The Iowa Department of Public Safety gratefully acknowledges the state and local law enforcement agencies who have made every effort to comply by Chapter 692.15 of the *Code of Iowa* which charges them with the responsibility of reporting crimes to the Department.

A special note of thanks is also extended to those persons who process the crime reports at the sheriff's offices, police departments and state university departments of public safety across the state. Without their diligence and hard work, there would be no crime report.

EXECUTIVE SUMMARY

Overall, reports of crime declined in Iowa in 2007. It is important to keep in mind, however, that crime is a local event. Crime rates and crime reports will vary from one locale to another across the state, and crime rates and crime reports in any locale may vary from year to year. Crime rates and crime reports are best understood when compared in the aggregate over a period of years. The Iowa Uniform Crime Report attempts to provide that aggregate summary, as well as a meaningful comparison with previous years in order to understand general trends in crime reporting in Iowa.

Introduction

Historical Perspective

In 1974, the 65th Iowa General Assembly enacted a provision of Chapter 749 B of the *Code of Iowa* requiring law enforcement agencies to submit reports of crime and arrests to the Bureau of Criminal Investigation. The following language now is contained in section 692.15 of the *Code of Iowa* concerning Uniform Crime Reports:

If it comes to the attention of a sheriff, police department or other law enforcement agency that a public offense or delinquent act has been committed in its jurisdiction, the law enforcement agency shall report information concerning the public offense or delinquent act to the department on a form to be furnished by the department not more than thirty-five days from the time the public offense first comes to the attention of the law enforcement agency. The reports shall be used to generate crime statistics. The department shall submit statistics to the governor, the general assembly, and the division of criminal and juvenile justice planning of the department of human rights on a quarterly and yearly basis.

During December 1974, the Bureau of Criminal Investigation conducted training throughout the state on the proper completion of Uniform Crime Reports. The schools were attended by most of the law enforcement agencies that were to contribute Uniform Crime Reports. On January 1, 1975, the Iowa Uniform Crime Reporting program was implemented, with forms sent to 210 agencies. Forms provided by the Federal Bureau of Investigation were used in implementing this program because most contributing agencies had previously submitted their forms to the FBI. Monthly reports were received from 209 agencies throughout 1975 and 1976. In 1977, the number of agencies submitting reports grew to 220. In 1979, the number of reporting agencies rose to 223, and in 1980 to 225. The number of reporting agencies were reduced to 223 in 1981 but rose again in 1986 to 224 and to 225 in 1990. With very few exceptions the reporting agencies submitted data for every month from 1977 to 1990 under the summary-based system.

In the United States, The National Uniform Crime Reporting System began with 400 cities representing 20 million inhabitants in 43 states on January 1, 1930. Since the establishment of the Uniform Crime Reporting Program, the volume, diversity, and complexity of crime steadily increased, while the UCR program remained virtually unchanged. Recognizing the increasing need for more in-depth statistical information and the need to improve the methodology used for compiling, analyzing, auditing, and publishing the collected data, an extensive study of the Uniform Crime Reports was undertaken. The objective of this study was to meet law enforcement needs into the 21st century. The result of the study was NIBRS (National Incident Based Reporting System). Adoption of the NIBRS system took place in the mid 1980s and Iowa began organizational efforts to implement the system. Conversion to IBR (Incident Based Iowa Uniform Crime Reporting) was completed January 1, 1991, as part of a national effort to implement incident based crime reporting, coordinated by the Federal Bureau of

Investigation and the Bureau of Justice Statistics of the U.S. Department of Justice. Iowa was the fifth state in the nation to be accepted as a certified “reporting state” of incident based crime data to the national system. As of May 2008, there are 31 NIBRS certified states, 9 states that are in the testing phase, and six states developing plans for participation in NIBRS. Iowa is among thirteen of the certified states with 100% of the agencies using the Incident-based system.

In Iowa in 1977, the responsibility for Uniform Crime Reports was transferred from the Bureau of Criminal Investigation to the Department of Public Safety’s Division of Administrative Services (which maintained UCR field personnel in the Field Services Bureau who responded to questions concerning data entry policy and procedures and received raw data from contributing agencies) and the Data Services Bureau (which performed computer analysis of the data). The Research and Development Bureau of the Commissioner’s Office performed the function of further analyzing the data, preparing reports, and responding to requests for information based on the data. From 1993 the function was housed in the now Program Services Bureau, but was transferred back to the Commissioner’s Office in 2006.

Incident-Based, Iowa Uniform Crime Reports Overview

The incident-based crime reporting system (IBR) involves collection of data on individual criminal incidents rather than monthly statistical summaries. These individual crime incidents and arrests are submitted in the form of reports using prescribed data elements and data values to describe each incident and arrest. The National Incident-Based Reporting System (NIBRS) compiles the specified information on two types of Offenses: “Group A Offenses” and “Group B Offenses.” Both incidents and arrests are reported for Group A offenses while only arrests are reported for Group B offenses.

