enriched program for the fast learners. Iowa Basic Skills Tests given in January each year. Test results, teacher evaluations, and expressions of parents and pupils are used in placing pupils in two or three groups, depending on the total number of pupils in the grade at each attendance center. A written description is being prepared. Person in charge is Wilma McCune, elementary supervisor.

Ability Grouping--Grades 7-12

West Lyon Community School District, Inwood, Iowa

A total of 459 pupils in grades 7-12, enrolled in required courses, are grouped into three sections according to ability. Methods of teaching and materials used are adapted to the level of the group. Evaluation is by achievement tests and teacher appraisal. A written description is not available. Person in charge is Lincoln Henry, superintendent.

Class Grouping

Hudson Community School District, Hudson, Iowa

A continuing program, started in 1962, involving 304 pupils in grades 1-6. The purpose is to narrow the range of individual differences in each class section. Pupils are divided into these six groups: High-highs, low-highs, high-middle, low-middle, high-low, and low-low. The top three groups comprise one grade section and the lowest three make up the other. In each classroom two of the groups are contiguous so movement within the class is facilitated. If change is desirable, inter-class transfers need be made for only one group in each room. Evaluation is by Iowa Basic Skills Testing program, teacher constructed tests, and observations. A written description is being prepared. Person in charge is Melvin Thurston, elementary principal.

Self Contained Room--Lower Section in Grade 7

Interstate 35 Community School District, New Virginia, Iowa

Started in 1963. Thirty-two seventh grade pupils of low ability level are taught all subjects except art, music, and physical education in a self contained room to determine if the group will do better academically than if under the departmentalized plan. Teaching material is adapted to the ability of the group. Evaluation is by the Iowa Basic Skills Tests and other tests. A written description is not available. Person in charge of the experiment is Charles Wayne Breeding, classroom teacher.

DEPARTMENTALIZATION

Departmental Plan--Elementary Level

Burlington Community School District, Burlington, Iowa

Four elementary schools were selected to act as pilot schools during the 1960-1961 school year, in an attempt to improve learning opportunities. A modified departmental plan was introduced in September in 1961 in all Burlington schools for grades four, five and six. Pupils begin with a homeroom teacher, move to another room for a half-day of language arts and social studies, then spend the other half-day on other subjects. Fifty minutes periods are provided for each of three teachers; one teaches art and music, another science and physical education, and a third, arithmetic. A continuing evaluation is being made. A written description is available. Person in charge is Mrs. Loretta Gray, director, elementary education.

Departmentalization--Grades 7 and 8

Hedrick Consolidated School District, Hedrick, Iowa

A continuing program started in 1962-1963, involving 43 average pupils. The purpose is to provide instruction in the areas of general science, homemaking and shop in an atmosphere which will help pupils become better adjusted. Pupils in grades 7 and 8 were previously in self-contained classrooms. Teachers are now better utilized in their fields of specialization. Evaluation is by noting teacher-pupil relationships, personality growth and development of pupils, expressions of interest by pupils, and improved study habits. A written description is not available. Person in charge is A. D. Hensleigh, superintendent.

EXCEPTIONAL CHILDREN

Gifted--Seminar Courses in Advanced Subject Areas

Northwood-Kensett Community School District, Northwood, Iowa

A continuing study, started in 1963. The purpose is to provide additional enrichment for pupils of high ability, beyond the scope of the regular program of studies. Each of three 12th grade pupils pursues a program of advanced individual studies in a given area--English literature, French, and Biology. Pupils meet with the instructor once each week to evaluate work and determine future assignments. Emphasis is placed on creative and laboratory type projects. Credit given will be determined by a special committee, based upon quality and depth of work done by the pupil. Evaluation made from records of pupils, special tests, and written assignments. A written description is being prepared. Person in charge is Robert Scheibe, senior high school principal.

Slow Learners--Grades 7-9

Clarion Independent School District, Clarion, Iowa

Program started in 1959 with about 15 pupils enrolled. The main purpose of this program is to keep pupils in school. Subject content adjusted to the pupils' ability with special projects in shop and home-making. Evaluation by use of tests. A written description is not available. Person in charge is Hermey Shultz, principal, junior high school.

Itinerant Teacher for the Partially Sighted
Special Education Services, Buena Vista, Cherokee, Ida, and Sac Counties

A pilot study started in 1963, to be completed 1964-1965. Fifteen pupils of average ability, selected by the amount of vision and educational achievement, from grades 1 through 10 are included in the study. The purpose is to evaluate the need for establishing the position of itinerant teacher for the visually handicapped child in a multi-county rural area in need of a reinforced program in the curriculum areas. The teacher visits each child in his own particular school at regular intervals. Individual instruction is given in the areas which are particularly difficult for him because of a visual handicap. The teacher supplements or reinforces regular classroom work. Special equipment, aids, and materials are utilized to make it possible for the partially seeing child to function with a minimum of difficulty. An evaluation is to be made to determine the effectiveness of such a program and measure parent and pupil reaction. Pupil personality and academic development will be investigated to determine gains made in past years on regular group achievement tests and compare with achievement gains on same type group tests after one year of the itinerant teacher program and again after two years. A written description is not being prepared. Person in charge is Darrel G. Minifie, special education director, Buena Vista, Cherokee, Ida, and Sac Counties, 530½ Erie, Storm Lake, Iowa.

EXPLORATORY PROGRAMS

Exploratory Art--Junior High School
Wellsburg Community School District, Wellsburg, Iowa

Program started in 1963-1964, involving 82 pupils in grades 7 and 8. Purpose is to develop an appreciation and interest in art that will be carried over into high school in an expanded program. Groups are sectioned on the basis of ability and interest. Art is taught on an exploratory basis, using test and materials as required for various projects. Evaluation by teacher observation. Person in charge is Mrs. Nina McVeety, art instructor.

Exploratory Courses--Science, Shop, Homemaking, and Language
Springville Community School District, Springville, Iowa

Started in 1963 and to be completed in 1965. Approximately 100 junior high school pupils in grades 7 and 8 spend nine weeks exploring four subjects in the areas of science, shop, homemaking, and language. Four teachers have four sections, making it possible for each to teach in her own field. No means of evaluation reported. A written description is not being prepared. Person in charge of experiment is Robert Kline, high school principal.

Vocational Shop
West Sioux Community School District, Hawarden, Iowa

A continuing program, begun in 1963, to add to the saleable skills of non-college bound boys. Sixteen average or below average boys in grades 11 and 12, are taught, in classes of eight at one time, four

units--welding, drafting, carpentry, and small engine repair--for a period of nine weeks each. It is hoped that the program can be expanded to lower classes. Evaluation is by observation and by follow-up surveys to determine the types of jobs pupils obtain. A written description is not available. Persons in charge are Elwood Iverson, agriculture teacher, and Clinton Halle, shop teacher.

