SCHOOLS

Alphabetical List of 832 Towns with Approved Schools

Bold face type indicates the name of the school, also the post office address, unless the PO address is shown differently.

The high school approval statements indicate the number of grades for which the school was approved for tuition purposes only for the year ending June 30, 1952.

Where an arabic number follows the name of superintendent or teacher, it indicates the years employed in that school system previous to this year, but not necessarily in the particular position in which now employed.

Refer to the preceding page for the definitions of abbreviations used.

Refer to the back of this directory for an alphabetical list of the superintendents, and the 99 county superintendents.

The county superintendents in the alphabetical order of their counties are listed in the front of this book.

1952-53 SALARY STUDY

The school districts of Iowa are grouped for salary tabulation according to type of district organization and population. The teaching staff within each group is classified with reference to the major position occupied.

EXPLANATION OF TABLES

In these tables an asterisk (*) indicates that, because of the small number recorded, no computation has been made.

The median—the middle point, the first quartile—marking a point in rank with one quarter below it, and the third quartile—with one quarter above it, have been determined. One-half of the numbers ranked are between the first quartile and the third quartile.

1952-1953 SALARY STUDY