Group A Offenses

Arson
Assault Offenses
Bribery (Except Sports Bribery)
Burglary/Breaking and Entering
Counterfeiting/Forgery
Destruction/Damage of Property (Except Arson)
Drug/Narcotics Offenses (Except Driving Under the Influence)
Embezzlement
Extortion/Blackmail
Fraud Offenses (Except Counterfeiting/Forgery and Bad Checks)
Gambling Offenses
Homicide Offenses
Kidnapping/Abduction
Larceny/Theft Offenses
Motor Vehicle Theft
Pornography/Obscene Material
Prostitution Offenses
Robbery
Sex Offenses, Forcible
Sex Offenses, Non-forcible
Stolen Property Offenses
Weapon Law Violations

The above 22 Group A crime categories are further divided into 46 offenses. The criteria for deciding whether a crime is to be designated as a Group A offense depends upon:

- The seriousness or significance of the offense
- The frequency or volume of its occurrence
- How widespread is the occurrence of the offense in the United States
- How likely the offense will come to the attention of law enforcement

- Whether law enforcement is the best channel for collecting data regarding the offense
- The burden placed on law enforcement in collecting data regarding the offense
- The statistical validity and usefulness of the collected data
- The National UCR Program's responsibility to make crime data available not only to law enforcement but also to others having a legitimate interest in it.

Group B Offenses

Bad Checks
 Curfew/Loitering/Vagrancy Violations
 Disorderly Conduct
 Driving Under the Influence
 Drunkenness
 Family Offenses (non-violent)
 Liquor Law Violations
 Peeping Tom
 Runaway
 Trespass of Real Property
 All Other Offenses

More complete definitions of Group A and Group B offenses can be found in Appendix B. These definitions were taken from a federal publication entitled: Uniform Crime Reporting, National Incident-Based Reporting System, Volume 1 *Data Collection Guidelines*. September, 1996.

The federal definitions of offenses are general definitions. "The definitions which were developed for NIBRS are not meant to be used for charging persons with crimes. To the contrary, they are meant to be 'receptacles' or 'pigeonholes' for reporting crimes that are committed throughout the United States. The purpose for UCR as developed by law enforcement is to provide a 'common denominator' language, which transcends varying local and state laws. State statutes and local ordinances must be very specific in defining crimes so that persons facing prosecution will know the exact charges being placed against them. On the other hand, the definitions used in NIBRS are generic in order not to exclude varying State and Federal statutes relating to the same type of crime."

2007 Incident-Based, Iowa Uniform Crime Reports: Part I Analysis

Contained in the 2007 Incident-based Iowa Uniform Crime Report is the analysis found in Part I and tables found in Part II. The narrative for total crimes (Group A and Index), murder, total sexual assaults, forcible sexual assaults (forcible rape, forcible sodomy, sexual assault with an object, forcible fondling), non-forcible sexual assaults (incest and statutory rape), robbery, aggravated assault, simple assault, intimidation, stalking, burglary, larceny, motor vehicle theft, fraud, arson, vandalism, weapons laws violations as well as drug violations is found in Section A of Part 1. A short explanation of Group A and B arrests and victim information is also in Section A of Part 1. Hate/Bias Crime is found in Section B, Domestic Abuse is found in Section C, and Law Enforcement Officers killed and assaulted is found in Section D.

The analysis of the above mentioned crimes includes illustrations in the form of tables and figures to make the analysis more comprehensible. Total incidents, rates per 100,000 population, gender, race, date and time are just a few of the breakdowns found in the analysis of murder, sexual assault, robbery, aggravated assault, simple assault, intimidation, burglary, larceny, motor vehicle theft, drug violations, and arrests. The hate/bias and domestic abuse sections include a narrative documenting the historical perspective of each category as well as other background details. The law enforcement section includes employment information as well as officers killed or assaulted in the line of duty. Five-and ten-year comparison tables are also included throughout this section showing rates and total offenses and arrests.

The rates used in Part 1 of this report are figured on a population basis of those law enforcement jurisdictions reporting more than six months' worth of consistent offense data. Adjusted rates are used for total arrests in the narrative, but table rates are figured on the combined populations of law enforcement jurisdictions having **any** arrests. It is felt that there is no accurate way to compensate for incomplete reporting of arrest data, particularly juvenile arrest data. (For further discussion on the completeness of this report, refer to Appendix A or B in the back of this publication and Total Crime in Iowa found in the narrative section.)

- Juveniles are considered all persons less than 18 years of age.
- Rates are figured by dividing the crimes, arrests, etc., by a population and multiplying the answer times 100,000.