LANGUAGE ARTS

Language Arts--Block of Time

Central (Clinton) Community School District, DeWitt, Iowa

A continuing study begun in 1963. Approximately 250 pupils in grades 7-8 have a double period of combined subjects--reading, spelling, grammar, and literature--to develop better correlation in the language arts. Means of evaluation has not been determined at present time. A written description is available. Person in charge is Kern Severtson, principal, DeWitt Elementary School.

Language Arts--Remedial

Dike Community School District, Dike Iowa

A continuing program started in 1963 involving 20 pupils of low ability in grade 9. The purpose of the program is to remedy deficiencies in reading and language usage for the less able pupils entering the 9th grade. Pupils are identified, tested, and sectioned according to results on tests and teacher judgement. These pupils are then given work with reading materials and the programmed text on English usage. Evaluation is by post-tests on the English text and progress charts used with SRA materials, and achievements tests. A written description is not available. Person in charge is Mrs. Luella S. Santee, instructor in English and reading.

Reading--Developmental, Remedial, and Speed

Council Bluffs Independent School District, Council Bluffs, Iowa

Reading program started in 1951 for pupils who were slow readers but with high I.Q.'s. The purpose is to determine if school marks increase in relation to ability to read. Approximately 75 pupils from all grades are involved each year. Emphasis is on development of speed in reading. Pupils read under pressure, thus increasing concentration and comprehension. Pressure is induced by placing a time limit on materials to be read and by drills which limit time spent per page. Results so far show that speed of reading has increased about four times. A description of this project is being prepared. Person in charge is Dorothy Ricke, teacher, Thomas Jefferson High School.

Reading--Elementary

Boone Valley Community School District, Renwick, Iowa

A program started in 1963, to be completed in 1964, to individualize reading and eliminate duplication at each grade level. Approximately 175 pupils in grades 2-6, with two sections in each grade, are divided into four reading groups according to reading ability. Each teacher has two reading groups, using materials which that group is most capable of using. Evaluation is by pupil progress and by teacher evaluation. A written description is not available. Person in charge of the experiment is R. Wesley Carlson, superintendent.

Reading--Grouping According to Number of Sections in Each Grade
Forest City Community School District, Forest City, Iowa

A continuing program begun in 1959 for all pupils in grades K-6. The purpose is to provide more effective reading programs. Pupils are grouped according to reading level into the number of groups or sections involved in each grade. Each elementary teacher is responsible for one of the sections. Evaluation is by use of reading and basic skills tests. A written description is not available. Person in charge is E. Vern Wegner, head elementary principal and Lloyd Nelson, elementary supervisor.

Reading Improvement--Grades 7 and 8
North Polk Community School District, Alleman, Iowa

A continuing program, begun in 1959, involving 90 pupils in grades 7 and 8. The purpose of the program is to improve reading speed and comprehension by working with small groups and using reading machines and SRA reading materials. General evaluation is by teachers observing whether there is improvement in other subjects. A written evaluation is not available. Person in charge is Burrell G. Smith, principal.

Reading--Independent Study
Britt Community School District, Britt, Iowa

A continuing study, started at the beginning of the second semester, 1962-1963 school year. There are 120 pupils in grades 3-6 that spend two periods weekly in basic reading and three periods weekly in the library under the supervision of the librarian and the four teachers. Reading tests are used to evaluate reading growth. A written description is not available. Person in charge is Charles C. Mullin, elementary principal.

Reading--Joplin Plan
Orient-Macksburg Community School District, Orient, Iowa

Started in 1963, to be completed in 1964. The purpose is to improve reading. Reading is taught to all pupils (total of 82) in grades 3, 4, 5 and 6 during the same period each day. An ungraded reading program in which pupils read with a group of equal ability. Evaluation is by standardized tests, teacher observations, and by testing a control group to compare with an experimental group. A written description is available. Person in charge is William Slicker, elementary principal.

Reading--Joplin Plan
Shenandoah Community School District, Shenandoah, Iowa

The program was begun in 1963 and involved 275 pupils in grades 4, 5 and 6. The purpose is to improve reading comprehension and to integrate reading and the language arts. The program is patterned after the Joplin, Missouri Reading Program. Iowa Elementary Reading Test was administered and scores arranged from the highest to the lowest. All pupils at the fifth grade reading level are placed in the same classes. The same is done for grade 6. In these two grades a remedial class was organized for pupils whose reading abilities were below grade 5. A top group was organized for those reading material at the 7-9 grade level. Evaluation is by means of tests. A written description is not available. Person in charge of the program is L. A. Logan, superintendent.

Reading--Non-Grade Level

Springville Community School District, Springville, Iowa

Approximately 250 pupils in grades 1-5 have all reading scheduled at the same hour during the 1963-1964 school year. The reading level of each child was predetermined. More phonetic help is given and a feeling of success in reading developed. At the appointed time children will pass to their reading grade level. Evaluation is by reading tests. A written description is not available. Person in charge is E. B. Lynch, superintendent.

Reading--Non-Grade Level

Storm Lake Community School District, Storm Lake, Iowa

A continuing program, started in 1962. One day each week 1,000 pupils enrolled in grades 1-6 have a reading period during which the group is taught on the true reading level, regardless of grade classification or age. Only evaluation is based on teacher opinion, but the program appears to have significant value. A written description is not available. Persons in charge are Robert Thompson and Virgil Pithon.

Reading--Three Track Program

Glenwood Community School District, Glenwood, Iowa

A continuing program, begun in 1960, to be completed in 1963-1964. The purpose is to improve the over-all reading program. Approximately 900 pupils in grades 1-8 follow a three track program, using three reading series. Pupils are grouped according to achievement. The special reading improvement classes use materials fitted to the pupils' individual needs and interests. Evaluation is by tests (achievement and interest), and by pupil and teacher interest and cooperation. A written description is being prepared. Person in charge is Genevieve Raine, reading supervisor.

Spelling--Programmed Materials

Grinnell-Newburg Community School District, Grinnell, Iowa

A continuing program started in 1963 to be completed in 1965. The purpose is to improve spelling by increasing the pupil's understanding and ability to use basic spelling principles. Approximately 100 pupils of all ability levels, in grades 7 and 9, were pre-tested, using applications of general spelling principles. Following use of the SRA materials, an achievement test will be administered to measure pupil achievement. Locally-designed evaluating procedure will also be used and spelling checked in everyday written work. A written description is being prepared. Person in charge is Beryl Wellborn, director of curriculum, junior high school.

MATHEMATICS

Mathematics--Algebra Pilot Study of Programmed Instruction Council Bluffs Independent School District, Council Bluffs, Iowa

Pilot study started the last semester of 1963, involving programmed instruction (TEMAC) for pupils in grades 10-12. The class consisted of pupils who had either failed a course of algebra or who had taken general mathematics and were switching to algebra. The purpose of the program is to learn whether or not programmed-learning materials are suitable for a class composed of pupils having a wide range of abilities. The results to date will serve as a guide to further experimentation. A description of this project is available. Person in charge of the experiment is Bob England, coordinator.

