

## IOWA INFLUENZA (FLU) IMMUNIZATION DATA

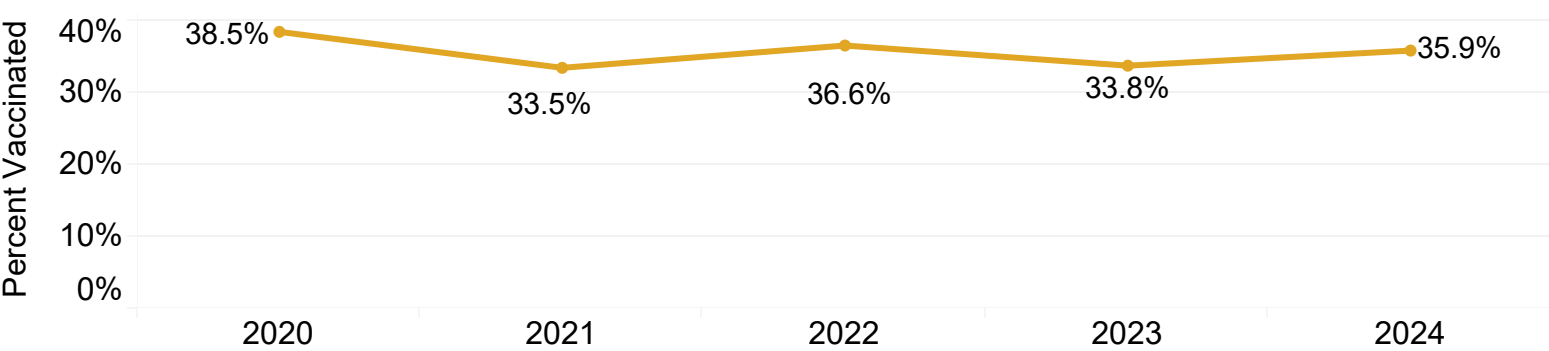

Influenza vaccination data includes the number of Iowa residents recorded in IRIS as having received at least one dose of influenza vaccine during the 2024-25 flu season (August 1, 2024 – May 31, 2025). Individuals 6 months and older are recommended to receive the flu vaccine each year.

**35.9%** of Iowans received influenza vaccine during the 2024-2025 season  
(County range: 20.1% to 48.0%)

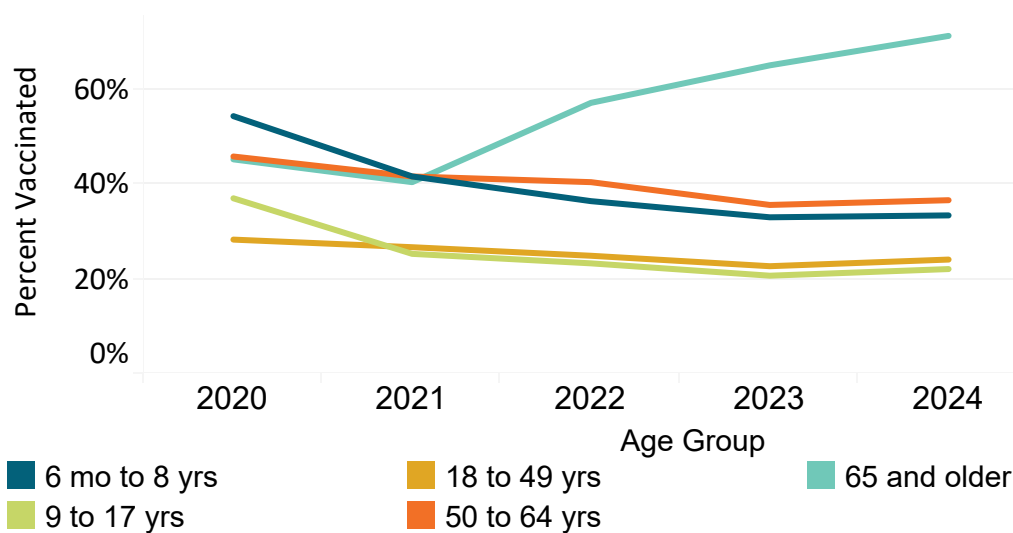

### 2024-25 INFLUENZA IMMUNIZATION COVERAGE COMPARED TO PREVIOUS YEARS

During the 2024-25 influenza season, 35.9% of Iowa residents received a flu vaccine. This is an increase compared to last season's rate of 33.8% but is comparable to the 2022-23 season. Coverage rates continues to remain well below the [Healthy People 2030](#) goal of 70% coverage.

#### Influenza Vaccination Rates in Iowa Over Time

#### Influenza Vaccination Rates in Iowa Over Time

Receiving an annual influenza vaccine is the best way to protect against the flu and its potentially serious complications. The Iowa Immunization Program continues to evaluate immunization rates in order to guide resources and address population needs. More information regarding the influenza vaccine can be found on the [CDC's website](#).