2007 Incident-Based Iowa Uniform Crime Reports: Part II Statistical Data

Contained in the 2007 Incident-Based Iowa Uniform Crime Reports are several tables, found in Part II, illustrating state totals as well as tables breaking down state totals by reporting law enforcement jurisdiction. The reports are set up in four sections containing general crime information, hate/bias crime information, domestic abuse information and LEOKA and law enforcement personnel information.

As an added feature, some of the agency specific tables now contain population summaries at the end of those tables. The population summaries are broken down by:

Cities of 50,000 and over population
Cities between 25,000 and 49,999 population
Cities between 10,000 and 24,999 population
Cities between 5,000 and 9,999 population
Cities under 5,000 population
Suburban Sheriff's Offices
Rural Sheriff's Offices
State Universities

- Cities under 5,000 population usually include cities between 2,500 and 5,000 population. Cities under 2,500 population report through their Sheriff's Office unless they have applied to be a direct reporting agency (less than 10 agencies have done this since 1991 when this became possible). In 2003, Johnston PD and Pella PD increased in population and moved from a size six to a five, or between 2,500 and 9,999 population to between 10,000 and 24,999 population.
- Suburban Sheriff's Offices include those in Black Hawk, Dallas, Dubuque, Johnson, Linn, Polk, Pottawattamie, Scott, Warren and Woodbury Counties. The Bureau of Census through the FBI added additional counties in 2005 (for 2003 data and beyond) to be considered. The metropolitan counties that were added are: Benton, Bremer, Grundy, Guthrie, Harrison, Jones, Madison, Story and Washington. Rural area sheriff's offices include those in the 80 counties that are not classified as suburban sheriff's offices (as listed above).
- State Universities include the University of Northern Iowa, the University of Iowa, and Iowa State University.

Section A, Table 1 shows Group A offenses for each reporting agency and Table 2 converts IBR data to summary data similar to Part 1 crimes seen in reports for 1990 and before in the (summary based) Iowa Uniform Crime Reports. In both Table 1 and Table 2 the rates for the state totals reflect the adjustment in population, subtracting the non-reporting jurisdictions. (For further discussion on the completeness of this report refer to Appendix A in the back of this publication or in the Chapter on Totals).

More specifically, Table 1 shows the complete list of Group A offenses that have been reported by the incident-based method. Those 46 Group A crimes have been broken down by the direct reporting law enforcement geographic jurisdictions (the 99 county sheriffs, the three state university departments of public safety and the 131 local police departments) as well as the state totals. Included in these totals are the submissions of the state law enforcement agencies. The major contributing state agency has been the Iowa Department of Public Safety's Division of State Patrol. Data reported by state agencies is attributed to the jurisdictions in which the crimes occurred.

Table 2 contains incidents of crime converted back to the summary-based method (formerly Part 1 Crimes). The crimes of murder, rape, robbery, aggravated assault, burglary, and motor vehicle theft are shown in this table.

Reported arrest information is presented in tables by jurisdiction in the 2007 Incident-Based Iowa Uniform Crime Report. These tables may be used to report adult and juvenile arrest information together or separately. The tables show arrest rate figures per 100,000 population. Arrest rates for the state are figured by the accumulated population of the law enforcement jurisdictions when **any** arrests are entered for that jurisdiction.

Reported clearance information and percentage of offenses cleared by jurisdiction is also represented in table format. A clearance usually occurs when an arrest occurs. However, a case can also be cleared exceptionally. The following four conditions must be met to exceptionally clear an offense: 1) the investigation must have clearly and definitely established the identity of at least one offender; 2) sufficient probable cause must have been developed to support the arrest, charging, and prosecution of the offender; 3) the exact location of the offender must be known so that an arrest could be made; 4) there must be a reason outside the control of law enforcement which prevents the arrest, i.e.:

- Death of the offender/suspect
- Prosecution declined (by the prosecutor for other than lack of probable cause)
- Extradition denied
- Victim refused to cooperate (in the prosecution)
- Juvenile/no custody (the handling of a juvenile without taking him/her into custody, but rather by oral or written notice given to the parents or legal guardian in a case involving a minor offense)
- Warrant issued
- Turned over to another agency

The Hate/Bias Crime information can be found in Section B listed by offense type, victim, offender, target, motivation and jurisdiction. Additional tables listing Hate/Bias Crime history by agency can be found in the Part II tables.

The Domestic Abuse reports for 2007 are reported in Section C. Included in the information collected is data on time and location of occurrence, victims, offenders, relationships, signs of abuse, weapons used, referrals made by law enforcement, presence of the offender, presence of the children and whether they were harmed, and the use of alcohol and drugs. Although the Domestic Abuse Reports were always counted by 1 incident per victim, they were not a part of the general crime data before 1991 but were maintained by a separate system. With the incident-based system, domestic abuse offenses are an integral part of the tabulations. However, the number of victims per incident may be different than the number of victims per agency. This is reflected in the tables generated in this section.