Mathematics--Elementary Pilot Studies Mason City Independent School District, Mason City, Iowa

A continuing program started in 1962, to be completed in 1966. "New math" materials are being used in double and triple unit elementary buildings with 976 pupils of all ability levels in grades K-6, to determine the direction the elementary mathematics program takes in the future. Staff members are being acquainted with the new methods and techniques through in-service training. Evaluation is by informal observation and objective testing (comparative study). A written description is not available. Persons in charge are John H. Tidball and Lenore Cliffore, elementary principals.

Mathematics--Five-State Evaluation of Curricula

The Minnesota National Laboratory located in the Centennial Building, St. Paul, Minnesota, received a National Science Foundation grant to make an evaluation of experimental mathematics curricula. They chose the following programs to evaluate: School Mathematics Study Groups Materials 7-12, Ball State 9-12, Maryland 7-8, and Illinois 9-10.

Mathematics teachers in the five states, Iowa, Minnesota, North Dakota, South Dakota, and Wisconsin, were asked to volunteer for this project. The entire project will be in effect for a total of five years. During the first year, a teacher gives tests to pupils enrolled in traditional courses. Teachers are then selected to teach the experimental materials mentioned above. An attempt has been made to select these teachers from all sections of the state.

An elaborate testing program will provide data to be compiled and analyzed with electronic equipment. The results will eventually be fed back to the teachers involved in the project. Schools reported as participating in this program are listed below. (The names of the schools were obtained from an official list prepared by the National Laboratory, Centennial Building, St. Paul, Minnesota.)

First Phase

NAMES OF SCHOOLS AND TEACHERS WHO TAUGHT EXPERIMENTAL CLASSES IN THE
EVALUATION OF SECONDARY MATHEMATICS CURRICULA DURING THE
SCHOOL YEAR 1962-1963 AND ARE CONTINUING TO TEACH
DURING THE SCHOOL YEAR 1963-1964

<u>School District</u>	<u>School</u>	<u>Grade</u>	<u>Text</u>	<u>Teacher</u>
Aurelia Comm. Sch. Dist.	Aurelia H.S.	9	SMSG	Fett, Gordon F.

Mathematics--General, Grade 9

Missouri Valley Independent School District, Missouri Valley, Iowa

A continuing program started in 1961-1962 with 35 pupils of medium and low ability levels in grade 9. The purpose of the program is to maintain interest and alertness in pupils who have had difficulty with basic arithmetic. New ideas of grouping, other number systems, and practice in arithmetic fundamentals are included in the program. Evaluation is by observing interest of pupils and by arithmetic tests. A written description is not available. Person in charge is Richard Nissen, mathematics instructor.

Mathematics--General, Using Programmed Materials

Grinnell-Newburg Community School District, Grinnell, Iowa

Program started in 1963 to be completed in 1965. The purpose is to increase pupil's understanding of the principles of general mathematics and their application. Twenty-nine average and below average 9th grade pupils enrolled for general mathematics are using Temac's Basic approach to make mathematics more meaningful. Pupils work with programmed material and teachers meet with individuals to ascertain their progress. Periodic check-up lessons are used and re-teaching accomplished as necessary. Evaluation is by ITED test scores and use of locally designed evaluating instruments. A written description is being prepared. Person in charge is Beryl Wellborn, director of curriculum, junior high school.

Mathematics--Laboratories

Carlisle Consolidated School District, Carlisle, Iowa

Marion Independent School District, Marion, Iowa

As a result of the National Defense Education Act of 1958 the Iowa State Department of Public Instruction in cooperation with the local school boards of Carlisle and Marion developed two full-scale mathematics laboratories in an effort to evaluate the effectiveness of various types of equipment and materials suitable for use in mathematics classrooms. All types of audio-visual equipment and materials, teaching machines, and programmed materials are used in these laboratories. Particular emphasis is placed on library enrichment materials. The Carlisle laboratory has 28 printing calculators on a loan basis and is experimenting with a new General Mathematics II course adapted to the use of these machines. Extensive use is made of teaching machines and programmed materials in the Marion laboratory. New approaches to teaching mathematics using these laboratories are being carefully evaluated.

Persons in charge are:

Frank E. Burton, mathematics instructor, Carlisle High School
Richard Sorensen, principal, Marion High School; and John
Fowler, principal, Marion Junior High School.

Mathematics--Modern Vs. Traditional Methods

Dallas Center Community School District, Dallas Center, Iowa

The project was started in 1963-1964. The purpose of the study is to determine the value of modern methods of teaching mathematics as compared with traditional methods. Two groups, each with 23 pupils in grade 9, are used in the study. One is a control group, using regular algebra textbooks and materials, and an experimental group, using the Ball State Teachers College materials. Evaluation to be made by the University of Minnesota. No written description is available. Person in charge of project is Loyd A. Johnson, superintendent.

Mathematics--"New," Grades 1-9

Muscatine Community School District, Muscatine, Iowa

A continuing program started in 1961, to be completed in 1964. Approximately 450 average to low pupils in grades 1-9 are being compared with pupils in regular mathematics classes, using achievement based upon I.Q. scores. A written description is not available. Person in charge of experiment is Kenneth W. Huber, principal, Garfield Elementary School.

Mathematics--Project Go

Cedar Falls Community School District, Cedar Falls, Iowa

This program, involving 3,000 elementary pupils, was started in 1963-1964. The purpose is to improve methods of teaching mathematics. Instructors attend six in-service training workshops. Pupils prepare their own report to parents seven times throughout the year. Method of evaluation is set up by each building principal and teachers involved. A written description of the project is available. Person in charge is Marvin W. Ziesmer, assistant superintendent.

Mathematics--SMSG Materials

Cedar Falls Community School District, Cedar Falls, Iowa

A continuing program, involving 250 primary pupils in arithmetic, started in 1962-1963 to be completed in 1963-1964. The purpose is to evaluate SMSG materials. Newly prepared materials are being tested through usage. Program includes sets, numbers, geometric figures, measurement, pre-multiplication, experiences and coordinates. No written description is available. Person in charge is Marvin W. Ziesmer, assistant superintendent.

Mathematics--SMSG Materials

Osage Community School District, Osage, Iowa

A continuing program in mathematics, involving pupils in grades 9-11, started in 1961-1962, to be completed in 1962-1963. The purpose of the program is to create greater interest on the part of pupils in mathematics. Evaluation will be made by the Minnesota Laboratory Mathematics Testing Program. No written description is available. Person in charge is Le Roy Huegli, mathematics instructor.

MODERN FOREIGN LANGUAGE

French--Elementary

West Burlington Independent School District, West Burlington, Iowa

Elementary French was started in 1961 in second grade and now involves 124 pupils in grades 2-4. Instructional materials used are records, flashcards, charts, pictures, games and books. A written description is being prepared. Persons in charge are K. Marie Stolba and Clara McConnell, French, music and English teachers.

French--Seven Year Program

Dike Community School District, Dike, Iowa

A program continuing for seven years in the same foreign language (French) with pupils beginning in grade 5 and continuing through grade 12. The purpose is to develop a higher degree of proficiency in the language studied than is possible in the conventional secondary program. ALM and FLES materials and language laboratory are used. Evaluation is made by ALM standardized tests and teacher judgement. A written description is available. Person in charge is James Becker, instructor in French.

