INTRODUCTORY STATEMENT

The Iowa Educational Directory for 1965-1966 has been compiled from reports prepared by the certificated school employees of Iowa. Facts and figures have been extracted from the information submitted on the Iowa Professional School Employees Data Sheet Reports (IPSEDS), so every teacher and administrator has had a part in the preparation. The teachers themselves filled out the reports early in the fall of 1965, and the directory information has been extracted from those reports and printed by data processing machines.

The electronic data processing technique has definite advantages as a means of preparing information for the printed directory. It also has a few disadvantages.

Among the advantages apparent in this year's directory is the listing of a number of items of information not previously reported. These include street addresses, zipcode numbers, and telephone numbers for all buildings in a school system; Department of Public Instruction identifying code numbers for each district and each individual school; names and addresses of school board members and officers; enrollment by grades for each high school building; and information about area schools.

The larger format of the directory this year allows for the inclusion of this extra information and for a slightly larger size of type.

Among the disadvantages encountered in preparing copy by data processing is the limitation on the number of characters that can be printed on one line. The most obvious result of this limitation is the fact that second names of many teachers cannot be printed in full. Those who missed the explanation of this fact on the IPSEDS instruction sheets will find some interesting abbreviations of their second names, for the printing machine had to stop when the character limit for directory copy was reached.

The IPSEDS report forms were prepared for collecting general personnel data rather than specific information for the directory. For this reason, it is impossible this year to report teaching assignments in as much detail as might be desired. For example, elementary teachers, other than those teaching special subjects, may be listed only as teachers of self-contained classrooms. In other cases, assistant superintendents and directors may be identified in an "either/or" classification because the forms had a single code number for the two classifications. This also accounts for the fact that assistant superintendents are listed in alphabetical order with other administrative personnel rather than immediately following the superintendent's name.

Please note the list of abbreviations on pages vi and vii. Using this list as a reference will give meaning to the pages of the directory that follow.

In general, the information included in the "back of the book" this year does not duplicate the facts and figures to be printed in **Data on Iowa Schools—1966**, another Department of Public Instruction publication, which will be distributed to superintendents early in 1966.

Preparation of information forms to be used in printing next year's directory is already under way. Every effort is being made to make the **Educational Directory** as useful and serviceable as possible. Constructive criticism and helpful suggestions will be welcome at all times.

IOWA DEPARTMENT OF PUBLIC INSTRUCTION

Data Processing Division

and

Publications Section

The Iowa Educational Directory is distributed as provided in Section 17.23, Code of Iowa. Each superintendent of schools, county superintendent, and secretary of a school board is entitled to a copy of the directory without charge. Other persons may secure copies by paying the cost of printing, which is \$1.50 per copy.

Administrative and Professional Personnel

COUNTY SCHOOL SYSTEMS

1965-1966 School Year

The county code number assigned by the Department of Public Instruction appears immediately after the telephone number of the county superintendent's office. It corresponds to the auto license prefix number for the county.

The number at the extreme right, following the name of each employee, indicates the total years of previous service in the county school system — not necessarily in the position presently held. Hence, the absence of a number indicates the first year of employment in the system.

Special education teachers are listed under the county office if the classes are sponsored by the county and not physically located in a local attendance center. If classes are supervised by a local district and sponsored by the county, they will appear with the local district's personnel.

The table of contents on page iii and the list of abbreviations on pages vi and vii will afford the reader further help in using the directory.

Community, Consolidated, and Independent SCHOOL DISTRICTS Maintaining Four Year High Schools in Iowa 1965-1966 School Year

● Dots mark the names of school districts.

*** Asterisks mark the names of schools within the districts.

The code number assigned each school by the Department of Public Instruction appears immediately following the telephone number of the school district. The first two digits of this code number represent the county and correspond to auto license prefix numbers. The four digits following the dash identify the school district. Three digits are added to this basic code number to further identify types of schools within the district.

The number at the extreme right, following the name of each employee, indicates the total years of previous service in the school system — not necessarily in the position presently held. Hence, the absence of a number indicates the first year of employment in the system.

The table of contents on page iii and the list of abbreviations on pages vi and vii will afford the reader further help in using the directory.

**School Service Personnel: Supervisors, principals, superintendents, school psychologists, and guidance workers requiring preparation in approved programs leading to master's degree or, for school superintendents, one year of graduate study beyond.

***School service personnel except school psychologists.

Key: B—Bachelor's Degree. M—Master's Degree. Ed.S.—Specialist in Education. D—Doctor's Degree.

TEACHER CERTIFICATION AND APPROVAL

Every administrator, supervisor, or teacher employed in a public school is required to hold a certificate valid for the type of position in which he works. Furthermore, each teacher of pupils of compulsory school age who works in a private school is required to hold a certificate valid for elementary-school teaching.

Each teacher employed in a public school district maintaining an approved four-year high school, in addition to holding an appropriate type of certificate, must be assigned to teach subjects and give services in accordance with the approval standards of the Department of Public Instruction.

For information concerning certificates and approval statements, address the Division of Teacher Education and Certification, Department of Public Instruction, State Office Building, Des Moines, Iowa 50319.