The remaining tables in this report examine statewide totals in different ways. Arson, property stolen and recovered, and reported weapon information by offense, among other statewide data, can be found in the List of Tables.

An information requesting system is available to complement the incident-based crime records data system. This system is dependent on the main data system and will be used for specialized requests on a time available basis.

Anyone wishing to request specialized data should contact the Iowa Department of Public Safety, Commissioner's Office, 215 East 7th Street, Des Moines, Iowa 50319-1900, (515)725-6322. Those on-line may e-mail requests to: ibrinfo@dps.state.ia.us.

It should be noted that increases in reporting within the first few years of implementation of a new reporting system are common. Therefore, comparisons of the early years 1991 and 1992 data from the incident-based system should be viewed cautiously. Similarly, comparisons of reporting levels between data from the incident-based system and data from 1990 and before may also be inappropriate.

Much work has been accomplished in the last few years towards total conversion to the Incident-Based Iowa Uniform Crime Reports. The Iowa Department of Public Safety acknowledges the challenge it has been for the reporting agencies in Iowa to comply with the new standards and commends those law enforcement agencies that have made the substantial effort required to submit their data in an accurate and timely manner.

Adjusted Rates

NOTE: Data for this report is based on incidents submitted by the law enforcement jurisdiction throughout Iowa to the Iowa Department of Public Safety. Although not all of the law enforcement agencies in Iowa were able to report statistical data, or complete data, the numbers show a marked increase in compliance with the reporting system since the 1991 introduction.

The adjusted population criterion is based on an individual agency entering more than six months worth of consistent data for the year. The adjusted population figure for 2007 is 2,837,012 or 96.7 percent of the total population. The adjusted population figures since 1998 are as follows: 2006 is 2,830,970; 2005 is 2,796,657; 2004 is 2,780,998; 2003 is 2,697,640; 2002 is 2,680,799; 2001 is 2,608,047; 2000 is 2,493,096; 1999 is 2,458,008; and 1998 is 2,389,528. All ten year comparison tables or figures were computed using these adjusted populations.

The following law enforcement agencies' corresponding populations are not included in the adjusted population figure for 2007:

**MURDER VICTIMS
1998 - 2007**

Figure 24

There were 38 murders reported in 2007, which is a new record low since the Department became the repository for crime data in 1974. The previous recorded low was in 2005 (42). The highest number of murder victims was recorded in 1981 (77). It is difficult to identify a trend in murders because of the relatively small numbers involved. However, murders generally increased from 1992 (44) to a period peak in 1996 (66) and 1998 (66) before declining substantially in 1999 (48).

The number of victims peaked again in 2000 (58) before a general decline to 2005 (42) where a new low had been recorded. The number of murder victims then spiked again in 2006 (59) to the highest recorded level since 1998 (66).

**MURDER
ADJUSTED RATES 1998 - 2007**

Figure 25

Similar to the trends found in the total above, murder rates per 100,000 population for the years 1998 – 2007 are displayed in Figure 25.

NOTE: Since statewide crime reporting was instituted, supplemental homicide reports have been submitted by law enforcement agencies to the Iowa Department of Public Safety. These reports contained more detailed homicide information than was required by the summary based crime reporting system. Since the inception of the incident-based system in 1991, supplemental homicide reports have been requested (when applicable) of law enforcement agencies that have not been able to report to the incident-based system.

VICTIMS

Who were they...

In 2007, victims under the age of 20 recorded the lowest percentage (16%) of victims since 1991, when the request for supplemental homicide reports for the incident-based system began. The highest percentage of victims under the age of 20 was recorded in 1997 at 37%.

Figure 27

Figure 26 shows the ages of the 38 murder victims during 2007. The age category 36 – 40 accounted for the highest number of victims (9), which is 24% of the total number of victims. There were four age categories that recorded the next highest number of victims (4): 16 – 20, 21 – 25, 26 – 30, and 41 – 45. In 2007, 5% of the victims were aged 5 and under, which is a decrease from recent years: 7% in 2006, 14% in 2005, 7% in 2004, and 16% in 2003.

Males were the victim of homicide most often over the last decade. In 1998, the victim's gender was evenly distributed, but all other years in the past decade show a higher percentage of male victims. In 1993 (not shown), female victims accounted for 53% of the total. In 2007, males accounted for 68% of the total number of victims, which is a decade high.

In 2006, African American murder victims accounted for 10% of the total, the same percentage recorded in 2001, which is the lowest percentage recorded since 1991 when the request for supplemental homicide reports for the incident-based system began. However, in 2007 the percentage spiked to 34%, which is the highest percentage recorded. White victims accounted for 66%, which is the lowest percentage recorded for the decade. The two Hispanic victims are recorded as White for their race.

There were two reported Hispanic murder victims in 2007, which is 5% of the total number of victims for the year. This is the lowest percentage since 1998 when 3% of the murder victims were Hispanic.