German--Elementary

Williamsburg Community School District, Williamsburg, Iowa

Purpose is to teach pupils to speak and read a modern foreign language. Beginning in 1959, German has been taught to all pupils in grade 3. Most of the slow pupils lose interest after the first year and do not continue with German. The program is in its fifth year, with a total of about 200 pupils involved, and has reached the seventh grade level. German is also offered at the eighth grade level on an exploratory basis, and it is planned to eventually expand the teaching of German to a ten year program. When the elementary pupils who have been taking German enter high school and enroll for a foreign language, their progress can be compared with that of others not included in the experiment. A description of the program is not available. Person in charge is H. C. Messer, superintendent.

Language Laboratory

Indianola Community School District, Indianola, Iowa

A complete language laboratory console and 30 booths used in teaching French, German, and Latin to approximately 300 pupils (grades 9-12), to improve the foreign language instructional program. Open to all foreign language pupils. Teacher and standardized tests are used to evaluate this continuing program, begun in 1963. A written description is being prepared. Person in charge is Louis E. Smith, principal.

Spanish--Conversational

Wapello Community School District, Wapello, Iowa

This program in Spanish was started in 1960 on a voluntary basis for sixth grade pupils. The class meets for 30 minutes, two days weekly before school. Films, records and tapes are used. An evaluation was made last year by two visiting foreign language teachers. A written description is available. Person in charge of the program is Jack Brase, elementary principal.

MUSIC

Correlation of Musical Aptitude, Academic Achievement, and Intelligence

Monticello Community School District, Monticello, Iowa

A testing program begun in 1963 to be completed in 1964 involving approximately 1,000 heterogeneous pupils in grades 4-12. The purpose is to measure the correlation between musical aptitude, academic achievement, and intelligence. Test materials are provided by the State University of Iowa. Pupils are tested by the Lorge-Thorndike Tests, musical aptitude tests, and achievement tests in the fall, followed by a short-form musical aptitude test in the spring. Evaluation is by means of these tests. A written description is available. Person in charge is Ed Gordon, associate professor of music, State University of Iowa, Iowa City, Iowa.

Music Theory

Eldora Community School District, Eldora, Iowa

A continuing program started in 1962 with 8 pupils enrolled. The course consists of work in the following areas: Melodic and rhythmic dictation; mechanics of conducting; study of musical form; exploration of music history and mechanics of composition. The purpose of the course is to increase the individual's awareness of and interest in the many aspects of music from conducting through performing, listening and composing. Evaluation is done by periodic tests on lectures and examination of work being done on composition. A written description of the project is being prepared. Person in charge is Frank Ellington, instrumental music instructor.

PHYSICAL FITNESS

The National Physical Fitness Project

North High School (Grades 10-12), Des Moines Community School District
Des Moines, Iowa

George Community High School District (Grades Kg-12), George, Iowa

Ruthven Community School District (Grades Kg-12), Ruthven, Iowa

West Sioux Community School District (Grades Kg-12), Hawarden, Iowa

Four pilot schools were chosen by the Iowa Governor's Council on Physical Fitness to participate in the National Youth Fitness Project. The program includes: health appraisal of all pupils and regular health and safety instruction; a minimum of 15 minutes of vigorous activity as part of the daily program; a screening test administered to all pupils to identify the physical under-developed and progress tests on physical achievement three times a year; and the requirement that pupils not be excused from physical education classes for participation in varsity athletics, marching band, driver education or similar activities.

Persons in charge are:

Dr. Norman White, principal, North High School; Jay Speake, superintendent, George Community School District; Richard Barber, physical education, Ruthven Community School District; Roger Blake, superintendent, West Sioux County School District.

PROGRAMMED MATERIALS

Programmed Materials--American Government

Monticello Community Schools, Monticello, Iowa

An experimental class in American Government with 33 pupils enrolled, using programmed materials provided by the State University of Iowa. Three other classes serve as control groups using the traditional method of instruction. Tests will be given at various intervals during the semester to evaluate the effectiveness of the programmed materials used by the experimental class. A written description is available. Person in charge is William R. Curtis, teacher, American government.

Programmed Material--American Government

Mt. Pleasant Community School District, Mt. Pleasant, Iowa

Begun in 1963, to be completed in January, 1964. Involved are 34 average pupils in 12th grade. Purpose is to study the effectiveness of programmed material in social studies (American government) and to investigate pupil attitudes toward this method of learning. Programmed material is used in place of a text book. Teacher and pupils still participate in learning situations as a class and in groups. Evaluation is by pre-testing and post-testing, using standardized and unit tests to check the effect of change. A written description is not available. Person in charge is Jerry Bush, high school teacher, American Government.

SCHEDULING

Modified High School Schedule

George Community School District, George, Iowa

A continuing program started in 1963. An experiment in utilizing 70 minute periods, 4 days per week, in grades 7-12. The purpose is to provide supervised study time during the class period and to eliminate the traditional study halls. A copy of the schedule and a written description of the program is available. Persons in charge are J. B. Speake, superintendent, and Robert Thompson, principal, high school.

Modified High School Schedule

New London Community School District, New London, Iowa

Flexible scheduling started in 1963. The purpose is to provide pupils (grades 9-12) an opportunity for more variation and enrichment and extended time for project usage. Classes meet only four days per week with a rotating double period class. Evaluation by teacher and pupil opinions. A written description is being prepared. Persons in charge are F. M. Hartung, superintendent and Keith Campbell, principal, high school.

Modified Junior High School Schedule

Forest City Community School District, Forest City, Iowa

Started in 1963, the program will be continued if proven satisfactory. Approximately 325 junior high school pupils (grades 7-9) are involved. The purpose is to make more effective use of study time and to make teaching by the individual teacher more effective. Four basic 80 minute periods are arranged to eliminate excessively large study halls. The study period is under the supervision of the teacher making the assignment. Evaluation is by constant supervision to ascertain whether or not teachers are providing study time as intended and not using the full 80 minute period for lecture. A printed schedule is available, but not a written description of the program. Person in charge is E. Vern Wegner, principal, junior high school.

SCIENCE

Advanced Science--Senior High School

Forest City Community School District, Forest City, Iowa

Started in 1963, the program involves three above average pupils in grade 12, having a high scientific interest and aptitude. The purpose is to provide for advanced scientific training for the gifted in the areas of physics, chemistry and biology. Evaluation is by observing progress of pupils throughout the year. A written description is not available. Person in charge is Norman Huse, principal, senior high school.

Biology--Advanced Class Meeting on Saturdays

Carson-Macedonia Community School District, Carson, Iowa

A continuing program started in 1961-1962 for 6 to 10 above average pupils in grades 10-12. By doing much of the work on Saturdays, interested pupils may take up to three additional courses in the area of biological science over a three year period. The purpose is to give pupils an opportunity for more advanced study in the biological sciences, since only one course (biology) is offered in natural science during the regular school week. The program includes lectures, field trips, and laboratory work in advanced biology. A different course is offered each year for three years; then the cycle is repeated. A testing program is used to evaluate the experiment and a written description is available. Person in charge is Kevin W. Barker, science instructor.

