- FIRST, determine the number of computers located in or under supervision of the school library. This might include some computers not located in the library.
- (Note: For this question, the terms "computer", "terminal", and "workstation" are considered synonymous.)
- Enter this number on Line 1 in Col. A.
- THEN, determine the number of computers that are:
- located elsewhere in the school (like a computer lab, mini-lab, administrative office, etc.), and
- are not under supervision of the school library, and
- are connected to LMC resources. (Do not include any that are not connected to LMC resources)
- Enter this number on Line 1 in Col. B.
- On Lines 2 through 9, enter the number of the Line 1 Totals, in each column, that have the accesses, options, etc. specified on each of Lines 2 through 9.
- A computer in either of the Line 1 Totals may be included on as many of Lines 2 through 9 as necessary.
- For example, a computer in the school library might have Internet access and a school home page. This computer would be counted on both Lines 2 and 6 under Col. A.