OFFENDERS

2007 OFFENDERS	
Number of Offenders	35
Number of Arrests	22

There are 35 known offenders, who participated in the murder of the 38 victims in 2007. Among those 35 offenders there were 22 arrests recorded. In some cases supplemental information was not received on the arrest of offenders, so it is possible that not all arrest information was recorded.

In 2007, 10 of the 35 known offenders were in the age category 21 – 25, which is 29% of the total. Sixty-six percent of the offenders were between ages 16 and 30. Over the last decade offenders between the ages of 16 and 30 have been the most reported group. Specifically, the offenders in this age range were reported 57% of the time in 2006, 65% in 2004, 58% in 2003, 71% in 2002, 55% in 2001, 60% in 2000, 49% in 1999, and 65% in 1998. The only exception is in 2005 when 52% of the known offenders were recorded between the ages of 21 and 35.

The percentage of White offenders (51%) decreased by 41% from 2006 to 2007, recording a new low. After setting a record high in 2004, African American offenders decreased in percentage totals until 2006 (14%), which was the lowest recorded percentage since 1999. In 2007, the percentage of African American offenders increased to a record high 46%.

In 2007, two of the white offenders were identified as being Hispanic. The reported number of Hispanic offenders has decreased since 2005 where it had held steady at six offenders for three years in a row.

JUVENILES INVOLVED IN HOMICIDE

Juvenile victims were at the lowest recorded number for the decade with three homicides. The year also recorded three juvenile offenders including a 15 year old female, and two males aged 16 and 17. The decade high for juvenile victims was in 2000 with fifteen deaths, eleven of which were under the age of 5. The decade high for juvenile offenders was in 2002 with nine young persons involved in the commission of a murder: one 15 year old, four 16 year olds, and four 17 year olds.

RELATIONSHIPS BETWEEN VICTIM AND OFFENDER

**MURDER: RELATIONSHIP BETWEEN VICTIMS AND OFFENDERS
IOWA, 2007**

Figure 36

No victim/offender relationship was identified in five of the cases due to no known offender being recorded. Several of the incidents also had more than one offender listed. There were 38 victim/offender relationships identified, 37% of which were recorded as Acquaintance. Boyfriend/Girlfriend accounted for the second highest category at 18%. Offenders identified as Immediate Family decreased to its lowest percentage for the decade, specifically from 2006 (27%) to 2007 (16%). This category peaked in 1998 accounting for 35% of the total.

Figure 37 shows the 2007 murder situations broken down by number of victims and offenders for each incident. One victim/one offender accounted for 71% of the situations, which is the highest percentage since 1997 (73%, not shown). There were three incidents of multiple victims/one offender and two cases of one victim/multiple offenders. A relationship was identified in 86% of the cases.

The combined Firearm category accounted for 37.5% of weapons used during the commission of a murder. Handguns (11 of 18) were the most used firearm. Knives or Cutting Instruments accounted for 25% (12 of 48) of the total, which was the most often used weapon. Handguns were used more often than Cutting Instruments in 2003 to 2005, but Cutting Instruments have surpassed Handguns for the past two years.

WHEN

Usually no clear pattern emerges when comparing previous years' murder incidents by month. In 2007, the most incidents occurred in December and the least were in November and March. In 2006, the most incidents occurred in July however, the most victims were killed in October due to two incidents that had multiple victims. In 2005, May and June had the highest number of incidents with five each. January and February were the highest months in 2004. In 2003, August and January accounted for the highest number of murder incidents. The least number of murder incidents varied by year as well with September being the lowest month in 2006, August in 2005, September in 2004, and April and May in 2003.

DAY OF INCIDENTS

Over the last five years no specific day of the week has been identified as having more murder incidents. Saturday, with 10 incidents was the most reported day of the week for a murder to occur in 2007. In 2006, the most reported day was Sunday with 13 incidents. Sunday and Monday, each with 8, were the most common day in 2005. In 2004, Tuesday had twelve incidents, which was the highest day. In 2003, Thursday was the most recorded day with 12 incidents.

The least reported day showed some similarities with Tuesday having the least amount of occurrences in three of the years: 2007 had no occurrences, 2006 had 4 incidents, and 2003 had 3 incidents.

SECTION B

HATE/BIAS CRIME

HATE CRIMES

HISTORICAL PERSPECTIVE

In the past two decades, criminal acts motivated entirely or in part by prejudice have come to be known as hate crimes. These crimes continue to occur in Iowa, as well as throughout the country. Hate crimes not only affect individuals or groups, but also can disrupt the very ideals of a democratic society. Individuals and/or groups are affected more deeply because hate crimes are not random; the victims are targeted for who they are. The entire community can be threatened because of the increased level of fear and distrust related to or perceived after a hate/bias incident. The aftermath of fear related to a criminal act in the community can then escalate into other criminal incidents. In response to the seriousness of these crimes, state and national programs have been instituted to focus on these incidents. Specifically, new law enforcement techniques were developed to investigate these crimes along with data collection enhancements to determine the scope and nature of these offenses.