Biology--Green Version

New Hampton Community School District, New Hampton, Iowa

A continuing program begun in 1963. Twenty-four 9th and 10th grade pupils, selected at random, are being taught the research or scientific method to develop skill in observation. The Green Version has as its basic theme ecology and evolution. All subjects covered in a regular biology course are included, but ecology and evolution underlie the entire course. Research and experimentation are stressed, and pupils learn by observation. Evaluation is by tests developed by Psychological Testing Service. A written description is available. Person in charge is W. J. O'Neill, biology instructor.

Chemistry Study Materials

Washington Community School District, Washington, Iowa

A continuing study begun in 1962 for the normal range of pupils in grades 10 and 11. Forty pupils are using materials from the Chemistry Study Group as outlined by the National Science Foundation to improve the science program. Emphasis is on the experimental aspect of chemistry. New experimental situations are analyzed without memorizing. Traditional topics are included, plus equilibrium, acid-base equilibrium, Le Chatelier's principles, and ionization and energy effects. Evaluation is by tests, interest in the class, and success in college chemistry courses. A written description is not available. Person in charge is Floyd Woods, high school science teacher.

Chemistry

South Hamilton Community School District, Jewell, Iowa

Begun in 1963, to be completed in 1964. Twenty-five 12th grade pupils selected from the upper quarter of the class are using the prepared outline and text, Chemistry: An Experimental Science, for the purpose of making chemistry real to the pupils through experimentation, and to expose them to the scientific method. Evaluation is by interest in the course, end of year achievement test, success in college chemistry courses, and the teacher. A written description is available. Person in charge is Glenn Morland, science teacher, Jewell Center.

Coordinating Science Curriculum

Forest City Community School District, Forest City, Iowa

Started in 1963, to avoid repetition in teaching of science in grades 7-10 and make the science program more meaningful. Approximately 500 pupils of all ability levels are involved. Specific science areas are assigned to certain grade levels. Evaluation is by general tests and teacher opinions. A written description is not available. Person in charge is E. Vern Wegner, junior high school principal.

Electronics Laboratory

Indianola Community School District, Indianola, Iowa

A continuing program begun in 1963 for approximately 45 pupils in grades 11 and 12, with varying levels of ability. The purpose is to provide unique educational training in the area of technology as it is related to electricity. No attempt is made to separate pupils according to intelligence. Evaluation is by teacher prepared tests. A written description is available. Person in charge is Dean Iverson, high school instructor.

Physics--PSSC

Missouri Valley Independent School District, Missouri Valley, Iowa

A continuing program started in 1960-1961 to provide advanced study in modern science. Twenty-eight 11th grade pupils selected with high ability are enrolled this year. Methods of evaluation to be determined. A written description of the project is available. Person in charge is Howard Cyr, science instructor.

Physics--PSSC

South Hamilton Community School, Jewell, Iowa

Begun in 1963, to be completed in 1964. Twenty-six 11th grade pupils selected from the upper quarter of the top two of three physics classes. The teacher guide for the PSSC Physics text is used to strengthen pupil's understanding of physics. Evaluation by pupils reaction to the course, an end of the year achievement test, success in college science, teacher judgement. A written description is not available. Person in charge is Glenn Morland, science teacher, Jewell Center.

Science Seminar--Grade 12

Cardinal Community School District, Eldon, Iowa

A continuing non-terminal program started in 1963, including the upper 20% of grade 12, having the initiative to investigate. The purpose is to stimulate individual curiosity and methods of study in the area of science, and develop the "scientific method" approach to the conclusion of specific problems. Pupils make independent investigating studies into specific scientific areas of their choice, including mathematics. The project method is optional. Evaluation of the program is by observation, scientific papers prepared by individual pupils, and oral reports on projects and studies. A follow-up after graduation is planned. A written description is being prepared. Person in charge is George Peebler, teacher.

Science Seminar--Grade 12

Mason City Independent School District

A continuing program begun in 1963 to provide advanced work in three areas of high school science, using the research approach. Twenty-seven superior 12th grade pupils are involved. The seminar is research centered. Each pupil selects one major project and several minor projects to work on during the year. Minor projects deal with the content being studied during the specific phase of the course. The three phases will include advanced content in biology, chemistry, and physics. Informal evaluation and results on objective tests. A written description is being prepared. Person in charge is Gerald Hanson, instructor.

Special Interest Research

Spirit Lake Community School District, Spirit Lake, Iowa

This program was started in 1963 and is designed to give pupils an opportunity to do individual research in their area of interest. Juniors enrolled in science are eligible, however, standards for selection are high; ten pupils applied and only two were selected. There is no regular class time. The research is done completely out of school in conjunction with professional persons in the community, but under the direct supervision of the science instructor. Evaluation will be made on the merits of the completed research project and on how many go into scientific fields in college. A written description is available. Person in charge is Milbert Krohn, science instructor.

SOCIAL STUDIES

Government

Brooklyn, Guernsey, Malcom Community School District, Brooklyn, Iowa

A one year program, started in 1963. One section utilized program planning as opposed to traditional study methods. Twenty-five 12th grade pupils of average ability are involved. Evaluation by a research analyst. A written description is not available. Person in charge is Don Atkinson, high school teacher.

New Social Studies Curriculum

Mid-Praire Community School District, Wellman, Iowa

A continuing study begun in 1958, to be completed in 1964. A new sequence of social studies courses was adopted, with sociology, economics, political geography, and two individual reading courses added. The Carnegie Unit of Instruction was replaced in the high school with a system that allows classes to meet on alternate days. About 500 pupils per year, in grades 7 through 12, are involved. The program is intended to improve social studies instruction by providing a wide selection of courses (11 in all) to meet the needs of both the college-bound and slow learner. A written description is available. Person in charge is Tracy Anderson, high school instructor, social studies.

Sociology and U. S. Government--Large Group Instruction

St. Ansgar Community Schools, St. Ansgar, Iowa

A continuing study, begun in 1963. Purpose of the program is to permit more effective presentation of material and allow more time for special help and project work. Sixty-three 12th grade pupils of all ability levels meet with the teacher of U. S. government and sociology in one large group, three periods per week. Small groups of 10-12 meet for two additional sessions per week. The teacher and pupils constantly evaluate the program. Pupils' grades will be compared with those of pupils in previous classes. A written description is not available. Persons in charge are Ward C. Dunn, teacher, and Wallace E. Burns, principal.

TEAM TEACHING

Cooperative Team Planning

Mason City Independent School District, Mason City, Iowa

A continuing program begun in 1963, to be completed in 1966. Seventy-six pupils of all levels of ability in the upper elementary grades are included in the experiment. The purpose is to better utilize the special abilities and interest of each teacher. This is a variation of team teaching, with emphasis on planning as a team. One teacher carries the primary responsibility for the instruction in each area, with other teachers acting as assistants. Informal evaluation used. A written description is not available. Person in charge is Kenneth Stoakes, principal, Jefferson Elementary School.

Multiple Class Instruction

St. Ansgar Community School District, St. Ansgar, Iowa

A continuing program started in 1963. The purpose is to better utilize teacher time. A total of 59 pupils of all ability levels in grades 9-12 are involved. Classes in German are broken down into three groups: a German I class with 19 pupils, a German II class with 20 pupils, and a third class composed of 10 pupils in German I and 10 in German II. Results in the multiple class will be compared with results in the other two. A written description is not being prepared. Persons in charge are Ward C. Dunn, teacher, and Wallace E. Burns, principal, senior high school.

Multiple Class Teaching

Hudson Community School District, Hudson, Iowa

A continuing program started in 1963, to be completed in 1964. Above average pupils in grades 9-12 may enroll on a voluntary basis. Four pupils in trigonometry are scheduled in a multiple class with seven pupils in elementary analysis (college preparatory mathematics). Three pupils in Latin II are scheduled in a multiple class with two pupils in Latin I. The purpose of the program is to reduce instructional costs in the small high school. Iowa Tests of Educational Development scores, achievement in relation to previous years, and teacher constructed tests and observations are used to evaluate the program. A written description is available. Person in charge is Morris Whitehead, principal, high school.

Team Teaching--Above Average Ability Pupils

Cedar Falls Community Schools, Cedar Falls, Iowa

A continuing program started in 1961-1962. Team teaching in speech, English and social science, involving 220 pupils selected by counselors from the upper 40% ability level in grades 10-12. The purpose is to better utilize teacher talent and allow for small group activity. A team of two or three teachers is assigned blocks of pupils in 12th grade English and social studies and in 11th grade English and all speech. Teachers and principals evaluate the program. A written description is available. Person in charge is Marvin W. Ziesmer, assistant superintendent.

Team Teaching--Low Ability Pupils

Alden Community School District, Alden, Iowa

A continuing study begun in 1963-1964. The purpose is to give special help to 23 seventh grade pupils of low ability who have been retained. Teachers concentrate on areas of weakness. One small group may be working on reading while the other works on writing or speaking. Evaluation is by observation, testing, and pupil development. A written description is not available. Person in charge is Ernest Kusler, principal, Popejoy Elementary School.

Team Teaching--Large Group Instruction

Pleasantville Community School, Pleasantville, Iowa

A continuing program started in 1962-1963 involving 220 pupils in grades 3-6. Special abilities of teachers are utilized, release time provided, and duplication of effort prevented. Two teachers, working as a team, present social studies to a class of 50-60 composed of two sections in each grade. Science teacher presents course to 50-60 pupils half of the time (grades 5 and 6). Basic skills tests are used for evaluation of the program. A written description is not available. Person in charge is W. B. Officer, principal.

Team Teaching--Science and Humanities

Bettendorf Community School District, Bettendorf, Iowa

A continuing program started in science in 1958, and in the humanities in 1963, in grades 11 and 12. The purpose is to provide for individual differences. National Curriculum Study Committee's recommendations and materials are utilized. The humanities course, developed

locally, utilizes team teaching and follows the cultural pattern of ideas rather than a chronological sequence. The team is composed of five teachers with majors in music, art, English, social studies, and philosophy. Pupils have an opportunity to meet with the five teacher team or work on special projects with any one member of the team. Evaluation is made by the teacher and by tests. A written description is not available. Person in charge is S. A. Ballantyne, superintendent.

COUNSELING, GUIDANCE AND TESTING

Group Counseling with Parents, Teachers, and Pupils Who Are Under-Achievers Mason City Independent School District, Mason City, Iowa

A program started in 1962, to be completed in 1963. Twenty-nine pupils in 5th grade, characterized as under-achievers and with emotional problems are included. The purpose is to determine if such pupils will become better adjusted and achieve more through group counseling. Sessions are with pupils ($\frac{1}{2}$ hour), then with teachers after school (1 hour), and finally with the parents in the evening. Evaluation is by comparison of parents' attitude scores, ITBS scores, and "Story of Jimmy" scores. A written description is not available. Person in charge is Dean Mulford, principal, Harding Elementary School.

Guidance--Group Testing in Language Laboratory Pella Community High School, Pella, Iowa

Standardized testing procedures for about 60 pupils in 9th grade were started in 1963 to determine the effect of a language laboratory setting on pupil performance. Matched groups of 30 pupils were given the D.A.T. Test; one group in a large assembly hall with 70 other pupils being tested, and the other experimental group in the language laboratory. A matched group comparison was made to test for significant differences in performance resulting from the isolated environment and personal direction of the language laboratory setting. A written description is being prepared. Person in charge is Edgar V. Epperly, teacher-counselor.

Lorge-Thorndike Intelligence Test Equating Project Monticello Community School District, Monticello, Iowa

A program started in 1963, in cooperation with the State University of Iowa, to be completed in 1963. Approximately 1,000 heterogeneous pupils in grades 3-12 were given the Lorge-Thorndike Intelligence Tests to provide measurements for equating these tests. Two new experimental tests will be administered to pupils in grades 4-12 to provide tables for converting tests scores from one form to another and to four other widely used intelligence tests previously equated to form A. Evaluation is by means of the tests administered. A written description is available. Person in charge is A. N. Hieronymus, director, Basic Skills Testing Program, State University of Iowa, Iowa City, Iowa.

UN-GRADED ELEMENTARY PROGRAM

Continuous Pupil Progress Plan--Primary Level Decorah Community School District, Decorah, Iowa

A continuing program started in 1960, affecting grades 1-3 and involving 450 pupils of all ability levels. The purpose is to better provide for individual differences of pupils. Nine levels are used

within the three-year primary program. Pupils progress at their own rate and not in intervals of grades as in the conventional program. Evaluation is by subjective judgements of principals, teachers, and parents. A written description is available. Person in charge is James Dunsmore, elementary principal.

Continuous Pupil Progress Plan--Primary Level
Greenfield Community School District, Greenfield, Iowa

Program started in 1963, to be completed in 1964, involving 268 pupils in the primary grades, 1-3. The purpose is to focus teacher attention on the individual child and his development. Major interest is in a continuous sequential arrangement of materials, rather than the elimination of a graded structure. The un-graded primary is in operation to permit more freedom to function. New report cards and daily evaluation are essential. Evaluation is by pupils' reaction to school, teacher comments, and responses of parents at parent-teacher conferences during the second semester. A written description is available. Person in charge is W. T. Jochumsen, principal, elementary school.