Public Law 101-275 or the “Hate Crimes Statistics Act” was approved, after passing both the House and Senate of the United States, on April 23, 1990. The purpose of this Act is to acquire and publish data of crimes that display distinct evidence of prejudice based on race, religion, sexual orientation, or ethnicity. The collection elements thought to be appropriate include the crimes of murder, non-negligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, arson, and destruction, damage, or vandalism of property.

On a local level, beginning in 1990, the 73rd Iowa General Assembly enacted into law precise language defining a hate crime and making special provisions for hate crimes. Revised in 1992, Iowa’s law is more explicit and encompassing than the national law, reiterating the violation of an individual’s rights and including victims of prejudice because of their sex, age, political affiliation, or disability. The following portion of Chapter 729A, *Code of Iowa*, reads:

SEC. 729A.1 VIOLATIONS OF AN INDIVIDUAL’S RIGHTS PROHIBITED.

Persons within the state of Iowa have the right to be free from any violence, or intimidation by threat of violence, committed against their persons or property because of race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability.

SEC. 729A.2 VIOLATION OF INDIVIDUAL RIGHTS – HATE CRIME.

“Hate crime” means one of the following public offenses when committed against a person or a person’s property because of the person’s race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability, or the person’s association with a person of a certain race, color, religion, ancestry, national origin, political affiliation, sex, sexual orientation, age, or disability.

- There are indications that a hate group was involved; for example, an organized hate group claimed responsibility for the crime or was active in the neighborhood.

Previous Bias Crimes or Incidents

- Victim was visiting a location where previous bias crimes had been committed against members of the victim's group.
- Several incidents occurred in the same area, and the victims were members of the same group.
- Victim had received previous harassing mail or phone calls or had experienced verbal abuse based on his or her affiliation with a targeted group.
- Recent bias incidents or crimes may have sparked a retaliatory hate crime.

SECTION C

DOMESTIC ABUSE

DOMESTIC VIOLENCE

HISTORICAL PERSPECTIVE

The Iowa Department of Public Safety is charged under Chapter 236 of the *Code of Iowa* with the responsibility for collecting information on incidents of domestic abuse in Iowa from local law enforcement agencies. The national Uniform Crime Report guidelines do not require the reporting of domestic abuse separately. The Department began collecting domestic abuse data on July 1, 1985, assuming a function previously performed by the Iowa Department of Human Services. The domestic abuse reporting system was the only incident-based crime data collected by the Department from 1986 through 1990. The incidents of domestic abuse rose rapidly each year between the years of 1986 to 1990 increasing from a reported 3,501 incidents in 1986 to 6,199 reported incidents in 1990. Beginning with the 1991 data the Department incorporated the domestic abuse data and hate/bias crime data with the new Iowa Incident-Based Uniform Crime Reporting System, housing all crime data in one computerized system.

Domestic Abuse is defined by Section 708.2A(1) and in Section 236.2 of the Code of Iowa under any of the following circumstances:

- a. The assault is between family or household members who reside together at the time of the assault.
- b. The assault is between separated spouses or persons divorced from each other and not residing together at the time of the assault.
- c. The assault is between persons who are parents of the same minor child, regardless of whether they have been married or have lived together at any time.
- d. The assault is between persons who have been family or household members residing together within the past year and are not residing together at the time of the assault.
- e. The assault is between persons who are in an intimate relationship or have been in an intimate relationship and have had contact within the past year of the assault.

Some factors of an intimate relationship can be: duration, frequency of interaction, termination, either party's sexual or romantic expectations and the relationship does not have to be exclusive.

Although the definition of Domestic Abuse has changed since 1985, the meaning of "family or household members" has stayed much the same. The major changes have been in 1987, 1989, 1991, 1993, 2002 and 2003.

Since 1998, reports of female victims have decreased while male victims have increased proportionately. In 2007, females accounted for 78% of the total reported victims, which is a 3% decrease from 2006. The number of male victims reached a decade high in 2007 (1,553), accounting for 22% of the total.

DOMESTIC ASSAULT VICTIMS BY RACE
IOWA, 2007

Figure 8

The percentage of Asian and Native American victims have remained fairly constant, not exceeding 2% in any given year, over the last decade. The percentage of African American victims has increased almost 5% since 1998. Conversely, White victims have decreased nearly 5% since 1998. Figure 8 shows percentages of victims by race, accounting for victims with an unknown race. When factoring in unknown race, White persons accounted for 80.4% of the total victims. The figures in Table 5 do not list the history for victims with unknown race. In 2007, there were 347 reported Hispanic victims, which is the highest reported number in the last decade. The previous high recorded in 2006 reported 326 Hispanic victims.