Continuous Pupil Progress Plan--Primary Level
Mason City Independent School District, Mason City, Iowa

A continuing program started in 1961-1962, to be completed in 1963-1964, in the lower elementary grades, involving 173 pupils of all ability levels. The purpose is to move toward more flexible grouping and allow for growth on a more individualized basis. The traditional primary level program has been broken down into ten specific levels of instruction. Pupils move from level to level as their needs demand, regardless of the time of the year--an adaptation of the non-graded elementary school. Evaluation is by a research study conducted by staff members. A written description is available. Person in charge is John Simpson, principal, McKinley Elementary School.

Un-Graded Primary
Riceville Community School District, Riceville, Iowa

Started in 1963 for all pupils (240) in grades 1-3, to provide better educational opportunities for individual pupils. Un-graded groups are based upon reading ability. Evaluation is by standardized tests, profile sheets for each pupil, and teacher assessment. A written description is not available. Person in charge is Eugene Orr, principal, elementary school.

MISCELLANEOUS

Central Library--Elementary Grades
Burlington Community School District, Burlington, Iowa

The central library project in the elementary schools was started to better utilize funds and to provide a much wider selection of books for children. Pupils are permitted to take these books home. Classroom teachers may check out books for needed reference in developing various units of study, and time is also provided for the teacher to

take pupils to the central library for research and study. A continuing evaluation is being made of the plan. A written description is available. Person in charge is Mrs. Loretta Gray, director of elementary education.

Five Basic Subjects--Grade 9

West Central Community School District, Maynard, Iowa

A program started in 1962-1963 and continuing during 1963-1964 to introduce five basic subjects (English, mathematics, social studies, science, and vocational) in grade nine, involving approximately 54 pupils. The plan is to provide a greater degree of supervision for slower pupils, advanced study outlines for better pupils, and reduce un-supervised study halls. Each class period runs 55 minutes. Evaluation is by parents' reactions at parent-teacher conferences, teacher observations, and results on ITED tests. A description of the project is not available. Person in charge is W. P. Truesdell, superintendent.

"Operation Concern"

Keokuk Community School District, Keokuk, Iowa

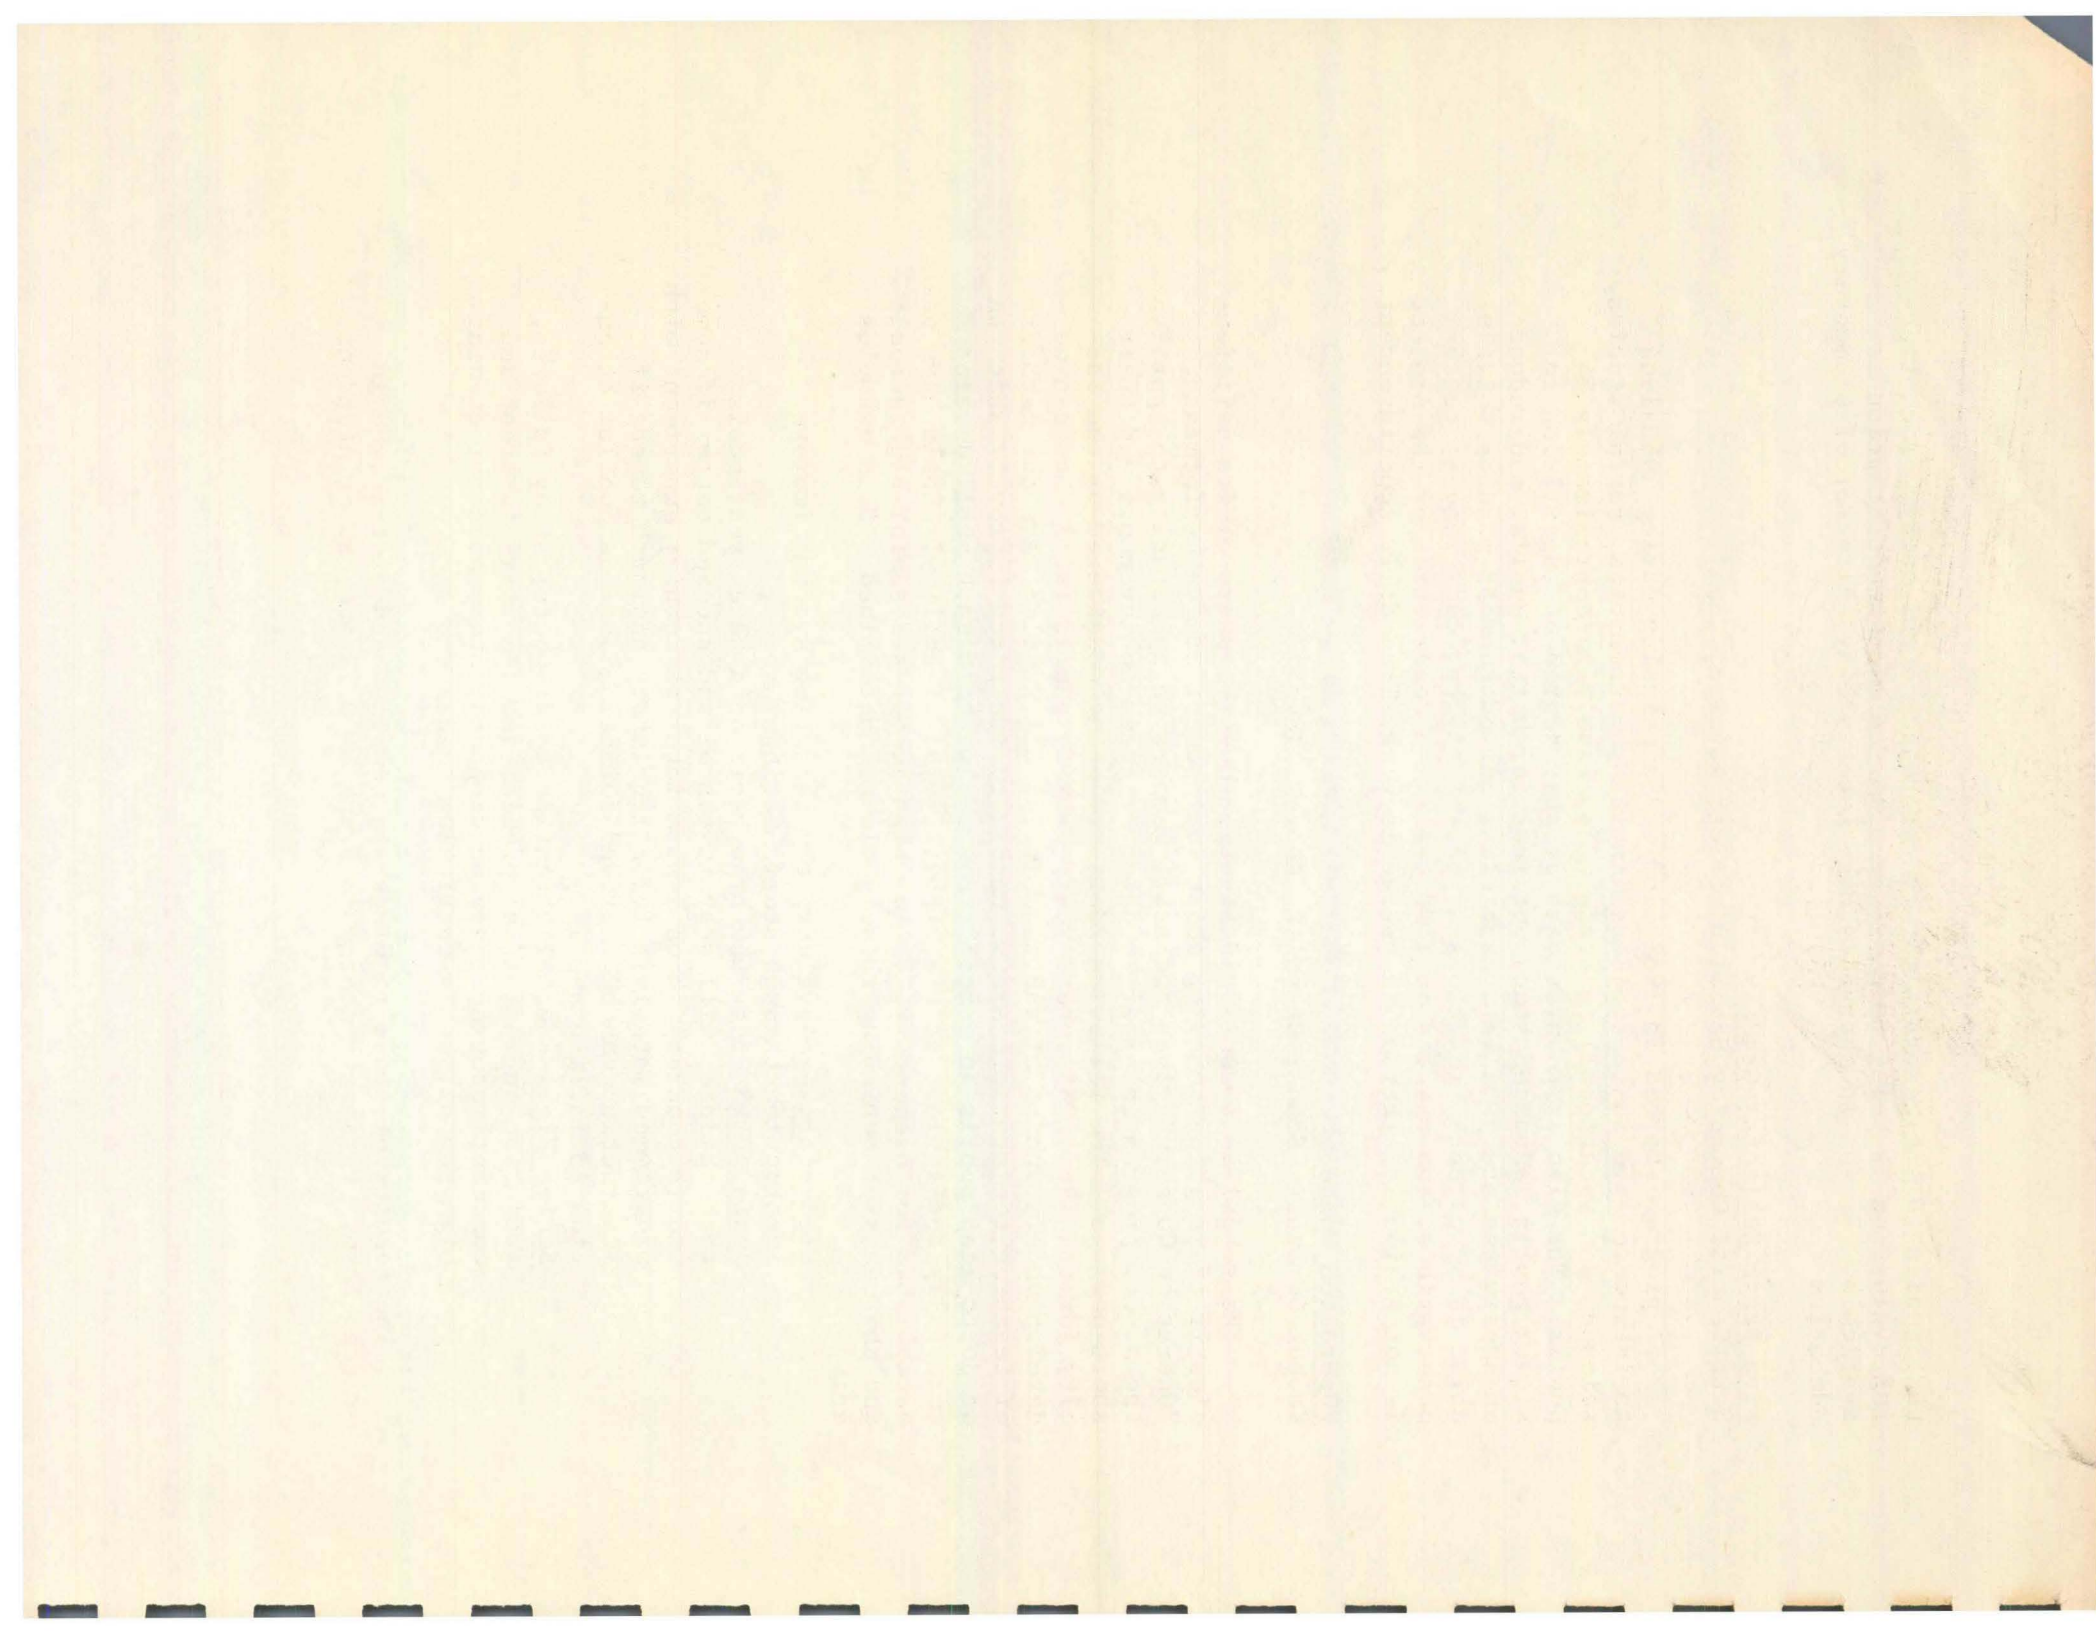

The school as a social institution must be aware of its deficiencies if it is going to bring about improvement of its performance. "Operation Concern" gives the staff members an opportunity to appraise the school program in order to discover their achievements and their short-comings. The following ideas are being considered by the faculty for the 1963-1964 school year: Why do pupils fail? How can we develop understanding of and concern for all pupils? Are our methods of teaching too static? Are we unable to adapt and improve? What can we do to keep pupils in school? How can we help each pupil develop more fully and achieve at his highest level of ability? Goals have been established for elementary, junior high school and senior high school; and the means of achieving these goals are determined. Some examples are:

Elementary--re-evaluate the reporting system; improve instruction through staff meetings.

Junior High--test the hypothesis on a three year basis that children will stay in school and succeed better if someone (a teacher) shows a warm interest in him; experiment with programmed materials for a laboratory approach to see if instruction can be improved for below average pupils; attention to failing pupils.

Senior High--special attention to dropouts; study failures; attention on individual pupils; develop staff interest and concern; resource study on dropouts; study need for evening high school; study curriculum needs.

The results of these findings are compiled and distributed in written form. Person in charge is Franklin D. Stone, superintendent.