White offenders have decreased 7% since 1998, while African American offenders have increased 7%. Asian and Native American offenders have remained relatively constant. In 2007, Asian and Native American offenders were more often than not at the scene when the report was made, but White and African American offenders were more often not present. There were 293 reported Hispanic offenders, which is on the low end but consistent with the numbers recorded over the last decade.

WHAT

The investigating officer reports a number of characteristics of each domestic abuse incident. Included are observed signs of abuse (injuries) to the victim, the weapon used to inflict the abuse and who reported the abuse to law enforcement. The law enforcement officer also notes any referrals made, the presence or absence of children during the abuse, whether an arrest was made, and if the offender was present at the time of the report.

In 2007, some type of injury was noted in 72.6% of the domestic abuse incidents. Minor injuries were the most reported injury occurring in 67.5% of the incidents, which is comparable to the other years over the five year period. Looking at race and injuries, 42% of Asians had no physical injuries, compared with African Americans who reported 29%, Whites reported 27% and Native Americans reported 26%. White persons reported the highest percent of injuries for apparent minor injuries and fractures.

The highest percentage of victims reporting the incident was in 2002 with 87%. Reports of children being absent have also generally increased since 1989 when on 45% were recorded as not being present. The highest percentage was recorded in 1999 when children were absent in 71% of the cases.

A weapon was indicated in 89% of the cases in 2007. Among those weapons, 81.4% were recorded as personal weapons such as hands and feet. The percentage of cases where no weapon was involved has increased over the five year period. The use of firearms, knives and other dangerous weapons has shown little change during the five years.

REFERRALS

Under Iowa law, investigating officers may be asked for referrals, but are not mandated to make any referrals. Programming options vary widely across the state. No referral was made in 47.7% of the cases in 2007, which is a decrease from the 51% recorded in 2006. Legal referrals increased 2% from 2006 while both medical and shelter referrals increased 1%. Officers may make multiple referrals for one incident.

On February 11, 2007 Des Moines Police Department Senior Police Officer (SPO) Sean Wissink was killed in an automobile accident while on-duty and en route to the airport. SPO Wissink was one of five officers scheduled to fly to New Mexico to attend training on the subject of weapons of mass destruction (WMD). As described by fellow officer Mike Moody, “Sean was one of the best police officers I have ever met, and he knew the job inside and out, but he was so much more than just a great officer.” SPO Wissink was a team leader for one of the department’s tactical entry teams and the WMD Team. His dedication and “lead by example” approach to law enforcement was a model for all officers.

IOWA OFFICERS ASSAULTED IN THE LINE OF DUTY

Caution should be used when analyzing this data. As with the crime data, it represents reports from law enforcement jurisdictions accounting for 96.7% of the total population of Iowa.

The number of Iowa law enforcement officers assaulted annually in the line of duty has been on the increase since 2003. Over the past decade the lowest reported number of officer assaults occurred in 1998 (499) and the highest number in 2007 (623), which equates to a 25% increase over the ten year period. Lesser peaks are noted in 1999 (561) and 2002 (562).

In 2007, officer assaults occurred most often on Saturdays, with high numbers extending into Friday and Sunday. A peak number of assaults were also recorded on Tuesday. This matches the trend over the last decade that shows the majority of officer assaults occurring on the weekends with a lower peak on one of the midweek days. A time of day trend has also been identified over the last decade with the midnight hour being the most recorded assault time for each year. The highest percentage of assaults has occurred between the hours of 10:00 pm and 2:00 am. The lowest assault times have been recorded between 6:00 am and 8:00 am.

The percentage of assaults resulting in injuries to the officer peaked in 2006 accounting for 49.7% of the total assaults. Officers reported being injured from the assault more often during the second half of the decade (48%) compared with injured officers during the first five years (42%).

In 2007, the highest percentage of officer assaults were perpetrated when the officer responded on a disturbance call (34%) followed by officers assaulted while making an arrest on a separate charge (20%). Seventy-nine percent of the time, the offender used personal weapons, such as hands and feet, to assault the officer. Weapons other than a firearm or knife were used eighteen percent of the time.

Officer assaults by assignment follow similar patterns from year to year. The majority of assaults occur among uniformed single officer cars and primarily when an assisting officer is present. In 2007, one officer cars accounted for 63% of the assaults compared with 62% in 2006. Uniformed officers accounted for 80% of the officers assaulted in 2007 compared with 82% in 2006.

National statistics indicate that the vast majority of police departments use one-officer cars. Recent research indicates that assaults of officers are closely related to resistance to police use of force, and that resistance may be greater for one-officer cars than for two officer cars.

APPENDIX A

A previously used indicator of the completeness of crime data has been “agency months”. Agency months refers to the formula that counts the number of months in a year times the number of agencies, divided into the number of actual months some data is entered for all of the agencies. For example, in 1991 through 1993 Iowa had 225 reporting law enforcement agencies times 12 possible months of data submission equals 2,700 months that could be possible for 100% reporting. In 1991, crime data was entered in 1,872 months divided by the possible months would equal 69.3 percent complete reporting. In 1992, 2033 agency months had some crime data entered for a total of 75.3 percent complete reporting. There were 2,171 months entered for 1993 to account for 80.0 percent completeness. Eight agencies joined the direct reporting agencies in 1994. Therefore, the possible months of reporting rose to 2,796 in 1994. There were 2,323 months entered in 1994 to account for 83.1 percent completeness. One more agency joined the direct reporting agencies in 1995 to bring the total to 2,808 possible months. There were 2,391 months entered in 1995 to increase to 85.1 percent completeness. The same number (2,808) of months was possible in 1996, but completeness decreased to 2,306 months entered or 82.1 percent. In 1997, the number of months possible was again 2,808 and completeness increased to 84.0 percent with 2,360 months entered. In 1998 some data was entered in 2,455 months, which raised completeness to 87.4 percent of the possible 2,808 months. Three agencies were deleted in 1999 and one was added to bring the total number of reporting agencies to 232 with 2,784 possible months. Decreasing slightly, the months complete for 1999 was 86.4 percent. In 2000 the number of agencies stayed constant with 2,784 possible months and 2,364 months entered for 84.9 percent. A total of 237 agencies or 2,844 months were possible in 2001 with 2,481 months entered or 87.2 percent complete. Five agencies were deleted in 2002 for a possible 2,784 months for 232 agencies. In 2002, 2,467 agency months were entered for 88.6 percent complete. An additional agency was added in 2003 for a total of 233 agencies or 2,796 months. Additionally, 2,445 months were entered for 87.4 percent complete in 2003 and 2004. In 2005, 2,473 agency months were entered for the 233 agencies or 88.4 percent complete. In 2006, 2,527 agency months were entered for the 233 agencies or 90.4 percent complete. In 2007, 2,458 agency months were entered for the 233 agencies or 87.9 percent complete. (This method does not account for completeness of the number of crimes entered per month.)

The second indicator of completeness of the data is a comparison of the crime index between the final years of summary reporting and reporting in the incident based system. Table 2 in this report converts the incident-based data back to the summary-based crime index. If we compare the 1991 through 1999 crime index figures with the final three years of reporting in the summary system (1988 through 1990), we estimate that the 1991 data is approximately 52 percent complete, the 1992 data is approximately 58 percent complete, the 1993 data is approximately 67 percent complete, the 1994 data is approximately 69 percent complete. The 1995 data increased to approximately 83 percent complete, the 1996 data is 80.5 percent complete, the 1997 data is 80.0 percent complete, the 1998 data is 76.0 percent complete and the 1999 data is 75.7 percent complete. The year 2000 data was 78.7 percent complete and 2001 data rose to 80.8 percent complete, the 2002 data rose to 85.7 percent complete, but the 2003 data was 80.4 percent complete, and the 2004 and 2005 data was 79.4 percent complete. (This method does not account for an authentic decrease or increase in crime.)

Another way that can be used to indicate completeness involves comparisons of completeness of populations for participating in a given year with the statewide total populations. Considering only agencies which reported in all 12 months in each year, 1991 data represents 54.6 percent of the state’s population, 1992 data represents 60.8 percent of the state’s population and the 1993 data represents 74.2 percent of the state’s population. The 1994 data represents 72.1 percent of the state’s populations while the corresponding figure for 1995 is 81.7 percent of the state’s population and the 1996 figure is 70.9 percent. Increasing again in 1997, the data represents 79.9 percent of Iowa’s population but dropped to 77.8 percent of Iowa’s 1998 population. In 1999, the data represented 82.9 percent of the state’s population but again dropped to 74.6 percent of the 2000 population and 75.5 percent of the 2001 population. The 2002 data increased markedly to 89.2 percent of the population, 2003 was 88.6 percent of the population but decreased in 2004 to represent 79.4 percent of the total population and 2005 to represent 78.5 percent of the population. The 2006 and 2007 data also increased markedly to 94.4% in 2006 and 94.2% of the population in 2007. (This method does not account for small agencies that would truly have no crimes during a month or does not account for the completeness of the number of crimes entered per month in larger agencies).

APPENDIX B

Definitions of Crime Categories

“The following definitions are not meant to be used for charging persons with crimes. To the contrary, they are meant to be “receptacles” or “pigeonholes” for reporting crimes throughout the United States. State statutes must be very specific in defining crimes so that persons facing prosecution will know the exact charges being placed against them. On the other hand, the definitions used in NIBRS must be generic in order not to exclude varying state statutes relating to the same type of crime.”
